WELCOME TO THE FARMTEK® FAMILY

It's our mission to enhance your life by bringing you products that solve your problems and simplify managing your barn, business, home or garden center. Since 1979, we have been committed to meeting your needs. That commitment encompasses many things. It provides shopping from a collection of over 30,000 of the highest quality products available. It means our friendly National Account Managers are here to listen to you and respond with accurate, helpful solutions. *We hope you enjoy your experience. - Barry Goldsher, CEO*

Shop our FULL LINE of High Quality Products at www.FarmTek.com or www.GrowersSupply.com

We've recently condensed our catalog to improve and simplify your shopping experience. Although you might not see some of the products you've purchased in the past in this catalog, you can still find them online or by calling one of our National Account managers. Browse our website or call today to find your favorite products.

PAYMENT OPTIONS

Sending a Payment - Mail it to:
A.R. Department, 1395 John Fitch Blvd., South Windsor, CT 06074

Credit Cards - Simple, fast & convenient
Contact one of our National Account Managers to place and pay for your order all in one quick and easy process.

Financing
We are proud to announce a new in-house financing plan that includes rates as low as 5.99%. All terms subject to credit approval. Whether you are adding a fabric structure or simply upgrading your light fixtures, our flexible financing plans allow you to get your projects completed. Finance as little as $5,000 by trusting your next project to us. Contact us for more information or to begin planning your next project today.

Returns - 100% Guarantee
If for any reason you are not satisfied with your purchase, you can return the item(s) to us within 30 days. Simply call 1.800.245.9881 and our friendly Customer Service Associates will then instruct you where to send the merchandise. Please note, special order items are not returnable. Returns will not be accepted if shipped COD.

ClearSpan

Since 1979, ClearSpan™ has been providing the most dependable building solutions across dozens of industries.

ClearSpan™ structures are among the most versatile and dependable, and whether you need a building for commercial storage, sand & salt, athletics or anything else, there's a custom or turnkey ClearSpan building. Contact a Building Specialist now for a free project quote, and find out why businesses across the globe trust ClearSpan for all their business needs.

THE CLEARSPAN ADVANTAGE INCLUDES

- Industry-leading warranties
- I-Beam & Truss Designs
- Natural ventilation
- Low cost per square foot
- Quick construction timelines
- Cost-saving foundation options
- Maximum usable space
- Climate-sensitive covers
- Permanent or temporary use
- Superior acoustics

Fabric Structures

- Ultra-durable fabric covers
- Natural light filters through, significantly reducing lighting costs
- Truss Arch or I-Beam frames
- Natural ventilation
- Cost-effective foundations that are temporary or permanent
- Custom and turnkey designs

Metal Buildings

- Steel cladding for maximum strength
- I-Beam construction
- Build to any size
- Traditional appearance
- Cost-effective
- Custom and turnkey designs

Hybrid Buildings

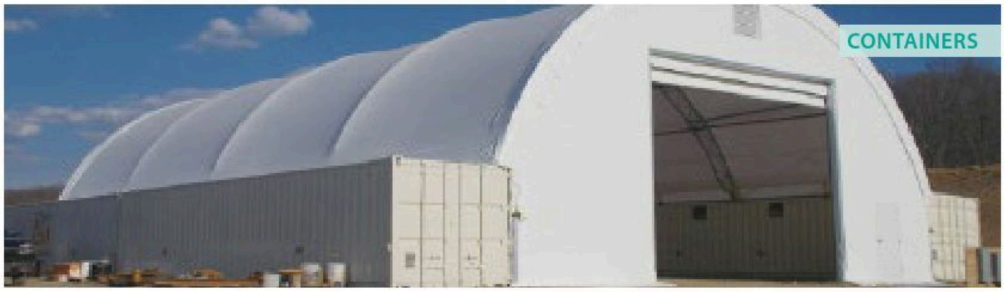
- Combines the best of fabric and metal structures
- Fabric roof provides natural lighting
- Steel sidewalls ensures strength
- Energy-efficient options

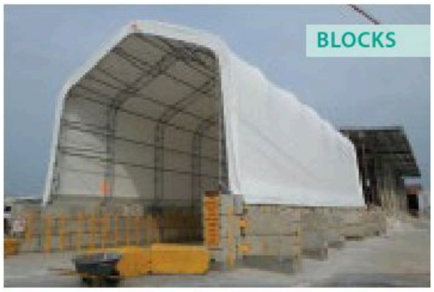
Versatile Foundation Solutions Allow You to Build Anywhere. From money-saving foundations that allow these buildings to be constructed just about anywhere to more traditional options, ClearSpan™ has the ideal foundation solution for any project.

CLEARSPAN FOUNDATION OPTIONS

- Poured Concrete
- Exclusive Helical Anchor System
- Pony Walls
- Blocks
- Containers
- Piers
- Concrete Pads

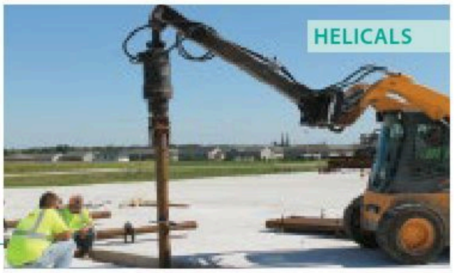
…and more

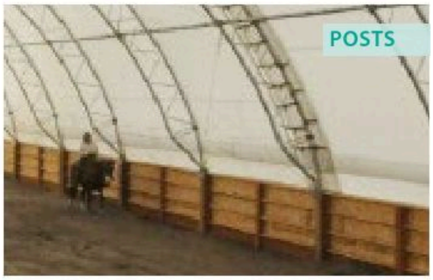


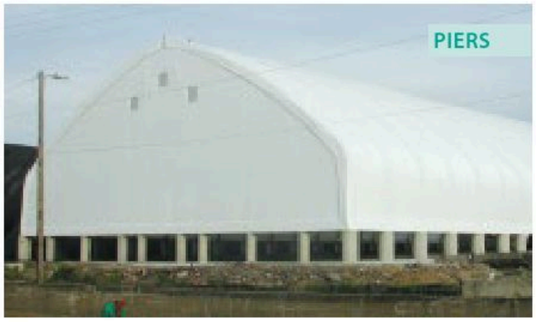


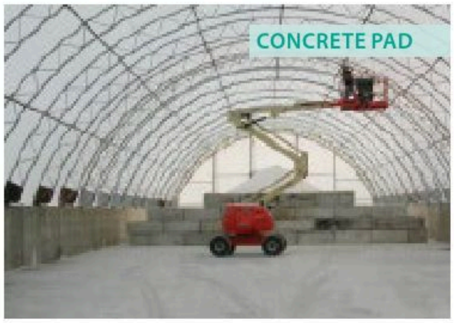
ClearSpan offers their exclusive Helical Anchoring System.

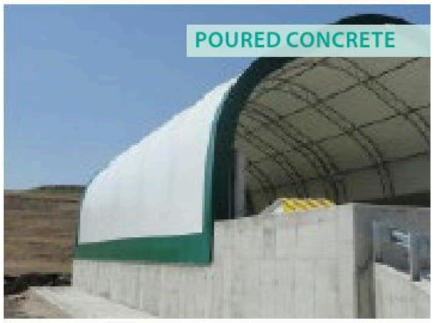
This cost-effective foundation drills directly into the ground, eliminating the need for expensive excavation and traditional foundations. The anchors create a dependable hold that can last for decades, while also allowing the structure to be conveniently relocated and reconstructed as needed.











ClearSpan™ Freestanding Buildings are the economical solution to dry storage needs.

- Ideal for boat, hay, grain, sand and salt storage, livestock production, truck and tractor garages and more.
- Compare our price to the $30,000 to $40,000 cost of traditonal buildings.
- Can be built on any surface in just a few days.
- Frame is constructed from 14 gauge, triple-galvanized structural steel tubing.
- Premium white, 12.5 oz. , 24 mil cover reflects light, keeping the building cooler in the summer and warmer in the winter, and comes with a 15 year warranty.
- Custom colors, with built-in 6'W white skylight, are available at a premium.
- Buildings are sold without end panels, but can be equipped with ends, roll-up sides and can be insulated with our TekFoil™ Reflective Insulation, sold separately.
- Freestanding Buildings come complete with Heavy-Duty Base Plates that have predrilled holes.

Create more storage and clearance in your ClearSpan Freestanding Building by mounting it on containers with ClearSpan's Freestanding End Wall Frame Kits for Containers and End Wall Panel Kits for Containers.

- A great way to maximize the storage space and clearance of ClearSpan's Freestanding Buildings.
- End Wall Frame Kits provide the necessary end wall framing, while End Wall Panel Kits provided a durable fabric cladding for end walls.
- These versatile kits feature special designs that allow the columns and headers to be adjusted in any direction, so they can accommodate various sized overhead and sliding doors.
- The End Wall Frame Kit and End Wall Panel Kit can be used on containers ranging in height from 8'6" to 9'6".
- End panels are available in white, tan, green and gray.

WARNING: Cancer and Reproductive Toxicity - P65Warnings.ca.gov ⚠

ClearSpan™ Econoline Pony Wall and Freestanding Buildings are the economical solution to any storage need.

- Ideal protection from wind, rain, snow and sun.
- Choose between Freestanding and Pony Wall styles. Please note that height listed is actual height of building.
- Frames are manufactured from our 14 gauge, triple-galvanized structural steel tubing.
- 10 oz., 22 mil premium polyethylene rip-stop covers come in your choice of white or green and have a 7 year warranty.
- Rafter spacing: 5'.
- For added strength and durability, particularly in heavy-snow areas, we recommend adding extra Rafter Kits, sold separately.
- Custom End Panel Kits are available both with and without Zippered Doors.
- All buildings include Heavy-Duty Base Plates.

Econoline Pony Wall and Freestanding Rafter Kits

- Rafter Kits allow you to add extra strength and durability to your building.
- Kits comes complete with Heavy-Duty Base Plates that have predrilled fastening holes.
- Simply add purlins and cross connectors, sold separately, as needed.

Rafter Kit Accessories

- Swaged purlins are manufactured from 17 gauge, triple-galvanized structural steel tubing and are corrosion resistant.
  1.315" OD, 1-3/16" ID, 3" swage.
- Unique aluminum cross connectors are ideal for purlin to rafter connections and will add strength to your building.

Econoline Pony Wall and Freestanding End Panels

- Choose either Solid or Zippered Ends in standard height or tall version. Tall version allows for enough side wall fabric to sit on a 6' wall. If necessary, fabric can be cut in the field.
- End Frame and Installation Kits are not included. Let your National Account Manager make the right recommendation for end frames, fabric clips and conduit for your application.

Host outdoor events under a WeatherShield Heavy-Duty Commercial Canopy.

- Quick and easy assembly on any surface.
- EZ-Lock slip fittings mean less building time, more event time.
- Frame is manufactured from 14 gauge, 1.66" OD, triple-galvanized structural steel tubing.
- 12.5 oz., 24 mil premium covers come in your choice of four colors and have a 15 year warranty.
- Sidewall height: 6'6". Optional Side Panels and Gable Ends are available.
- For 18'W and 24'W canopies, we recommend our ground posts (for soil) or our Heavy-Duty Base Plates (for concrete). Each sold separately.

Side Panels and Gable Ends

- Available in either 12.5 oz. poly or ClearView 20 mil PVC vinyl with white 22 oz. PVC-coated polyester trim. PVC vinyl is UV, flame and mildew resistant, marine-grade quality, has a cold-crack rating of -20˚F, and will maintain its high clarity and flexibility.
- Gable Ends available with 4'W x 7'H zippered doors.
- Our 8" Snugger Tie-Downs are included for quick and easy fastening and securing.

WARNING: Cancer and Reproductive Toxicity - P65Warnings.ca.gov ⚠

ClearSpan™ HD Beef Master™ Systems offer a controlled, comfortable environment for protecting your animals.

- The HD Beef Master™ Systems allow you to control your cattles environment. It keeps them safe and out of the elements, leading to fewer injuries, higher gains and maximum profit.
- Our exclusive feed shield allows for more open space within the structure.
- The feed shield is a 4' exterior overhang on Beef Master™ Systems. The feed shield improves feed efficiencies, relieves stress and enables a controlled feeding environment while saving money on reducing wasted feed.
- Overhang keeps feed dry and out of both snow and rain, eliminating the need for scraping the wet, spoiled feed out of the bunk. This saves you both time and labor.
- Our HD Beef Master™ frames are more durable than ever. They feature our truss arches that are manufactured from triple-galvanized structural steel, which is resistant to corrosive environments and long lasting.
- 12.5 oz., 24 mil white premium cover.
- Industry-leading 20 year warranty on cover and 50 year warranty on frame.
- Covered ridge vents provide maximum air ventilation and facilitate air movement by allowing moisture accumulation to escape. This optimal air exchange reduces risks to animal health.
- Build your feed bunks using pre-cast concrete or wood. Purchase materials for feed bunks, posts and framing locally.
- Heavy-Duty Base Plates are included.

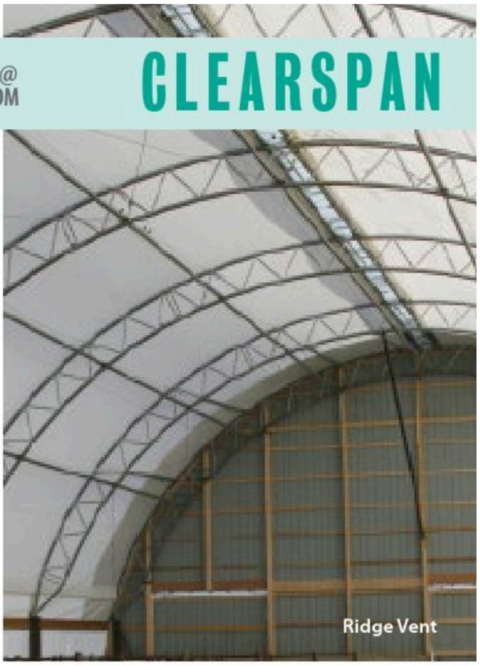
The ClearSpan™ Premium HD Beef Master™ Systems feature the most durable construction and are a great option for farms located in regions with harsh weather.

- The Premium HD Beef Master™ creates an environment where cattle can thrive. It keeps them safe and protected from weather, leading to healthier, more profitable cattle.
- This ultra-durable structure is mounted on I-Beams and bolted onto cement piers in the ground, creating a foundation with the utmost security.
- Features a 7' feed shield that maximizes the structure's space. The cattle feed in a covered, controlled space on the side of the structure. The shield improves feed efficiencies and reduces wasted feed by protecting it from rain and snow.
- The feed shield has a clearance of 12', so TMR wagons and tractors can operate underneath without any issues.
- The other wall is open and features a 2' awning to help keep rain out.
- ClearSpan's™ Curtain Package is an ideal option for customers looking to partially close the wall in.
- The structure comes open ended, but can be outfitted with custom end walls.
- Covered ridge vent is included to maximize air circulation and to further ensure a healthy environment.
- Truss spacing is 16' on center, making it much easier to install feed bunks, headlocks and paneling.
- Truss arches are manufactured from triple-galvanized structural steel that provides a long life and corrosion resistance.
- 12 oz., 24 mil white premium cover.
- Industry-leading 20 year warranty on the cover and 50 year warranty on the frame.
- 50 sq.ft. per head is recommended.



Ridge Vent

ClearSpan™ Curtain Packages

- Curtains are approximately 7'6" in height, leaving 5' open at the bottom.
- Each package includes: 12.5 oz. white curtain, 40:1 manual gear box, center height-driven curtain and anti-billowing for the exterior, including curtain drive doors and tail doors.
- Longer curtains will come with more than one gear box to ensure smooth and effective operation.

ClearSpan™ Concrete Wall Panels

- ClearSpan™ Concrete Wall Panels are 5'W x 16'L and designed to fit our 50'W Beef Master™ building on I-Beams.
- A superior alternative to wood style walls.
- Smooth finished inside edge allows for easy cleanup.

ClearSpan™ Commodity HD Buildings feature an open-sided design that allows workers and equipment quick, easy access.

- This structure is ideal for storing different bulk materials or where access through the entire side of the building is desired. Multiple trucks, bucket loaders or other equipment can access simultaneously.
- The open-sided Commodity Building provides plenty of clearance, for large machinery and equipment to maneuver within the structure's threshold.
- Structures are constructed from triple-galvanized structural steel frames, which are durable and corrosion resistant.
- Commodity Buildings are covered with 12.5 oz., 24 mil rip-stop polyethylene that is UV resistant. Covers come in your choice of four colors.
- Industry-leading 50 year warranty on the frame and 20 year warranty on the cover.
- Side Panels are available to cover the open side. Custom covers, end panels and accessories are also available. Ask your knowledgeable National Account Manager for more information.

ClearSpan's HD Raised End Walls allow you to completely enclose your pony wall Round HD Buildings.

- End walls are available as solid end panels or with framing for doors. Framing includes space for an overhead and walk-in door. Doors sold separately.
- Can be used with ClearSpan Round HD Buildings that are built on a 4' or 6' pony wall.
- Base termination up to owner discretion.
- Available in four different colors.
- End walls are constructed from triple-galvanized steel and ClearSpan's 12 oz. fabric cladding. The steel is strong enough to withstand the harshest environments, and the durable fabric features a rip-stop weave that halts any potential tears.
- End walls are available in standard and tall sizes.

NEW The 4 Stroke Post Driver is powerful, yet easy to operate and enables you to quickly drive posts or anchors into the ground, so you can secure your structure with minimal labor.

- This convenient post driver features a lightweight design that makes it easier to operate than other post drivers, while still providing enough driving power to penetrate hard-packed soil and rougher terrains.
- Ideal for use with Driven Tube Anchor Kits when installing ClearSpan™ Econoline Truss Buildings.
- While self-installing, this post driver saves users a substantial amount of time and physical labor, leading to a more streamlined construction process.
- Operated by 32cc 4 stroke air-cooled engine. Engine is quiet, easy to start and offers smooth idling.
- Max power and speed: 0.87kW/6500r/min.
- Fuel tank capacity: 0.65L.
- Post driver comes complete with 50mm and 70mm sleeve collar, as well as a tool kit containing a funnel, screwdriver, wrench, Allen wrenches and spark plug wrench. Hard shell case included for safe storage.

STK#	EACH
118766	$339.95

ClearSpan™ Truss Building Driven Anchor Kits are a cost-effective and reliable foundation solution that allow you to quickly ground mount your ClearSpan™ Truss Building with little site preparation.

- These innovative tube anchors provide reliable foundation at fraction of cost of more traditional solutions.
- Unique system works by driving anchors into ground at varying angles, functioning much like tree's roots to securely hold structure in place.
- Anchors can be installed without need for heavy machinery. Only post drivers (116040 to start, QH1099 to finish). Our 4 Stroke Post Driver, sold separately, is ideal.
- Anchor tubes and hot dipped galvanized caps are made from structural steel to provide superior strength and dependability.
- Intended for use with buildings up to 65' wide.
- Middle & End Anchor Kits (118555) and End Wall Anchor Kits (118556) sold separately and required in varying quantities based on structure.

NEW ClearSpan™ Econoline Container Storage Structures incorporate secure storage space directly into your structure's foundation and require no on-site welding, making installation fast and easy.

- These convenient, yet reliable single cord structures feature wide-open interiors, tall clearances and a storage container foundation to ensure all your valuables are well-protected.
- Buildings come with a bolt-on container mounting system, which simplifies installation by eliminating the need for welding.
- Frames are constructed from high-quality galvanized steel tubing for reliable support and superior corrosion-resistance.
- Cover is a heavy-duty, 26 oz. vinyl covering that's white with green trim and comes with a 10 year warranty.
- Structures are available with end walls (118633 & 118634) or without end walls (119229-119232).
- End walls are able to accommodate both standard and high cube containers and come with base plates. Each end wall is outfitted with a 13'2"W x 13'2"H winch-operated door to give machinery and vehicles easy access from front or back of structure.

NEW ClearSpan™ Econoline Truss Container Storage Structures employ a durable, double truss frame and utilize a no-weld container foundation to ensure you have the utmost protection and the maximum amount of usable storage space

- Convenient and economical design employs a bolt-on container mounting system, allowing for simple installation that requires no on-site welding.
- Buildings are supported by a double truss, galvanized steel frame that ensures superior strength, dependability and corrosion-resistance.
- Frame includes no interior supports, providing a wide-open space with extra-tall clearance height.
- Versatile container foundation offers a reliable base and incorporates abundant, secure storage space directly into structure's design.
- Covered with heavy-duty, 26 oz. vinyl cladding for reliable weather protection. Covers are white with green trim and backed by a 10 year warranty.
- Structures are available with end walls (118635 & 118636) or without end walls (119233 & 119234).
- End walls can accommodate standard or high cube containers and come outfitted with a 13'2"W x 13'2"H winch-operated door, which ensures vehicles and machinery have easy access into structure from front or back.
- Base plates for end walls are included.

ClearSpan™ HD Buildings on Containers are designed, manufactured and constructed with the highest structural integrity.

- High clearance and wide-open space of these structures make them ideal for virtually any application
- 12.5 oz., 24 mil rip-stop polyethylene covers are UV resistant and available in your choice of four colors.
- Durable frames are manufactured from our, triple-galvanized structural steel, which is resistant to corrosive environments and long lasting.
- Industry-leading 20 year warranty on cover and 50 year warranty on frame.
- Designed as a kit to sit on both standard and high cube containers. They come with one solid end wall, one end wall with framing for doors, a 14' x 14' rolling steel door and a 36" x 80" man door (available in white only). Containers not included.

Create more storage and clearance in your ClearSpan Freestanding Building by mounting it on containers with ClearSpan's Freestanding End Wall Frame Kits for Containers and Freestanding End Wall Panel Kits for Containers.

- End Wall Frame Kits provide the necessary end wall framing, while End Wall Panel Kits provided a durable fabric cladding for end walls.
- These versatile kits feature special designs that allow the columns and headers to be adjusted in any direction, so they can accommodate various sized overhead and sliding doors.

The HD Container Building No-Weld Mounting System simplifies and streamlines the installation process, while still providing a secure connection to a shipping container foundation.

- This convenient mounting system eliminates need for field welding when attaching truss frames to shipping container foundations.
- Kit is designed as a welded bar joist that bolts to the corners and edge lip of shipping containers.
- Bar joist is set up to accept 20' rafter spacing.
- Designed with pre-welded plates that can be bolted to building's base plate at each 20' spacing, which allows for quicker install time, since installer no longer needs to locate every base plate for the structure.
- Supports ClearSpan HD Container Buildings up to 65'W. Available in lengths of 40' (118605L040) and 80' (118605L080).

ClearSpan™ Heavy-Duty Retractable Vinyl Doors make a functional and cost-effective addition to your fabric building, providing reliable weather protection and easy access to aggregate material, equipment or any other stored good.

- These two-piece fabric doors are made from durable 22 oz. vinyl and create an effective barrier against moisture, birds, flying debris and more.
- Doors open horizontally from either side using a convenient theater-curtain style rope and pulley system.
- A unique over-center locking mechanism at the midpoint helps ensure desired tensioning of door panels when closed.
- Vinyl doors are reinforced by 14 gauge, 1.90" OD galvanized vertical steel tubes on approximately 5' spacing.
- Each panel is also supported at top by heavy-duty sliding door rails and rollers spaced at approximately 1'-8". Rails and rollers are covered by galvanized metal flashing to deflect the elements.
- For increased wind-resistance, doors are secured to a threshold ramp at bottom by cane bolts measuring 5/8" in diameter.
- Included threshold ramp allows for easier open-close motion and helps prevent door from billowing in all positions.
- Ramps can be secured to concrete using KH-EZ Concrete Screw Anchors (117233) or to dirt/rock surfaces using Tent Stakes (118701), sold separately. Ten anchors or stakes are recommended for every 10' of door width.
- Doors come in white color and are available in widths and heights of 20' and 30'. Custom colors and sizes can also be ordered upon request, with sizes coming in 1'-8" increments.
- If attempting to retrofit an existing building, please consult a structural engineer.

CLEARSPAN™ HEAVY-DUTY RETRACTABLE VINYL DOORS

STK#	SIZE	EACH
GHD202022W	20'W x 20'H	$5,545.00

These are a great, low-cost alternative to traditional doors. Our exclusive, universal-mount Fabric Gathering Doors are a durable and attractive addition to any building, and with new features and benefits, they are better than ever.

- Manual or electric operation.
- Functions smoothly and quietly, and they are easily opened and closed with a manual winch.
- Manufactured from our heavy-duty, 22 oz., PVC-coated vinyl that is flame resistant and features a temperature range of -22°F to 158°F.
- Made with triple-galvanized structural steel tubing that is 9 gauge and has a 1.90" OD.
- Easy to install and is mounted on the inside.
- Ideal for both interior and exterior use. Fabric Gathering Doors are the perfect room divider and can be utilized anywhere.
- Doors require little to no maintenance and won't rust or rot.
- A minimum clearance of 10" on the side of the door is required for mounting our exclusive, Heavy-Duty Hand-Operated Winch.
- Fabric Gathering Doors come standard with a hand-operated winch. For hands-free operation, Electric Winches are sold separately.

111382
Janus 3652

Dependable and quick to install.

- 26 gauge corrugated door curtain is manufactured from full hard galvanized grade 80 steel and coated with super durable polyester paint that is backed by a 40 year film integrity rating and 25 year no-fade limited paint warranty.
- Doors feature 12" diameter drums, allowing for lower headroom requirements.
- Grease-filled, shielded radial ball bearings at the drums provide longevity and smooth operation.
- Enclosed barrel protects factory-lubricated springs from the elements.
- Cam-action device allows quick, easy and equal adjustment of the tension on all springs simultaneously from one end of the door. Simply insert a common 1/2" ratchet tool into the end of the drive shaft and rotate.
- Doors come complete with slide bolt lock assemblies at bottom bars for security and perimeter weather-seal kit, which includes header seal, side draft stops and bottom astragal.
- 1 year manufacturer's warranty.

Janus 2000 Commercial Coiling Sheet Doors:

These manual push-up doors are an economical alternative to sectional or slat doors.

Janus 3652 Commercial Coiling Sheet Doors:

These wind-load certified doors are independently tested in accordance with ASTM E 330 and ANSI/DASMA 108 and meet requirements of the International Building Code and Florida Building Code (FL 14425). Design wind load is rated +36 PSF and - 40 PSF for opening width of 12'0". Ask your National Account Manager for additional wind-load ratings. Chain hoist included on all doors over 10' wide or 10' high.

Add a Door Opener for easy, automatic operation.

- Complies with UL325-2010, providing primary monitored entrapment protection through monitored photo sensors.
- Includes receiver and one-button remote.
- 115 V, 60 Hz, 1/2 HP, single-phase intermittent motor with instant reverse and internal automatic reset thermal overload protection.
- Includes emergency chain hoist with electric interlock and emergency disconnect chain.
- UL listed and labeled.
- 2 year manufacturer's warranty.

Plyco® ADA Prehung Door Kits can be installed quickly and are designed to make building entrances handicap accessible, ensuring your business is ADA compliant.

- These kits feature a 16 gauge steel frame and 18 gauge steel door panel to provide strength, durability and long lifespan.
- Frame is welded and prepped for wall installation with door hung in frame. Includes high-performance sweep and threshold combination for tight seal.
- Doors are smooth and have a pre-painted white finish. Each door is 1-3/4" thick and contains rigid polystyrene foam to deliver R-value of 2.22.
- Designed with 4-1/2" x 4-1/2" stainless steel hinges and 10 gauge hinge reinforcements. Includes three hinges per door panel.
- These door kits can be customized to work with all building types.
- Available in left hand swing door (117256LHFK), right hand swing door (117256RHFK) and left and right hand double swing door (117257LHRHFK).
- Kits come complete with kick plate, lock set, panic bar, automatic door closer and ADA compliant threshold. Double doors (117257LHRHFK) feature removable center mullion.
- Single door is 36"W x 80"H. Double doors are 72"W x 80"H.

The ClearSpan™ HD Beam Building ensures superior durability and is one of the strongest fabric structures available.

- This structure is constructed with ClearSpan's Beam frame, which allows the structure to be designed at a larger scale without losing strength or structural integrity.
- The HD Beam Building is covered with the exclusive ClearSpan Armor Shield Cover. The cover is made from 29 oz architectural vinyl and was created to ensure maximum strength. The ultra-reliable material features a seven-layer construction and has been extensively tested to ensure decades of use.
- I-Beam frame, purlins and secondary framing are all constructed from grade 50 steel and finished with gray primer.
- 12' nominal eave height with 10' minimum clearance height at the eave. 18" eave extensions.
- 4:12 roof pitch.
- Available with solid end walls and end walls with doors. Buildings that are 30' and 40' wide have a door frame of 12'W x 12'H and one man door. All wider buildings have a door frame of 14'W x 14'H and one man door.
- ClearSpan manufactures these buildings in-house, creating a streamlined building process that is reflected in the low cost per sq. ft.
- Industry-leading warranties allow customers rest assured that this building will be in use decades into the future. HD Beam Buildings come with a 50 year frame warranty and a 30 year warranty on the Armor Shield Cover.

The ClearSpan™ HD Hybrid Building combines the strength of a metal building with the benefits of a fabric structure.

- ClearSpan's HD Hybrid Building features a steel I-Beam frame that is clad on the side walls with metal cladding and ClearSpan's Armor Shield fabric is used for the roof.
- The exclusive Armor Shield Cover is made from 29 oz. architectural vinyl, which provides superior strength and comes with a 30 year warranty.
- I-Beam frame, purlins and secondary framing are made from grade 50 steel and finished with a gray primer. I-Beam frames feature a 50 year warranty.
- The metal cladding is made from grade 80 metal that is 26 gauge, and it is available in R-panel profiles. Metal cladding comes with a 25 year warranty.
- 12' nominal eave height with 10' minimum clearance height at the eave. 18" eave extension and 4:12 roof pitch. Nominal bay width is 20'. Other bay widths, heights and roof pitches may be custom designed.
- Available with solid end walls or end walls with framing for doors.
- Buildings come with a choice for four colors for the fabric cover and choice of 20 colors for the metal sides, ends and trim.
- The HD Hybrid Building boasts industry-leading warranties, so users are sure their building will last decades into the future.

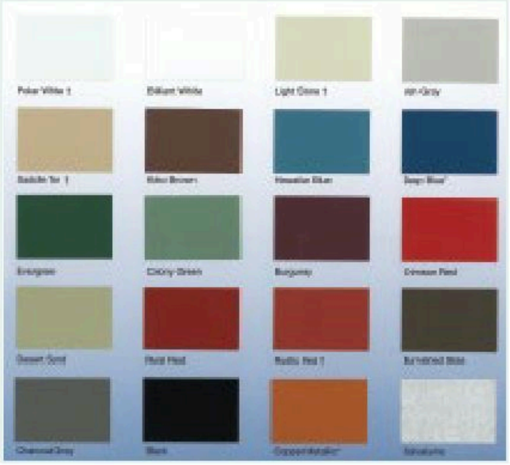
Combining ultimate strength and the ability to build any size, the ClearSpan™ Metal Building provides a versatile solution that can be customized to meet any application.

- The Metal Building utilizes ClearSpan's™ Beam construction, which allows buildings to be built to nearly any size without losing structural strength and integrity.
- Numerous metal cladding options allow customers to create a building that is ideal for them. Durable cladding is made from grade 80 steel and available in either 24 or 26 gauge.
- Beam frame, purlins and secondary framing are all constructed from grade 50 steel and available in red, grey and galvanized steel.
- Cladding features multiple channel designs, including "R" panel, AG panel and "U" panel, and is available in numerous colors.
- Available with solid end walls and end walls with doors.
- These structures are manufactured in-house, so ClearSpan™ is able to streamline the building process and cost, leading to a structure that has a low cost per square foot.
- Industry-leading warranties ensure that the Metal Building will last decades into the future. 50 year warranty on frame, 40 year paint warranty and a 1 year workmanship warranty.



Designed for ultimate strength and dependability, ClearSpan™ Enclosed HD Metal Buildings offer a reliable long-term solution that can meet just about any application.

- These durable, fully-enclosed buildings utilize ClearSpan's Beam construction, which provides the utmost structural integrity at nearly any size.
- Beam frame, purlins and secondary framing are all constructed from grade 55 steel.
- Roof and wall panels are made from painted 26 gauge R-Loc™.
- Gutter and Downspouts included.
- Buildings are rated for up to 115 mph winds and up to 30 psf ground snow load.
- Roof pitch is 1:12.
- Offered in either 14' or 18' exterior eave heights.
- Buildings come enclosed. Door kit sold separately to complete your structure.
- Available in the customers' choice of two color combinations: Gray with Charcoal roof, trim and wainscot (G) or Light Stone with Hunter roof, trim and wainscot (T).
- Custom structures and colors are available upon request.
- Industry leading warranties ensure that the Enclosed HD Metal Building will last decades into the future. 50 year warranty on frame and 40 year limited paint warranty.

NEW ClearSpan™ Outdoor Sound Absorption Panels provide an effective, economical barrier to reduce outdoor noise, which can be installed on a variety of fencing systems or solid walls.

- These panels are ideal for limiting noise pollution from open-air pickleball courts or pavilion-style pickleball facilities, as well as at industrial sites, shooting ranges and more.
- With an STC rating of 23 dB, the panels offer exceptional sound blockage, attenuating the high frequencies emitted during pickleball games and in other noisy environments.
- Panels have undergone extensive testing to ensure they withstand the elements in outdoor applications.
- Convenient mounting grommets and reinforced borders allow for easy installation. Panels can be hung on chain link fences using grommet suspension points, or may be stapled or nailed to solid walls and fences.
- When hanging panels, it's recommended to use 3/8" heavy-duty zip ties or cable 1/4" in diameter.
- Each panel is 1/10" thick and comes in widths of 54" and 105", with heights ranging from 96" to 144".
- Panels come in green color.
- Custom panel widths, lengths and colors are also available upon request.

ClearSpan™ ClearView Roll-Up Sidewall Panels are a versatile addition to any fabric or metal building that features an I-Beam frame, allowing operations to control their interior environment by seamlessly transitioning between open and closed sidewalls.

- Roll-up panels are made from durable 22 oz. vinyl fabric and are ideal for use with indoor pickleball facilities.
- When in the open position, this curtain system allows for completely open sidewalls, which enables fresh air and natural light to permeate the structure. Static vertical anti-billow pipes keep panels in place and are spaced approximately 8' apart within framed opening.
- While closed, the panels lock into place and offer protection from sun, wind and rain. Users can choose between window option (IBRP10X20CW & IBRP10X20CN) to provide clear view of outdoor environment or solid option (IBRP10X20SW & IBRP10X20SN) for total privacy.
- Systems utilize manual gear box with static roll-bar at the top of the framed opening onto which panels will roll.
- Each curtain system spans distance of one bay, or the distance between rafter legs on a single side. Intended for use on I-Beam frames with 20' spacing and an existing 10'H header, but can be easily customized to fit smaller dimensions.
- Additional information required when retrofitting an existing structure.
- Available in customer's choice of white or green color.
- Temperatures below -10°F can affect window performance.

Estate Elite Greenhouses, the ultimate in backyard growing.

- 5'H sidewalls give you more growing space, as well as more headroom.
- Panels are constructed from UV-stabilized 6 mm polycarbonate for superior heat retention and hot-spot reduction.
- Heavy-duty, powder-coated aluminum profiles create a stable and sturdy frame.
- Frame has a bright white, powder-coated finish that is attractive in any backyard.
- Decorative peak adds elegance and beauty.
- 9'1"W units have one 2'6"W Dutch door. 11'8"W units have total door width of 3'10" (one 23"W Dutch door and one 23"W standard entry door). All are 6'H and come complete with rugged stainless steel locking door handle and nickel-plated dead bolt.
- Multiple vents offer improved air circulation.
- For automatic climate control and optimum growing conditions, install our energy-saving Univent Autmatic Vent Opener (104037), sold separately.
- Use SunBlocker™ Black Knitted 60% Shade Panel during extreme heat to eliminate heat stress and to ensure optimum plant growth.
- We recommend using the powder-coated steel base, sold below.
- 10 year warranty on both frame and polycarbonate.

Ground Anchor for GrowSpan Estate Greenhouses

- 17 gauge, 2' x 1.315" OD galvanized ground post anchor.
- Each comes complete with carriage bolts, washers and nuts.
- Minimum recommendation is six anchors per greenhouse. **104778**

GrowSpan™ Straight Sided Cold Frames provide a comfortable growing environment.

- Encourages better air circulation, with less humidity and more stable air temperature.
- Constructed from 14 gauge, triple-galvanized structural steel tubing.
- 20'W models have a 4'6" sidewall height and a 9'6" height at peak.
- 28'W models have a 4' sidewall height and an 11' height at peak.
- Ground posts and purlins included.
- Can be covered with greenhouse film, shade cloth or lightweight PolyMax® fabric, all sold separately. 20'W requires 32'W film. 28'W requires 42'W film.
- Top and bottom baseboards are recommended. Our Galvanized Steel Hipboards and Baseboards, sold separately, is ideal.

Expand your existing Cold Frame with one of our Cold Frame Rafter Kits. Any length, any spacing. Gain additional, valuable growing space.

- Rafter Kits add extra strength and durability, particularly in heavy-snow areas.
- Kits come complete with two ground posts.
- Simply add purlins and cross connectors, sold separately, as needed.

Rafter Kit Accessories

- Universal swaged purlins are manufactured from 17 gauge, triple-galvanized structural steel tubing and are corrosion resistant.
- 1.315" OD, 1-3/16" ID, 3" swage.
- Unique aluminum universal cross connectors are ideal for purlin-to-rafter connections and will add strength to your greenhouse.

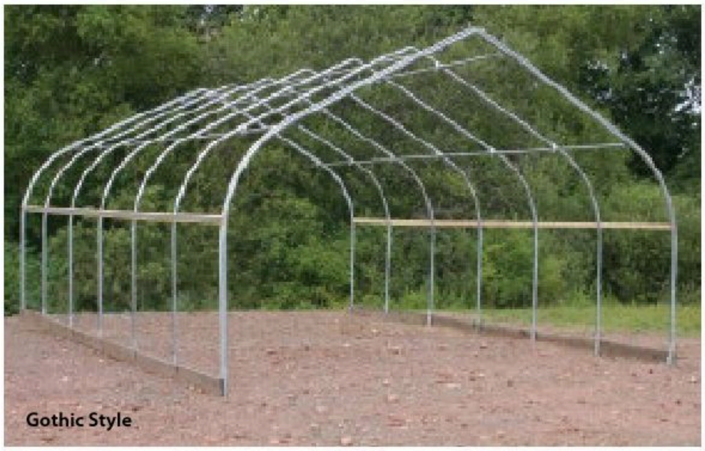
Round Style



Gothic Style

Ideal for starting seedlings or transitioning greenhouse plants prior to outdoor planting.

- Easy to assemble; no drilling or welding.
- Frame is manufactured from heavy-gauge, triple-galvanized structural steel tubing.
- 4' rafter spacing.
- Two styles to choose from, Gothic or Round.
- Gothic style has 4'H side walls. For added strength and durability, especially in heavy-snow areas, we recommend adding our Gothic-Style Support Packages, sold separately.
- All units come complete with ground posts.
- Baseboards are recommended. Our Galvanized Steel Baseboards, sold separately, is ideal.

GrowSpan™ Single Bay High Tunnels are available in 24' and 28' widths.

- These economically priced high tunnels reap payback with most crops in just 2 to 3 years.
- Plant earlier, harvest late into fall or early winter.
- Frames are manufactured from our 14 gauge, triple-galvanized structural steel tubing.
- 24'W high tunnels use 1.66" OD pipe. 28'W high tunnels use 1.90" OD pipe.
- Our Sunmaster™ 6 mil 4 year clear greenhouse film covering is made from strong copolymer resin for strength and durability. Anti-dust additives repel dirt and dust and allow for 92% light transmission.
- Tri-layer film has UV additives and comes with a 4 year warranty.
- End Panels are manufactured from our 10 oz. 22 mil clear premium rip-stop greenhouse fabric and each comes complete with 20'W x 10'H Roll-Up Door that utilizes our Hand-Crank Assembly.
- Purchase 4 x 4s locally to strengthen and finish off the ends.
- Enjoy the advantages of a well-sealed tunnel when needed during the cold months or early production. During the late spring and hot summer months, enjoy the benefits of full ventilation. Unique cross-bracing feature adds extra strength and durability.
- Rafter spacing: 7'.
- Sidewall height: 4'.
- Ridge purlin and heavy-duty ground posts are included.

GrowSpan Economy Cold Frames

- Choose from a large selection of frame widths and lengths.
- Frames are made from 19 gauge, 1.05" OD, triple-galvanized structural steel tubing, with 5' rafter spacing and one purlin.
- Extra rafter kits are available, as well as pipe for additional purlins.
- To provide stability and durability for your frame, we recommend using our Galvanized Steel Hipboards and Baseboards for upper and lower baseboards, sold separately.
- Available frame only or choose frame with 6 mil 4 year greenhouse film, just like the professionals use. Film contains UV block, which helps to reduce the harmful effects of ultraviolet radiation while providing a more comfortable working environment, and an anti-dust additive for better film clarity over the life of the covering. 8' single U-Channels and Stainless Steel Springs are included with purchase of Cold Frame with Film to provide a professional, finished appearance (not included with frame-only option).
- Ground posts and post driver are included for anchoring.

*To order Cold Frame with Film, add F to the end of your STK# (ex. 105179FF).

Start seeds like the pros, or grow herbs, tomatoes, vegetables, tropical fruits and flowers.

- Available in either Round or Gothic style.
- Frame is manufactured from high-quality, heavy-duty, triple-galvanized structural steel tubing, with 4' rafter spacing.
- Cover is manufactured from 7.5 oz., 16 mil translucent rip-stop woven polyethylene that offers 80% light transmission and has a long life expectancy.
- Heavy-duty aluminum entry door is 36"W x 80"H and comes complete with 6 mm polycarbonate sections at top and bottom, stainless steel hinges and latch.
- Rear panel is double-zippered to allow for cross ventilation.
- Baskets can be hung neatly and attractively from purlins. Additional purlins, for your growing needs, can be added with our exclusive universal cross connectors.
- Ground posts are included.

GrowSpan Series 550 High Tunnel Greenhouses can be utilized for either season extension or year-round production, allowing growers to take advantage of a tall, versatile design that makes it easier to improve yields and maximize output.

- S550 High Tunnel Greenhouses are covered with a 6 mil, single-layer anti-condensate film that offers 96% light transmission and superior condensation control.
- These structures be outfitted with a second layer of film, and then inflated between the two layers to significantly increase R-value, supplying growers with a structure capable of year-round production.
- Inflatable double film kit (118769 & 118770) sold separately. Kit comes with everything needed for lasting performance and easy installation, including wiggle wire, 6 mil thermal greenhouse film, repair tape and two air inflation systems.
- Tunnel greenhouses employ a tall, gothic arch-style design with a slight slope, helping to reduce heat and humidity and providing growers with abundant interior space. Constructed with 8'H sidewalls and a peak height of 16'H.
- Frames are manufactured from 16 gauge, 1" x 3" oval galvanized steel pipe.
- End walls are made from heavy-duty aluminum framing and come equipped with 8mm twin-wall polycarbonate.
- Film fastening equipment includes lock channel, wiggle wire and anti-billow rope to assist with ventilation and wind protection.
- Manual roll-up sides, which utilize our Hand-Crank Assembly, allow for greater ventilation control when combatting high temperatures. Sidewalls come complete with insect netting to help protect against pests.
- Each tunnel comes equipped with a 9'10"W x 9'10"H sliding door made from 8 mm twin-wall polycarbonate at one end.
- Recommened rafter support kit (118540) offers additional strength for areas with heavy-snow or high winds. Kits have four inclined supports, along with bottom truss chord.
- Tunnels come with heavy-duty ground posts for secure mounting.
- Baseboards are recommended. Our Galvanized Steel Baseboard Kits (GSBB072 & GSBB096) is ideal.
- 10 year warranty on frame.

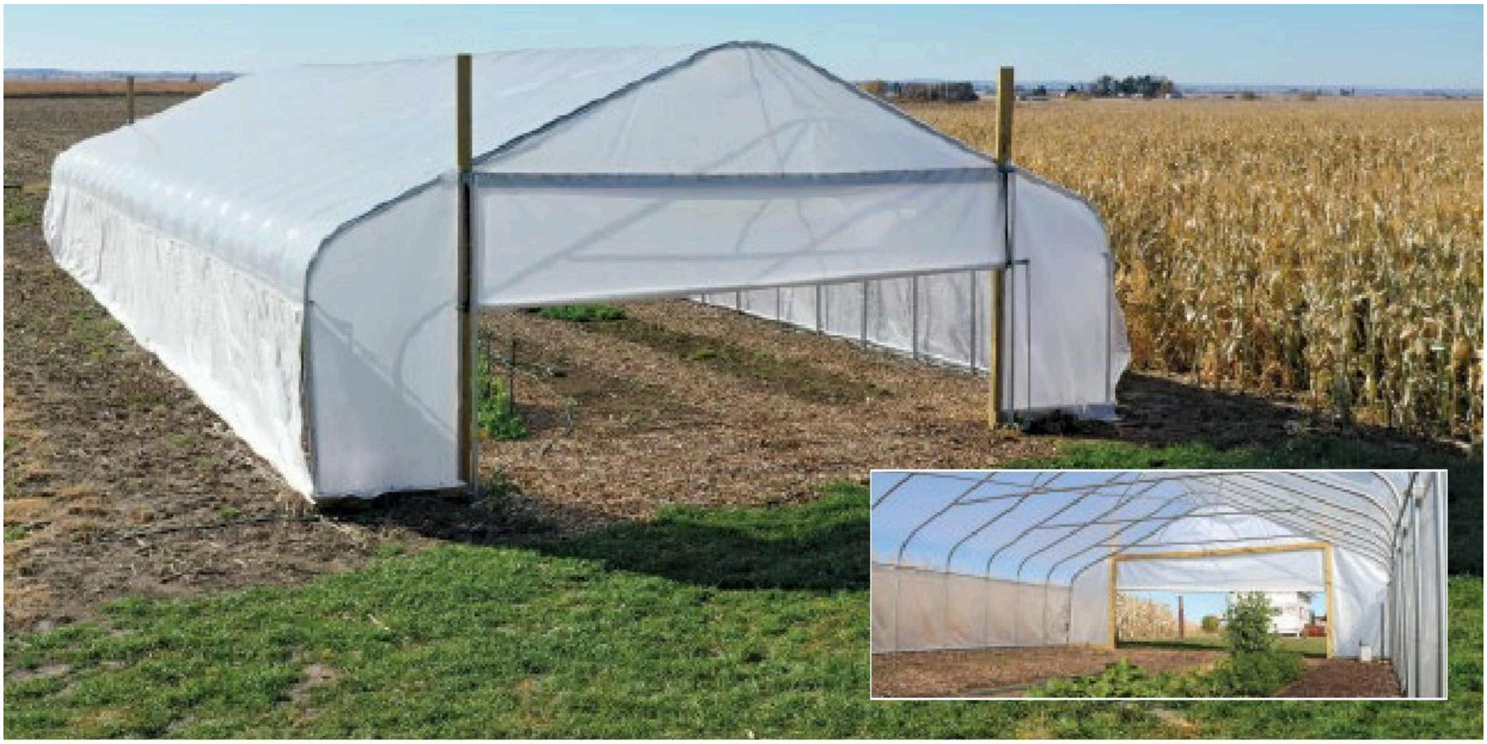
Sunmaster™ Infrared Anti-Condensate Thermal Greenhouse Film



GrowSpan™ Gothic Premium High Tunnels, sufficiently modify the environment to enhance crop growth, quality and yield. These high tunnels offer temperature control, protection from wind, rain, disease and predators.

- Frames are constructed with our 14 gauge, triple-galvanized structural steel tubing. 20'W and 26'W tunnels use 1.66" OD pipe. 30'W tunnels use 1.90" OD pipe.
- Available with either our superior PolyMax® 5.2 oz., 12 mil thick Clear Woven Greenhouse Covering or our Sunmaster™ 6 mil 4 year Clear Greenhouse Film.
- Our PolyMax® 5.2 oz.,12 mil Clear Woven Greenhouse Covering comes with a 4 year warranty. With added UV inhibitors, this cover offers 85% light transmission, has excellent cold-crack resistance and will not tear.
- Our Sunmaster™ 6 mil 4 year clear film is made from strong copolymer resin with an anti-static additive that repels dust and dirt and keeps the light shining through. This film, with tri-layer construction and UV additives, offers 92% light transmission and comes with a 4 year warranty.
- Choose Roll-Up or Drop-Down Sides, manufactured from our 5.2 oz. fabric, to control the air entering the high tunnel and provide four-sided ventilation. Includes our exclusive "Twist-of-the-Wrist" Assembly, complete with all necessary hardware for installation.
- Roll-up doors, which utilize our Hand-Crank Assembly, and end panels are manufactured from 10 oz., 22 mil translucent fabric.
- 20'W units have 16'W x 10'H doors. 26'W and 30'W units have 20'W x 10'H doors.
- Purchase 4 x 4s locally to strengthen and finish off the ends.
- 4' rafter spacing.
- For additional strength and durability, particularly in heavy-snow areas, add our GrowSpan Gothic High Tunnel Support Kits or our Gothic High Tunnel Rafter Kits.
- 6' sidewalls provide additional, valuable growing space.
- Heavy-duty ground posts are included.
- Baseboards are required to attach Drop-Down Sides. Our Galvenized Steel Baseboards, sold separately, is ideal.
- The optional Flush Door Mounting Kit (115083) provides an ideal entryway for high tunnels that are 30'W and have Roll-Up Ends. The kit features a 36"W x 80"H polycarbonate door for optimum light transmission. Flange provides a tight seal, ensuring control over the high tunnel's environment.
- To comply with NRCS requirements, all 30'W Gothic Premium High Tunnels can be outfitted with a Five Part Rafter Kit.

108197H5	30'W x 12'H x 120'L	22,375.00	23,075.00

Increase yield up to 50% with a GrowSpan High Tunnel.

- Manufactured from 14 gauge, triple-galvanized structural steel tubing.
- 6' rafter spacing.
- 6 mil 4 year single layer greenhouse film, for cover and solid ends, comes complete with all hardware necessary for installation.
- Universal Joint Roll-Up for sides, including all hardware.
- Heavy-duty ground posts included.
- Baseboards are recommended. Our Galvanized Steel Baseboards, sold separately, is ideal.

A GrowSpan Round Premium High Tunnel will enhance your crop yield, quality and profitability up to 50%.

- Frames are manufactured from triple-galvanized structural steel tubing.
- Available with our 6 mil 4 year Clear Greenhouse Film or our 5.2 oz., 12 mil Clear Greenhouse Covering.
- Our Sunmaster™ 6 mil 4 year Clear Greenhouse Film is made from strong copolymer resin, with tri-layer construction and UV additives. This film offers 92% light transmission and comes with a 4 year warranty.
- Our PolyMax® 5.2 oz., 12 mil Clear Woven Greenhouse Covering, with added UV inhibitors, is superior to all greenhouse fabrics, offers 85% light transmission and comes with a 4 year warranty.
- Structures can be designed with Zippered or Roll-Up Ends. Both options are manufactured from 10 oz., 22 mil premium rip-stop translucent fabric.
- Triple-zippered end panels feature our, industrial-strength #15 Heavy-Duty Zippers and come complete with fabric clips for attaching.
- Four-sided ventilation is easy. Roll-Up Sides and Ends feature our exclusive "Twist-of-the-Wrist" Roll-Up Assembly.
- Rafter spacing: 4'.
- Heavy-duty ground posts are included.
- We recommend using a baseboard.
- Optional Rafter Support Kits provide extra support for areas with heavy snow or high winds.

ORDERING: GROWSPAN ROUND PREMIUM HIGH TUNNELS

Add C to end of the STK# for High Tunnel with Film Covering and Zippered End. **Example: PB01660R4C.**

Add F to end of the STK# for High Tunnel with Fabric Covering and Zippered End. **Example: PB01660R4F.**

Add CR to end of STK# for High Tunnel with Film Covering and Roll-Up End. **Example: PB01680R4CR.**

Add FR to end of STK# for High Tunnel with Fabric Covering and Roll-Up End. **Example: PB01680R4FR.**

Gothic Hobby

Round Hobby

GrowSpan™ Hobby Greenhouses offers valuable growing space.

- Frame is manufactured from highest quality, triple-galvanized structural steel tubing, with 4' rafter spacing.
- GrowSpan Round Hobby Greenhouses uses 1.315" OD pipe with 17 gauge triple-galvanized structural steel tubing.
- GrowSpan Gothic Hobby Greenhouses uses 1.66" OD pipe with 14 gauge triple-galvanized structural steel tubing.
- End frame is constructed from strong 16 gauge, 1.5" square, triple-galvanized structural steel tubing.
- Ends are covered with 8 mm twin-wall polycarbonate offering superior insulating qualities and reduced heating costs and comes with a 10 year warranty.
- Heavy-duty ground posts are included.
- We recommend using a baseboard. Our Galvanized Steel Baseboards is sold separately.
- Double-layer top covering, with Inflation Fan Kit, is manufactured using an outer layer of our Sunmaster™ 6 mil, 4 year Greenhouse Film and an inside layer of our Sunmaster™ Infrared Anti-Condensate Thermal Film maximizes heat retention offering excellent drip control.
- Gothic Style is available with either Roll-Up or Drop-Down Sides. Drop-Down Sides use our 5.2 oz. greenhouse fabric and come complete with our "Twist-of-the-Wrist" Assembly. Baseboards are required for drop-down sides.
- Units come equipped with a 36"W x 80"H heavy-duty, aluminum entry door, complete with 6 mm polycarbonate sections at both top and bottom, stainless steel hinges and latch.
- Optional Single Door Kit, sold separately.
- During extreme heat, use our SunBlocker™ Black Knitted 60% Shade Panels, sold separately.

GROWSPAN™ ROUND HOBBY GREENHOUSES AND SYSTEMS

STK#	SIZE	GREENHOUSE EACH	SYSTEM EACH
104832	12'W x 8'1"H x 16'L	$4,145.00	$5,489.00

104848	18'W x 10'H x 20'L	5,575.00	7,245.00
104849	18'W x 10'H x 24'L	5,925.00	7,609.00
104850	18'W x 10'H x 28'L	6,155.00	8,809.00
104851	18'W x 10'H x 32'L	6,545.00	8,305.00
104852	18'W x 10'H x 36'L	6,775.00	8,695.00

For Greenhouse w/Roll-Up Sides add C to the end of your desired STK#. To order the entire GrowSpan Hobby Greenhouse and System add S (Propane) or SN (Natural Gas) to the end of the STK# to indicate desired heater type (ex. 104840SN).

For Greenhouse w/Drop-Down Sides add CD to the end of your desired STK#. To order the entire GrowSpan Hobby System, add S (Propane) or SN (Natural Gas) to the end of the STK#, including CD, to indicate desired heater type (ex. 104840CDSN).

Used with roll-up sides.

Galvanized Steel Baseboard Kits add strength to the base of your growing structure and offer improved sealing for your roll-up or drop-down sides.

- These hat channel baseboards provide structures with increased lateral support and a clean, finished look.
- Superior seal helps reduce breezes and heat loss, allowing for greater control over growing environment.
- Designed to work with any greenhouse or high tunnel that requires a baseboard.
- Baseboard kits come complete with instructions, splices and screws.
- Highly recommended when using automated roll-up sides (117149).
- Available in 12' length increments.

GALVANIZED STEEL BASEBOARD KITS

STK#	LENGTH	EACH
GSBB012	12'	$105.95
GSBB024	24'	179.95
GSBB036	36'	275.95

GSBB096	96'	765.95
GSBB108	108'	859.95
GSBB120	120'	959.95

These greenhouses are suitable for the backyard hobbyist or the professional grower. The twin-wall polycarbonate covering provides strength, durability and elegance. Clear sheets are flame retardant, will not discolor and have up to 80% light transmission.

- Frame is manufactured from highest quality, triple-galvanized structural steel tubing.
- End frame is constructed from strong 16 gauge, 1.5" square, triple-galvanized structural steel tubing.
- Ends and top covering are constructed from our 8 mm twin-wall polycarbonate sheets that are light in weight, virtually unbreakable and come with a 10 year warranty.
- Panels contain UV inhibitors which prevent degradation.
- Built-in condensate control eliminates water droplet formation for a healthier plant environment.
- Units come equipped with a 36"W x 80"H heavy-duty aluminum entry door, complete with 6 mm polycarbonate sections at both top and bottom, stainless steel hinges and latch.
- 4'H sidewall offers more valuable growing space.
- Optional Double Door Kits sold separately.
- Heavy-duty ground posts are included. Baseboards are recommended. We recommend our Galvanized Steel Baseboards, sold separately.
- Save hundreds of dollars on equipment and accessories when you purchase the Greenhouse System. We've done all the calculations for you. The size and quantity of items are determined by the size of your greenhouse.

Optional Single Door Kit
- Includes 36"W x 80"H door, complete with stainless steel hinges and latch and all necessary hardware for installation.

Optional Double Door Kit
- Includes heavy-duty double doors, each 48"W x 92"H, stainless steel hinges and latch and all necessary hardware for installation. Double Door Kit not for use with 14'W Greenhouses.

WARNING: Cancer and Reproductive Toxicity - P65Warnings.ca.gov ⚠

GrowSpan™ Round Pro Greenhouses are energy efficient, economical and ideal for the professional grower or backyard hobbyist.

- Frame is constructed from highest quality, triple-galvanized structural steel tubing.
- End frame is constructed from strong 16 gauge, 1.5" square, triple-galvanized structural steel tubing.
- GrowSpan Round Pro Greenhouse has polycarbonate ends and greenhouse film top covering.
- Available as stand-alone greenhouses or complete greenhouse systems.
- 8 mm twin-wall polycarbonate provides superior insulating qualities, offers reduced heating costs and comes with a 10 year warranty.
- Double-layer film covering, with Inflation Fan Kit, is manufactured using an outer layer of our Sunmaster™ 6 mil, 4 year Greenhouse Film and an inside layer of our Sunmaster™ Infrared Anti-Condensate Thermal Film that maximizes heat retention and offers excellent drip control. Poly latches are included.
- "Twist-of-the-Wrist" Roll-Up Sides make ventilation easy.
- Heavy-duty doors are 48"W x 92"H each and come complete with stainless steel hinges and latch. Optional Double Door Kit is also available.
- Heavy-duty ground posts are included with 20'W and 26'W units.
- Heavy-Duty Base Plates, that can be used on any surface and come with predrilled fastening holes, are included with 38'W units.
- During extreme heat, we recommend our SunBlocker™ Black Knitted 60% Shade Panels, sold separately, to eliminate heat stress and to ensure optimum plant growth. Ask your National Account Manager for details.

WARNING: Cancer and Reproductive Toxicity - P65Warnings.ca.gov

Clear, weather-resistant corrugated polycarbonate covering gives these greenhouses longer years of service.

- The 0.79 mm (0.031") corrugated polycarbonate sheets are light in weight, virtually unbreakable and come with a 10 year warranty.
- Panels contain UV inhibitors which prevent degradation.
- Built-in condensate control eliminates water droplet formation for a healthier plant environment.
- Sheets bend over 13' radius, quickly covering round style frame.
- Greenhouse frame is manufactured from 14 gauge, triple-galvanized structural steel tubing with 4' rafter spacing.
- End framing is strong 16 gauge, 1.5" square, triple-galvanized steel tubing.
- Heavy-duty, sliding double doors are 48"W x 92"H each and come complete with all necessary hardware for installation.
- Clear, corrugated sheets have up to 90% light transmission.
- Heavy-duty ground posts are included. We recommend a baseboard. Our Galvanized Steel Baseboards, sold separately, is ideal.

Optional Double Door Kit

- Includes two heavy-duty, sliding doors that are each 48"W x 92"H, and all necessary hardware for installation.

For Greenhouse System add SP for Propane or SN for Natural Gas to the end of your STK# to indicate your desired heater type. *Add S for Propane or SN for Natural Gas.

SLIDING DOUBLE DOOR KIT

STK#	EACH
105134	$629.00

GROWSPAN ROUND PREMIUM CORRUGATED GREENHOUSE SYSTEMS INCLUDE

Commercial-Grade Exhaust Fan with Shutters

DuroStat™ NEMA 4 Dual Voltage Thermostat Controls heating and cooling from 30˚F to 110˚F.

ValuTek™ Horizontal Airflow Fan

Modine™ Power-Vented Greenhouse Heater*

*High Altitude Kit is required at altitudes over 2,000 ft.

ValuTek™ Motorized Heavy-Duty Aluminum Intake Shutters

Get your family growing today or give your small business a boost with the GrowSpan™ Hydroponic & Gothic Greenhouse Package. With this package you'll be able to grow everything from large vine crops, like tomatoes or cucumbers, to smaller herbs, like basil and parsley.

The GrowSpan Hydroponic & Gothic Greenhouse Package comes with some of our most popular hydroponic products.

- If you like tomatoes, peppers, eggplant or other vine crops, you'll love the two HydroCycle H2-4 Micro Dutch Bucket Systems that we've included.
- There's also a HydroCycle 4" Pro NFT Lettuce System to grow green and leafy lettuce. These systems are great for hobbyists and commercial growers alike.
- You'll also find a 4' x 8' and 4' x 4' Propagation Float Station. The larger station has been used with success for growing pac choi, swiss chard, kale and more, while the smaller is great for fresh herbs, like basil, parsley, cilantro and more.
- We've also included a 2' x 8' Low Tide Tray that is great for seed propagation.
- With all of the plants you'll cultivate, you'll need a workspace and place to keep things organized and for this there are two 2' x 8' PolyMax® Benches.

You'll also have the option of including the GrowSpan Gothic Pro Greenhouse System.

- HeatStar Blue Flame Heater that comes in a model that runs on propane or one that runs on natural gas. Heater is not for use at altitudes above 4,500'. Cannot be sold in California. In Massachusetts, must be installed in compliance with CMR 248.
- ValuTek™ Direct Drive Exhaust Fan with Shutters promotes air quality and helps to remove condensation.
- DuroStat™ NEMA 4 Dual-Voltage Thermostat is an easy-to-use thermostat that allows you to keep your greenhouse at the proper temperature.
- ValuTek™ 12" Combo Air Circulation Fan is ideal for hanging from purlins in your greenhouse and promotes air circulation and quality.
- ValuTek™ Motorized Heavy-Duty Aluminum Intake Shutters can be used with thermostatic controls or manually and it helps to keep fresh air within the greenhouse.
- Net Pots are sold separately and Float Rafts can be sourced locally.

These packages can be housed in your choice of GrowSpan Gothic Pro Greenhouses or GrowSpan Gothic Premium Greenhouses.

- The GrowSpan Gothic Pro Greenhouse is covered by double-layer Sunmaster™ Greenhouse Film and is available with Roll-Up or Drop-Down sides.
- Our GrowSpan Gothic Premium Greenhouse is covered with polycarbonate for strength and durability.

GROWSPAN HYDROPONIC GREENHOUSE PACKAGE INCLUDES

HydroCycle Dutch Bucket System

PolyMax® Benches

GrowSpan Gothic Pro Greenhouse is featured to the right.

GrowSpan Gothic Pro Greenhouses and Systems are available with Solid Polycarbonate, Greenhouse Film with Roll-Up or Drop-Down Sides or Polycarbonate with Roll-Up or Drop-Down Sides.

- Frame is constructed from triple-galvanized structural steel tubing.
- End frame is constructed from strong 16 gauge, 1.5" square, triple-galvanized structural steel tubing.
- Available in Gothic Style with Polycarbonate Ends and Film Top with either Roll-Up or Drop-Down Sides, Polycarbonate Ends and Tops or Polycarbonate Ends and Tops with either Roll-Up or Drop-Down Sides.
- All greenhouses come with polycarbonate gable ends.
- Drop-Down Sides use our 5.2 oz. greenhouse fabric.
- 8 mm twin-wall polycarbonate provides superior insulating qualities, offers reduced heating costs and comes with a 10 year warranty.
- "Twist-of-the-Wrist" Roll-Up or Drop-Down Sides make ventilation easy.
- Double-layer film covering, with Inflation Fan Kit, is manufactured using an outer layer of our Sunmaster™ 6 mil, 4 year Greenhouse Film and an inside layer of our Sunmaster™ Infrared Anti-Condensate Thermal Film that maximizes heat retention and offers excellent drip control. Poly latches are included.
- Heavy-duty double doors are 48"W x 92"H each, and come complete with stainless steel hinges and latch. Optional Double Door Kit is also available.
- Heavy-duty ground posts are included.
- Baseboards are required for Drop-Down Sides. We recommend our Galvanized Steel Baseboards, sold separately.
- For added strength and durability, especially in heavy snow areas, we recommend adding our Gothic-Style Support Packages, sold separately.

GrowSpan™ Commercial Educator Greenhouse are available in a variety of lengths, making them ideal for research, education and other institutional facilities.

- Greenhouse frames are made from, triple-galvanized, structural steel for corrosion resistance, durability and long life in any location.
- These structures are covered with 8 mm Twin-Wall Polycarbonate which is clear, UV resistant and twelve times lighter than glass. 8 mm Twin-Wall Polycarbonate will not develop a film after long exposure to sunlight and carries a 10 year warranty.
- All GrowSpan Commercial Educator Greenhouses come with two ends. One end has a built-in 3' x 7' Premium Pre-Hung Single Greenhouse Door for convenient access.

Support passive ventilation and save money on a regular basis with this greenhouse guillotine vent.

- Allows air to naturally flow into greenhouses, creating a cooler environment with fresh air.
- Runs on a motor that allows growers to open or close the vent at any time.
- Quiet operation.
- Constructed from 8 mm twin-wall polycarbonate and an easy-to-operate motor.
- Can be installed on existing greenhouses.
- Support kit available for hanging insect netting.

Match these End Wall Vent Kits with an evaporative cooling system to create an environment where crops can flourish.

- Promote healthy airflow and consistent temperatures.
- These kits allow you to customize your GrowSpan growing structure to meet your exact environmental needs.
- Automated design reduces labor requirements and simplifies your operation.
- Easily integrate into GrowSpan S1000 and S2000 greenhouses.
- End Wall Vent Kits work great with our 8mm Twin-Wall Polycarbonate.

Inside

Achieve maximum ventilation with a high tunnel roof vent.

- Vent is constructed of a durable 8 mm clear polycarbonate twin-wall panel mounted on a sturdy, white powder-coated aluminum frame that measures 32" x 17". (Actual inside opening is 30" x 15".)
- Opens and closes automatically within preset temperature ranges.
- To maximize ventilation, the vent should be installed as high on the roof as possible.
- Place approximately every 15 ft. to 20 ft. to reach the ultimate effective roof ventilation.
- It is recommended that the cylinder from the automatic opener be removed during the winter months.
- Installation of panel may require some field framing to support panel if used in a nonrigid panel installation.

GREENHOUSE/HIGH TUNNEL AUTO VENT

107523	$199.95	$189.95

NEW Galvanized Steel Hip Board Kits offer an improved way to vent your structure with roll-up or drop-down sides, while increasing strength and rigidity for greater protection against wind loads.

- Steel hip boards provide an upgrade over traditional lumber when using sidewall ventilation on high tunnels, greenhouses and non-truss fabric buildings.
- Hip boards run length of the structure parallel with baseboards. These kits are ideal when used in combination with Galvanized Steel Baseboard Kits.
- Kits are offered in three different styles, including options for roll-up sides, drop-down sides or heavy-duty.
- Roll-up and drop-down options employ 2" galvanized hat channel backers.
- Heavy-Duty Hip Boards feature 2" x 3" galvanized tubing and flashing, making them ideal for particularly high wind areas. They are also compatible with both roll-up and drop-down sides.
- Hip boards come as a complete kit to outfit both sides of structure.
- Available in 12' length increments.

Univent Automatic Vent Opener keeps plants healthy.

- Allows solar-powered control of either top or side mounted window vents.
- Adjustable opening temperature of 60˚F to 75˚F and an 18" maximum opening.
- Soundless wax motor reacts to solar sensors, opening vent just enough, allowing for a quieter, morerelaxing environment.
- Works independent of power grid to continuously monitor greenhouse temperature.
- Recommended for use in temperatures up to 120˚F.
- Lifting capacity: 15 lbs.
- It is recommended that the vent cylinder be removed during the winter months.

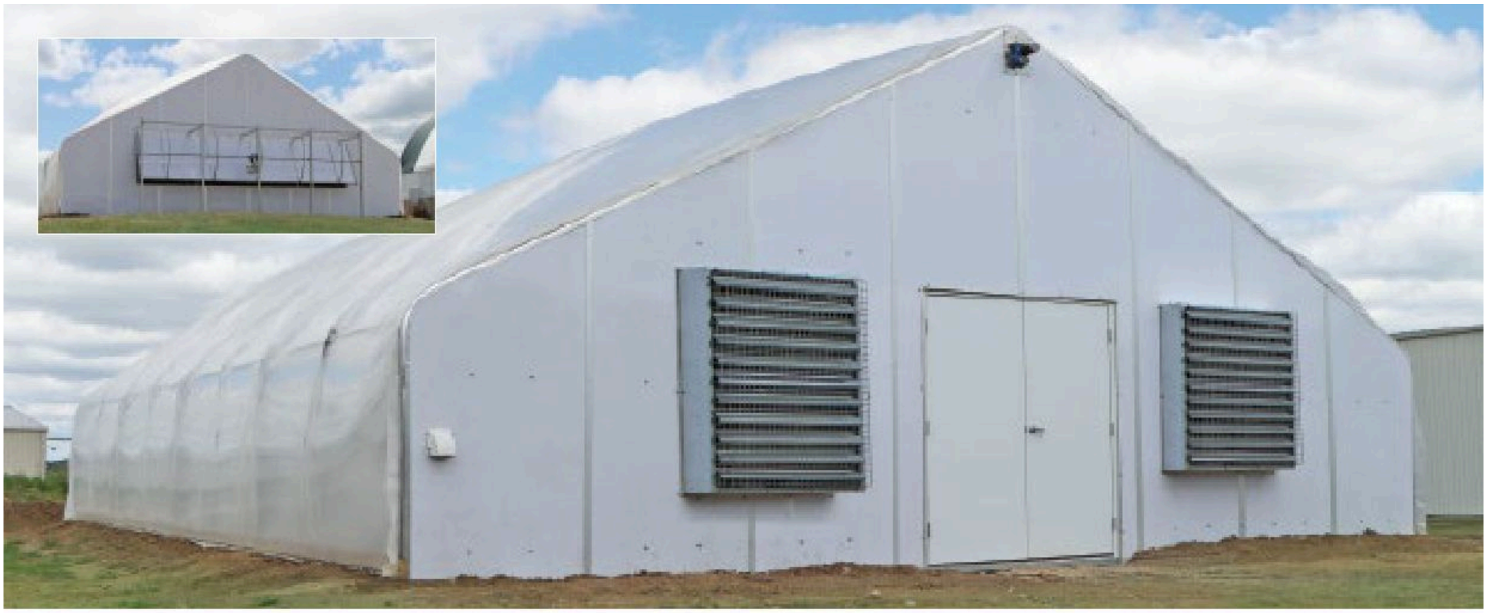
WARNING: Cancer and Reproductive Toxicity - P65Warnings.ca.gov ⚠



GrowSpan™ Series 750 Commercial Greenhouse is an industry game changer. This structure features a fully automated light deprivation system at a price point operations can't ignore.

GrowSpan™ Blackout System:

- Cost-effective automated light deprivation has never been this simple. This light dep system sits on a substructure within the greenhouse, and when in use, the blackout material ascends to the building's peak, creating total darkness in a matter of moments.
- The light deprivation system is cable driven and designed with fewer parts, so installation and maintenance are easier than traditional systems.
- The system is completely internal, so it's not susceptible to damage from wind or the elements.
- Optional Series 750 Equipment Packages are available.
- The greenhouse is manufactured with galvanized steel and designed for strength and resilience. Each structure can be engineered upon request for up to 25 psf ground snow load, 12 psf live load and 105 mph wind speed.
- Greenhouses are available at 32'W at a standard width, blackout width of 30' and lengths of 48', 72', 96' and 120'. It features a 16'H peak, 7'H sidewalls and a 6.3:12 roof pitch.
- Covered with inflatable film for improved insulation. End walls are white-black-white polycarbonate to provide superior energy efficiency and a clean, professional look.
- Includes double door.
- Option of lumber baseboard or galvanized steel baseboard. Baseboard sold separately. The Series 750 comes with hardware for lumber baseboard. Galvanized steel baseboard option does include the steel baseboard.

Series 750 Equipment Packages

- GrowSpan's Greenhouse Specialists have already sized out these packages, so growers are ensured to get the proper setup for their GrowSpan Series 750 Commercial Greenhouse.
- Equipment packages include two exhaust fans with centrifugally activated shutters and low-profile light traps, an evaporative cooling system and end wall vent with white-black-white cladding and horizontal airflow fans with hanging equipment.
- Evaporative Wall is 4' x 19".

Mounting equipment in your GrowSpan Series 750 is a simple task with this Equipment Mounting Kit.

- This kit is great for mounting addition lights, circulation fans, wiring conduit and much more.
- Each kit contains a 2 x 2 square chord and hardware that spans the internal rafters and is suspended from the peak of the 6 x 6 main structure by a threaded rod.
- The equipment mounting height is approximately 9' above ground level.
- Maximum recommended weight per chord is 150 lbs.

GrowSpan Lean-To Series 2000 Commercial Greenhouses offer an innovative solution to modern crop production, featuring a convenient design that allows you to position your growing structure next to an existing building, maximizing your usable space.

- Includes same features as GrowSpan's standard Series 2000 Commercial Greenhouse, but design is cut in half at ridge, creating an economical structure that fits neatly alongside buildings and helps growers with limited space harvest variety of crops year-round.
- Ideal for growers with existing buildings, educational institutions and hobbyists looking to produce crops of highest-quality.
- Greenhouse stands independent of building it is installed next to, but attaches with flashing to seal water out between structures.
- Designed with energy-saving, impact and UV-resistant 8 mm polycarbonate roof and sidewalls.
- Growers can choose between 10', 12', 15', 17-1/2', 20-1/2' and 25' widths. Heavy-Duty Base Plate and ground post mounting options are available, depending on individual needs.
- End Frame Kits and End Cladding Kits sold separately. End Cladding Kits available in 8 mm Twin-Wall Polycarbonate or Corrugated Polycarbonate.

GROWSPAN™ 10'W LEAN-TO SERIES 2000 COMMERCIAL GREENHOUSES

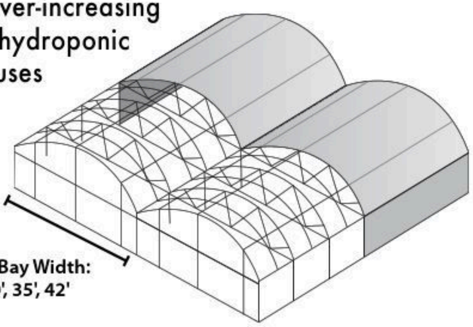
Custom gutter-connect options available.

GrowSpan™ Series 1000 Commercial Greenhouses were developed to meet the ever-increasing demand for economical production of vegetables and bedding plants, as well as hydroponic growing. Featuring galvanized-steel frames that ensure durability, these greenhouses are the most cost-effective, versatile and energy-efficient available.

- Choose between 21', 24', 30', 35' and 42' widths. Heavy-Duty Base Plate and ground post mounting options are available, depending on your needs.
- Extra-tall 10' side walls provide maximum usable space.
- The roof is made from double poly, and the greenhouse comes with an inflation kit for the sidewalls.
- Both sides of greenhouse comes with gutters.
- Arched-roof design minimizes snow, ice and water buildup.
- End Frame Kits are sold separately, along with End Cladding Kits, available in 8 mm Twin-Wall Polycarbonate or Corrugated Polycarbonate.



Options for Bay Width: 21', 24', 30', 35', 42'

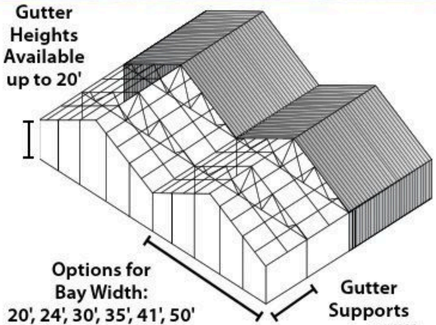
GrowSpan Series 2000 Commercial Greenhouses are the solution to the demand for modernized vegetable, bedding plant and hydroponic production. Designed to provide the optimal growing environment, these structures feature an energy efficient 6/12 roof design.

- Choose between 20', 24', 30', 35', 41' and 50' widths. Heavy-Duty Base Plate and ground post mounting options are available, depending on your needs.
- Extra-tall 10' side walls provide maximum usable space.
- Peak-roof design allows ventilation during almost all weather conditions. Optional end vent kits are also available for added ventilation. Ask your greenhouse specialist for details.
- 6/12 roof design minimizes snow, ice and water buildup and increases air flow for a more comfortable production environment.
- Energy-saving 8 mm polycarbonate roof, sides and end walls are impact and UV-resistant.
- End Frame Kits are sold separately, along with End Cladding Kits, available in 8 mm Twin-Wall Polycarbonate or Corrugated Polycarbonate.



Gutter Heights Available up to 20'

GrowSpan™ Manual Shade Systems are cable-driven, easy to operate and provide growers with a cost-effective alternative for improving greenhouse lighting and temperature control.

- Manual shade systems require less installation time and offer average of 30% cost savings compared to automated shade system of equal size.
- These systems are available as roof only profile and are designed for use with GrowSpan's Educator, Series 1000 and Series 2000 Commercial Greenhouses.
- Chain hoist operator hangs 13' and is controlled by hand to open or close curtain panels. Can be cut and adjusted if needed to provide optimal hanging height.
- Takes approximately 1/5 of time to fully open or fully close curtains compared to automated system.
- Operator can be installed anywhere along customer's choice of rafter.
- Systems come equipped with 40% shade material. Custom material options available upon request.
- Each shade system can be acquired with or without flashing.

MANUAL SHADE SYSTEM FOR EDUCATOR GREENHOUSES

STK#	SIZE	EACH	WITH FLASHING EACH
MCSH14X12	14'W x 12'L	$1,769.00	$2,065.00
MCSH14X24	14'W x 24'L	2,049.00	2,589.00

Reliable, low-maintenance Power Vent System includes durable rack and pinion setup for automated greenhouse ventilation.

- Ideal for new greenhouses, our Power Vent System can be customized for any size side, roof or end wall vents.
- Manufactured from high-quality components for long-lasting use.
- Single phase 115 V motor features a self-braking, worm-drive transmission and a patented integrated linear limit switch system.
- Make your system complete with one of our Link4 iGrow Controllers, sold separately.
- We offer all the components you need to create a custom vent system for your greenhouse. Call one of our greenhouse specialists to design your system today.

Recycled Plastic Lumber is the environmentally-friendly and maintenance-free choice for your next building project.

- Perfect for use in construction of tables, benches and fencing.
- Extremely durable. Will not rot, split, crack, splinter or need to be replaced after time like real wood. No need for painting, staining or waterproofing.
- Color goes through the entire piece and is protected by UV stabilizers, so there is no dramatic fading after exposure to the elements.
- Can either be nailed or screwed.
- For best results please predrill holes at least one size bigger.
- Color: Black.

Add 40, 50, 60, 70 or 80 to the end of the STK# for desired shade %.

Your profits are "made in the shade." Choose from Commercial and Backyard Shade Houses for immediate relief from the sun for plants, people and animals.

- Both Commercial and Backyard Shade Houses offer choice of shade cloth from 40% to 80% for tops, sides and gable ends.
- Frame is triple-galvanized structural steel tubing, for maximum rust and corrosion resistance.
- If desired, vary density of shade cloth from section to section.
- All sizes are high enough to allow heat to escape.
- Top comes standard with Shade House. Side panels and gable ends are available.
- Shade covers are manufactured from knitted polyethylene fabric that does not rot, mildew or become brittle.
- Shade panels are fastened to frames with 8" Snugger Tie-Downs.
- Anchor kits are available. Ask your National Account Manager for details.
- We can manufacture any size Shade House.

Backyard Shade Houses

- Sturdy 17 gauge, 1.315" OD, triple-galvanized structural steel frames.
- 10' rafter spacing for fast assembly and portability.
- Use for plants, shrubs, people and animals. Great for those hot-day outings.

Pull and Cut SunBlocker™ Knitted Shade

- Make your own panels.
- Great for "do-it-yourself" applications.
- Lightweight with high tensile strength.
- Can be cut without unraveling.
- Can be bordered with tape and grommets for extra durability.
- Highly resistant to UV degradation and temperature extremes.
- Effective odor barrier, as knitted panels capture the dust carrying particles that spread odor.
- Available in Black.
- When you custom order consider the application, percentage of shade needed, size (length x width) and finishes.

Prevent heat buildup and produce healthier plants in your greenhouse by reflecting heat and light with Reflective Shade.

- Reduce plant stress and improve the efficiency of your greenhouse ventilation system.
- Manufactured from coextruded white/white polyolefin film, Reflective Shade features a monofilament yarn structure for strength and long-lasting use without significant stretching. 60% shade is black/white.
- Provides solar reflection and cooling, as well as heat retention.
- Highly reflective white side limits light and heat transmission for more efficient greenhouse shading during the day.
- Ideal for use with our Heat Retention/Shade Screen Systems, sold separately.
- 5 year manufacturer's warranty.
- Can be bordered with tape and grommets for extra durability.
- Available in 30% to 60% shade.
- For indoor use only.

HydroCycle 4" Pro NFT Series

HydroCycle Pro NFT Series Channels are popular because of their ease of use, unique design, efficiency and versatility. HydroCycle Channels are available in different sizes to accommodate all types of hydroponic growing. Whether you are producing flowers, tomatoes, cucumbers, capsicum, microgreens, zucchini, strawberries, lettuce, herbs or larger leafy crops, there is a HydroCycle Pro NFT Series Channel for your needs.

- Manufactured to NSF-certified specifications for growing edible produce.
- Constructed from UV-stabilized, recycled plastics for long life, and features capping that is nontoxic and NSF certified for safe use.
- Contoured base centralizes nutrient flow and contoured lids allow excess water to run off.
- Simple construction provides maximum aeration to the roots.
- Lids remain secure in all conditions, yet are easily removed for fast, efficient cleaning.
- 20 year manufacturer's warranty against defective workmanship.

The most unique feature of the HydroCycle Channels are the removable, snap-on lids that puts you in complete control of your system's yield. Unlike most hydroponic channeling, which is produced in a one-piece hollow channel with regular holes cut in the top, our removable lid means:

- You can grow crops like forage or turf in open channels without the lid.
- You can quickly and easily cut holes in the contoured lid that will maximize your yield. By using the appropriate nutrients and watering regimes, you can bring your crops to maturity in minimum time frames.
- 4" Lids are 1.5"D and have 1" predrilled square holes, 8" on center. Lids have to be matched with the properly sized channel.
- 6" Lids are not predrilled.
- You have the option to grow different crops throughout the season by simply purchasing additional lids and changing them for your next crop cycle.
- Custom lids are available with a minimum order of 20,000 linear ft. Choose 1", 1.5", 2" or 2.5" holes with a minimum spacing of 4" on center. Ask your knowledgeable HydroCycle specialist for details.

HydroCycle 4" Pro NFT Series: 4"W x 1.5"D

Narrow, shallow channel is suitable for smaller-leafed varieties, such as herbs, "fancy" lettuce and more. Lids, Joiners and End Caps sold separately.

HydroCycle 6" Pro NFT Series: 6"W x 2.5"D

Ideal for "fancy" lettuce, herbs and other smaller-leafed varieties. Lids, Joiners and End Caps sold separately.

HydroCycle 9" Pro NFT Series: 9"W x 3"D

Versatile channel is suitable for large pots and ideal for the production of flowers, microgreens and animal fodder. End Caps sold separately.

Schedule 40 PVC Fittings, 1" x 1" SP x S Elbow (WF6682 & 111045)

- Use to connect End Cap w/Outlet to drain manifold.
- NSF certified.

HydroCycle 9" Pro NFT Deep Series: 9"W x 4"D

These extra-deep channels are ideal for tomatoes, capsicum, cucumbers and more.

WARNING: Cancer and Reproductive Toxicity - P65Warnings.ca.gov ⚠

The HydroCycle Hobby NFT Lettuce Systems produce lush, healthy produce on a year-round basis. These compact systems are an ideal option for the hobbyist looking to earn extra income from home or just grow fresh produce, the commercial grower trying to experiment with new crops or school agricultural programs.

- Consistently produce the tastiest and most profitable lettuce, herbs, leafy greens and more.
- The six week grow cycle allows each system to produce an average weekly yield of up to 12 heads of lettuce.
- Hobby Systems feature a small footprint that allows it to be effortlessly operated in garages, basements, hobby greenhouses, schools and more.
- Each channel is recommended to have seven 1-3/8" plant sites, which are spaced 8" on center, providing a total of 28 plant sites per system.
- Systems with 4" W Channels come with lids that have been predrilled.
- Channels and lids are constructed from UV-stabilized, recycled plastics that are capped with NSF-certified material. The removable, snap-on lids provide easy system maintenance.
- The frame is manufactured from 1" square tube, triple-galvanized steel pipe. Providing a long life in even the most corrosive environments.
- Systems come complete with nutrient reservoir tank, magnetic drive pro pump, air pump with air stone, as well as all the necessary plumbing, fittings and adapters.

HYDROCYCLE HOBBY NFT LETTUCE SYSTEM

STK#	SYSTEM SIZE	CHANNEL SIZE	NUMBER OF CHANNELS	LETTUCE SITES	EACH
115110	3'3"W x 5'L x 3'2"H	4"W x 2"D x 5'L	4	28	$ 909.00
115141	3'3"W x 5'L x 3'2"H	6"W x 2-1/2"D x 5'L	4	28	1,019.00

Grow lush, green lettuce and herbs hydroponically, no matter how small your space is. The four-tier HydroCycle Vertical NFT Lettuce and Herb Systems have a small footprint, allowing more growth in less space.

- Systems are available in 10' and 5' lengths with the option of twenty-four 4" Pro NFT channels or twenty 6" Pro NFT channels.
- On the 10' system using a six week cycle, growers are able to easily produce up to 4,680 healthy and profitable heads per year.
- 4" Pro NFT Systems come with lids that have been predrilled, while the 6" Pro NFT Systems come with lids that have not been drilled.
- Systems come complete with all the necessary components.
- To promote a high-quality yield, Gordan A-OK Starter Plugs, Nutrients and testers are recommended.

Light Kit

- HydroCycle designed light kits provide Vertical NFT Systems with even and effective lighting.
- Includes 6,500 K and 3,000 K T-5 full spectrum bulbs.
- Does not include wiring, junction boxes or timers.
- Light Kits are sold separately and need to be installed by a licensed electrician.

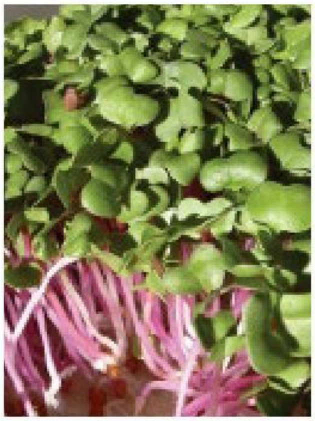
STK#	ITEM	EACH
112920	10' Light Kit	$2,559.00
115162	5' Light Kit	1,469.00

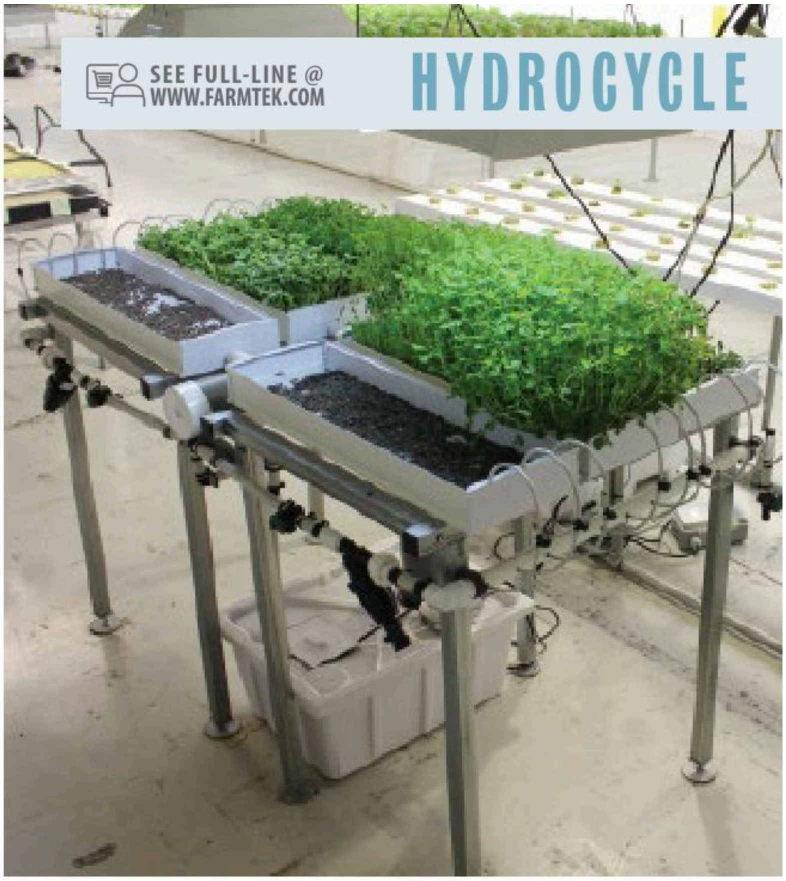
For beginning growers or professionals, the HydroCycle 9" Pro Microgreen Table provides the freshest and tastiest microgreens at the highest yields.

- The system utilizes a recirculating nutrient film technique (NFT) and allows for live-plant harvest and storing the greens with roots intact.
- Easy assembly, as well as less system maintenance, labor and waste compared to conventional growing.
- HydroCycle 9" Pro Microgreen Table provides 11-1/4 sq. ft. of growing space. Pea and sunflower shoots can yield 13 oz. per sq. ft. every 10 days, while mizuna, arugula, chard, beet and more can yield up to 6 oz. per sq. ft. every 14 days.
- 20 year warranty on the UV-stabilized, NSF-certified NFT channels.



HYDROCYCLE 9" PRO MICROGREEN TABLE

STK#	EACH
113532	$1,175.00



Provide your local market with fresh microgreens on a continuous basis. The HydroCycle Pro Vertical Microgreen System allows beginners or professionals to produce high yields of these in demand greens with ease.

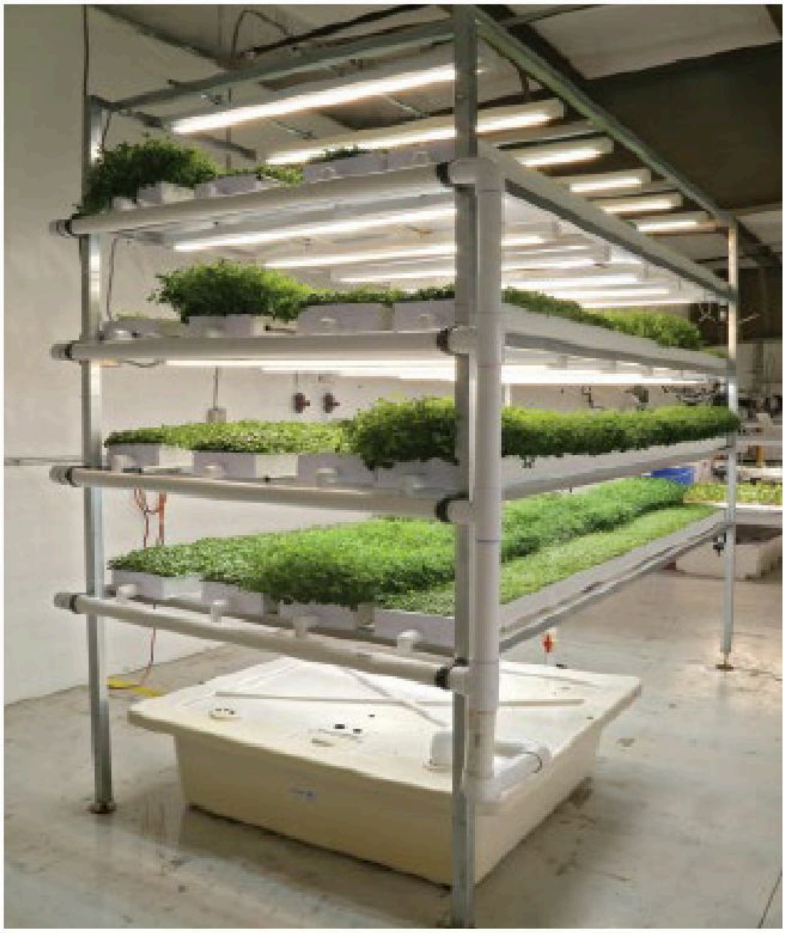
- HydroCycle Pro Vertical Microgreen Systems utilize a recirculating nutrient film technique (NFT). This allows growers to harvest living plants with roots intact, making it easier to supply customers with the freshest greens.
- Systems are outfitted with 16 large 9" NFT channels.
- Assembly and maintenance is simple. Compared to conventional growing, growers will experience reduced labor and waste, allowing harvests to be more profitable.
- Achieve high yields within a limited square footage. Pea and sunflower shoots can yield up to 13 oz. per sq. ft. every 10 days, while mizuna, arugula, chard, beet and more can yield up to 6 oz. per sq. ft. every 14 days.
- Features a 20 year warranty on the UV-stabilized, NSF-certified NFT channels.

HYDROCYCLE VERTICAL LIGHT KIT

STK#	ITEM	EACH
112920	10' Light Kit	$2,559.00
115162	5' Light Kit	1,469.00

HYDROCYCLE PRO VERTICAL MICROGREEN SYSTEMS

STK#	ITEM	DIMENSION	EACH
115276	5'L Microgreen System	4'3"W x 6'8"H x 4'10"L	$3,329.00
115277	10'L Microgreen System	4'3"W x 6'8"H x 9'8"L	3,885.00



Start hydroponic growing the easy way with HydroCycle Pro NFT Lettuce Systems. All components are specially designed or selected to create an ideal, complete NFT system for leaf/bib lettuce, herbs and more.

- Designed for a six-week grow cycle of leaf lettuce. Produce maximum yields in a small system footprint.
- Channel lids have up to eighteen 1-3/8" site holes, spaced 8" on center. Channels and lids are constructed from UV-stabilized, recycled plastics that are capped with NSF-certified material. Removable, snap-on lids provide easy system maintenance with minimal downtime.
- Table frame is manufactured from 1.315" OD, triple-galvanized steel for long life in corrosive environments.
- Systems come complete with nutrient reservoir tank, Magnetic Drive Pump for nutrient solution recirculation, Air Pump with Air Stone and all the necessary plumbing, fittings, adapters and more.
- Expect a yield of up to 2,340 heads per year with the 110830 or 113540 System and 4,680 heads per year with the 112251 or 113541 System.
- 112525 and 113539 are designed for a six-week grow cycle, with an average weekly yield of up to 12 heads of lettuce. Manageable systems for garden herbs, leafy greens and many lettuce varieties.
- 6" Pro NFT Channels lids are blank and do not come with predrilled holes. The number of lettuce sites suggested are with holes drilled 8" on center.
- We recommend our Growers Supply Greenhouse Light Fixtures, nutrients and Grodan A-OK Starter Plug Sheets, all sold separately.

PERFECT FOR HOBBY AND COMMERCIAL GROWERS ALIKE

Small system footprint ideal for setup in garages, basements, hobby greenhouses and more. Earn extra money growing high-quality lettuce and herbs in your home.

HydroCycle Commercial NFT Systems feature an improved design that significantly reduces labor and enables growers to increase yields by up to 48% in the same square footage as other commercial systems.

- Using these new, optimized systems, growers can produce more high-quality lettuce, herbs and other small leaf varieties than ever before.
- Each nursery channel is spaced 4" on center and offers 72 pre-drilled site holes, while finishing channels are spaced 7" on center and include 18 pre-drilled site holes. 4-1 ratio of finishing channels to nursery channels increases number of site holes available to growers, allowing them to maximize their crops per square foot.
- Single-piece channel design requires no end caps or gluing during assembly, creating a stronger, less labor-intensive system that helps growers save money and start growing sooner.
- Frame is constructed from galvanized steel to provide reliable support for growing channels, hardware and crops. New streamlined frame design further simplifies system assembly.
- A nutrient supply system provides a maximum efficiency pump and plumbing kits that come complete with NSF-rated PVC plumbing and fittings, white micro-tubing feed lines, valves, filter, hardware and 6" drain return system.
- Nutrient Mixing Tanks are crafted from FDA-approved resins to ensure safe storage of potable water. Meets specific gravity of 1.5 or 12.5 lbs. per gallon at 73°F. Light penetration is limited by green color, reducing algae growth.
- Tanks come with 3 year warranty from date of manufacture.
- 25'L NFT Cleaner System (118553) is 8" PVC pipe that mounts to greenhouse wall and alleviates the cleaning process between growing cycles, so growers can significantly cut down on labor time.
- To operate cleaning system, run individual channel down the pipe, letting power washer nozzle spray interior. System is operated by foot pedal that connects to power washer, giving growers total control over cleaning process. Power washer sold separately.

The HydroCycle Transport Cart is an adjustable, mobile utility cart that enables you to quickly maneuver NFT channels and more around your greenhouse or workspace.

- This multi-purpose rolling cart features four sturdy, fully adjustable racks that can be slid up and down with ease to help transport a variety of materials.
- Cart is constructed from galvanized steel tubing to provide exceptional strength and stability. Interlocking frame makes cart assembly quick and easy.
- Uprights on frame have holes spaced at 6" increments and offer 24" of working space.
- Each rack level can support up to 75 lbs. each and material up to 12' in length. Cart has total recommended weight limit of 300 lbs.
- Convenient offset design allows for material loading to be done all from one side.
- Designed with 10" pneumatic casters for greater maneuverability across all terrain types.
- 28"W x 74"H x 60"L.

HydroCycle 8' Vertical Aeroponic System

HydroCycle 8' Vertical Aeroponic Hobby System

HydroCycle Vertical Aeroponic Systems utilize unique grow tubes that support the flow of oxygen for rapid growth and a nutrient-rich mist for healthy plants.

- These compact systems are ideal for growth in tight spaces and maximum control of the root zones.
- Aeroponics deliver a high-pressured mist that delivers nutrients to the root zone.
- The 10" tube diameter gives the root zone maximum aeration that helps the plants to grow quickly.
- Each system comes with an air pump with ceramic air diffusers, Y-fit snap hook tube hangers, all the necessary plumbing and fittings and more depending on the system that is purchased.

HydroCycle 4'8" Vertical Micro Aeroponic System

- Approximately 20"W x 26"L x 73"H.
- Uses a single vertical grow tube that is 4'8"H and has 24 grow sites.
- System comes with a mag-drive pump and a 25-gallon nutrient reservoir.

HydroCycle 4'8" Vertical Mini Aeroponic System

- Approximately 29-1/2"W x 96"L x 75"H.
- Uses 5 vertical grow tubes that are 4'8"H and contain 24 grow sites per tube (120 total sites).
- System comes with a pressure utility pump and a 100-gallon nutrient reservoir.

HydroCycle 8' Vertical Aeroponic Hobby System

- Approximately 28"W x 39"L x 124"H.
- Uses a single vertical grow tube that is 8'H with 44 grow sites.
- System comes with a pressure utility pump and a 25-gallon nutrient reservoir.

HydroCycle 8' Vertical Aeroponic System

- Approximately 29-1/2"W x 96"L x 115"H.
- Uses 5 vertical grow tubes that are 8'H with 44 grow sites per tube (220 total sites).
- Comes with a pressure utility pump and a 100-gallon nutrient reservoir.

HydroCycle Hobby Strawberry Systems allow you to produce fresh, high-quality berries from home with ease on a year-round basis.

- These compact systems come in a kit and are ideal for hobbyists looking to grow at home, commercial growers wanting to experiment with a new crop or school agricultural programs.
- Each system has room to accommodate 24 plants in grow bags (118019), sold separately.
- Systems are 6'L x 56"W x 4'H and feature three 10"W x 80'L irragttion channels.
- Kits come complete with galvanized steel frame, irrigation channels, air pump and stones, water pump, timer for pump, reservoir and irrigation plumbing.
- Light Kits include LED light fixtures and framing to mount lights above existing system frame. Light Kit and timer for lights sold separately.

The Propagation Float Station provides a constant circulation of Aerated Nutrient solution to the raft float that is great for various plants and works especially well for propagating seedlings that need extended roots for Deep Channel Hydroponics.

- Allows for large root masses in plants, like tomatoes, cucumbers and eggplant, to grow long enough to reach the nutrient flow.
- Can also be used as a standard raft system to grow lettuce, Swiss chard, pac choi and more.
- Constant recirculation provides: constant mixing of solution to help prevent nutrient settlement, maximum aeration within the tank to not disturb root zones, more stable water temperatures and easy nutrient solution maintenance and testing.
- System includes: efficient and potable water safe magnetic drive recirculation pump, two outlet air pumps with stones and tubing, strong, 16 gauge, galvanized, square steel tubing frame with height adjustable feet for leveling, float tray, nutrient tank, bulkhead fittings and spacers and supply and drain tubing with flow control valves.

HydroCycle's versatile Dutch Buckets are ideal for both small- and large-scale hydroponic growing.

- HydroCycle Dutch Buckets are designed to be fed by drop emitters and plumbed to drain using a common 1.5" PVC pipe, purchased locally.
- Siphon Elbows, sold separately, regulate safety reservoir or nutrient solution at the bottom of the bucket to 1" deep. This feature prevents growing media from drying out and causing water stress between irrigation cycles. The Siphon Elbow prevents over accumulation of nutrient solution.
- Each Dutch Bucket requires two Siphon Elbows, sold separately.
- Your knowledgeable National Account Manager can help you design the best HydroCycle Dutch Bucket system for your needs with our recommended accessories. Our growing media and complete line of drip irrigation components are sold separately.

HydroCycle Dutch Bucket Accessories

Horticultural Perlite (111049):

Lightweight Perlite supports roots without crushing them. Provides aeration and drainage, yet retains and holds substantial amounts of water that is released when needed. One 4 cu. ft. bag will fill approximately eight of our 11-liter HydroCycle Dutch Buckets.

Grodan A-OK Starter Plug Sheet (111386):

Ideal for starting seeds and cuttings before transferring to Grodan Delta Gro-Blocks™. Ninety-eight 1.5" x 1.5" starter plugs per sheet.

Grodan Delta Gro-Blocks™ (111387 and 111388):

Sterile, lightweight and easy to use. Delta 4 Blocks each measure 3" x 3" x 2.5" and are ideal for smaller plants such as peppers and flowers.
Delta 6 Blocks each measure 4" x 4" x 2.5" and are ideal for larger, fruiting crops such as tomatoes and cucumbers.
Priced per strip.

1/8" SuperFlex™ UV White Polyethylene Tubing (110408A):

Ideal for use with drippers, dripper stakes and more. Sold only in 100' increments or full 1,000' rolls. Full 1,000' rolls are priced per ft.

Angled Arrow Dripper Stakes (110403 and 110407):

Available in 3-3/4"L and 6-3/8"L. Applying water directly to the growing media helps prevent the spread of diseases and creates a uniform, high-quality crop. Priced per stake with a minimum order quantity of 10 stakes.

HydroCycle Dutch Bucket Lids (115683):

Dutch Bucket lids provide protection from light and debris. They also reduce algae growth and promote proper temperatures. Sold in pairs.

WARNING: Cancer and Reproductive Toxicity - P65Warnings.ca.gov ⚠

For those looking to grow hydroponically within the home or in compact spaces, we offer the HydroCycle Micro Dutch Bucket System. Its modest footprint means that it can fit in just about any space.

- With dimensions of just 39"W x 35"L x 12"H, this is an ideal system for home growers or hobbyists.
- Great for growing vine crops, like tomatoes or cucumbers, and also peppers, eggplant and more.
- The Micro System includes four HydroCycle Dutch Buckets with siphon elbows, 3/4" supply tubing, 1/8" micro tubing, dripper stakes, micro tees, magnetic drive recirculating pump, air pump with air diffusers and a nutrient reservoir with lid and porthole cover.

Complete HydroCycle Dutch Bucket Systems do all the work for you. Systems come complete with all the components necessary to start growing hydroponically.

- 11-liter HydroCycle Dutch Buckets are durable and long-lasting.
- Easy Drain Reservoirs and Lids are BPA free and come with the systems.
- Heavy-Duty Digital Timers are ideal for worry-free operation.
- All plumbing accessories are also included.
- HydroCycle H1-10 System is ideal for the hobby grower. It comes with one row of ten Dutch Buckets and is a closed loop system.
- HydroCycle H2-24 System is a larger hobby growing system. It is made up of two rows of twelve Dutch Buckets and is an open system.
- Bench systems are sold separately.

HYDROCYCLE DUTCH BUCKET SYSTEMS

Our HydroCycle Whole Bay Dutch Bucket Systems simplify large-scale growing and allow you to hydroponically grow healthy and attractive plants.

- To grow the finest crops, this system utilizes concentrated fertilizer and nutrient solutions.
- The system mixes water in two tanks of fertilizerand then a Nutrient Batch Dosing System adds acid to maintain the proper pH.
- Woodpecker drippers and dripper stakes use a nutrient feed pump station to provide the plants with a nutrient solution. In order to prevent disease, any excess nutrient solution is treated as waste and drained.
- Each bucket has a siphon-designed drainage system and nutrient reservoir.
- Our production specifications are based off of tomato plants that are planted two per bucket with the buckets spaced 16" on center. Nutrients, spacing and watering can change based on plant type or variety.
- HydroCycle Dutch Bucket Row Kits allow growers to add a row of buckets to our existing systems.

If you're tired of bending over to tend to your Dutch buckets, you'll love these benches. The Dutch Bucket Low Profile Bench lifts your buckets to the perfect height, but its list of uses doesn't end there.

- Benches come with optional leveler feet that can add height to the bench and enable you to slope the bench.
- Great for any greenhouse need that requires a low-profile bench; you can create your own tiered display, display taller plants at eye level and more.
- Made from galvanized 1.5" steel tube and galvanized expanded metal. The benches have been constructed without welds to reduce the risk of corrosion.

Easily produce kale, swiss chard, herbs, lettuce and more on a year-round basis.

- These systems suspend roots in nutrient-rich water. This allows growers to fine-tune the solution to their plants' precise needs, ensuring the finest harvests.
- Maximize production, without overcrowding crops. Growers are able to layout the raft bed to best suit their needs. Plant sites can be arranged to provide plants with the perfect amount of space.
- Durable raft is made to last in any growing environment. The frame is constructed from 16 gauge, square steel pipe. The rafts are made from 1-1/2" Styrofoam, which also provides insulation. The bed is lined with 24 mil PolyMax®.
- The Raft Bed has a depth of 12.5".

HydroCycle Aquaponics Systems provide you with the opportunity to tap into two markets. While harvesting healthy vegetables, you can also raise valuable fish.

- Systems integrate both hydroponic growing systems and fish-producing aquaculture tanks.
- Aquaponics systems allow you to take advantage of essential biological functions. The fish fertilize the plants while the plants purify the water, leading to low-maintenance, cost-effective systems.
- Produce natural, pesticide-free products.

HydroCycle Pro Aquaponics Systems

- Systems ensure constant clean water for fish and plants. A two-stage filtration system maintains fresh water and utilizes a radial flow clarifier and a mineralization tank.
- The Pro System uses only one pump, so less energy is required compared to similar aquaponics systems.
- Systems come complete with all the necessary tanks, hardware and aeration supplies.

HydroCycle Commercial Aquaponics Systems

- This is the perfect professional system. It produces a steady stream of profitable fish and crops all year.
- Includes a grow-out system that uses a Hydrotech drum filter for solids removal. It is fully automated and utilizes gravity, minimizing the need for pumps and electricity.
- Systems come with a fingerling system for bioclarification and filtration. The fingerling system performs solids removal and some biofiltration. They are self cleaning, so they require minimal maintenance.
- Commercial Aquaponics Systems include all the necessary tanks, hardware and aeration supplies.

Bubble washed bead filter

Hydrotech drum filter

Pro System I (115295)

- Features an 8' x 8' raft bed.
- 168 lettuce sites.
- Can produce 90 lbs. of tilapia yearly.

Pro System II (115296)

- Features an 8' x 16'1" raft bed.
- 336 lettuce sites.
- Can produce 180 lbs. of tilapia yearly.

Pro System III (115297)

- Features an 8' x 24'3" raft bed.
- 504 lettuce sites.
- Can produce 288 lbs. of tilapia yearly.

Pro System IV (115298)

- Features an 8' x 32'5" raft bed.
- 672 lettuce sites.
- Can produce 520 lbs. of tilapia yearly.

Commercial System V (112667)

- Features two 8' x 48'8" raft beds.
- 2,016 lettuce sites.
- Can produce 4,000 lbs. of tilapia yearly.
- 128 sq. ft. of additional growing space.

Seed Soaking and Sanitizing Systems for the Fodder-Pro Feed Systems are available in both single and double-tank styles, depending on your needs.

- Tanks are manufactured from impact and corrosion-resistant 3/16" polyethylene and can withstand most temperature extremes.
- Tanks are 27" deep and have an 18" diameter. Tank height is 38".
- Slippery surfaces on the inside of tanks allow for seeds to easily slide down to the bottom of the tank toward the drain at a 45° angle.
- Tanks come with 3" gate valves for easy transfer of seeds from the Seed Soaking and Sanitizing System to the seed transport.
- Frames are made of galvanized steel to support the 30-gallon tanks.
- Aeration components are included for superior seed treatment.
- Systems come with lids that protect seeds from dust, dirt and other impurities.
- Tanks and lids both come in blue only.

Arable Acres Insect Sticky Traps are an effective addition to any integrated pest management program, attracting and trapping potentially harmful insects before they cause serious damage.

- These convenient traps allow for easy insect detection, monitoring and trapping. Ideal for greenhouses, field-grown crops, nurseries, florists and other indoor plant locations.
- Traps help growers understand pest pressure in real time and calculate population growth against harvest dates, so they can stay informed and eliminate labor, conserve sprays and protect crops.
- Grid pattern enables quick, easy and accurate size monitoring.
- Waterproof and mold-resistant design ensures traps can withstand adverse weather conditions and demanding agricultural settings.
- Sticky, non-toxic and odorless adhesive provides superior insect trapping.
- Special hue of yellow (118798 & 118800) attracts aphids, whiteflies, leafhoppers, fungus gnats, froghoppers and moths.
- Special hue of blue (118799 & 118801) attracts thrips and leaf miners.

HYDROCYCLE

High-quality, above-ground, vertical water storage and mixing tanks are ideal for general farm needs, hydroponic systems, rainwater harvesting and more.

- Variety of sizes available, perfect for many applications, including livestock water storage, hydroponic nutrient mixing tanks, aquaculture tanks, acid tanks and more.

52-Gallon Poly Tank

- Made of heavy-duty, polyethylene plastic, which is resistant to most chemicals.
- Flat-bottomed, cylindrical tank has straight sidewalls and is completely self supporting.
- Smooth sidewalls for easy cleaning and no sediment buildup.
- Depth: 30". Diameter: 22". Wall thickness: 3/16".
- Lid sold separately.
- 1 year manufacturer's warranty.

111134/ 111133

113720/ 113721

Norwesco Tanks

- Manufactured using resins that meet FDA specifications to ensure safe storage of potable water.
- Feature tie-down slots, built-in graduated gallon indicators, offset fill opening and a self-vented, slosh-proof lid.
- Impact-resistant, one-piece seamless polyethylene construction.
- Designed to meet a specific gravity of 1.5, or 12.5 lbs. per gallon at 73°F.
- Green color limits light penetration to reduce the growth of waterborne algae.
- 16" opening. 2" drain.
- 3 year warranty from the date of manufacture.

111157

111156

111158

Conical-Bottom Tanks

- Ideal for use in aquaponic systems.
- Cone-shaped bottom for total drainage. 45° bottom angle. (112736 & 115317 have a 15° angle).
- Conical-bottom, cylindrical tanks are made of 3/16" thick, blue, heavy-duty, chemical-resistant, polyethylene plastic. (115317 tank is 1/4" thick).
- Not self supporting. Frame sold separately.
- Lids sold separately.
- Optional window kit can be purchased for any size tank. Window piece is 28" x 18".
- 1 year manufacturer's warranty.
- Tanks may come in blue or black.

112371/ 112718

Service Weight Gaskets

- Available in three sizes, these gaskets are manufactured from EPDM material to withstand harsh sunlight and greenhouse environments. 1.5" and 2" Service Gaskets each require a 3" hole. 4" Service Gasket requires a 5" hole.

2" Mushroom Vent Cap

- Designed for maximum venting efficiency to compensate for positive or negative pressure buildup in a tank. All four sides meshed to keep insects and debris out of the tank.

Easy-to-clean Botanicare® Propagation Trays can be used with a variety of growing media. Large drain channels make complete and efficient drainage easy for the hydroponic grower.

- Manufactured from white 70% recycled plastic wrapped in a virgin UV-resistant capping. BPA free.
- Can be used with several types of media, including our Horticultural Perlite, Grodan Delta Gro-Blocks™ and Jiffy 7-C Coir Pellets.
- Low Tide Tray (111105) provides greater flexibility for greenhouses and grow rooms and is designed for large-scale top feed drip, run to waste, or recirculation systems. Features a 2" gully on each side for better drainage than single center drains. Ideal for use with our Standard 1020 Flats, sold separately.
- Create your ideal layout by connecting several Low Tide Trays (111105) using the multiple bulkhead ports.

Botanicare Pallet Rack Trays for vertical propagation allow you to get the most out of your growing space.

- These 4' x 8' trays are designed to be used with standard, 42"W x 96"L pallet racking, allowing you to maximize your overhead growing space.
- Stackable design enables you to reduce your growing footprint by up to 50%.
- Trays feature a trough that hangs over the edge of the racking. It collects and redirects runoff to reduce the occurrence of standing water.
- Pallet Rack Trays are an ideal option for large-scale propagation or microgreen production. They are large enough to fit 16 10"W x 20"L propagation flats, making it easy to grow a number of different crops.

Ebb & Flo Systems let you grow big in a small space. These systems provide an effective and automated method to deliver optimal levels of water, nutrients and oxygen to your crops.

- Available in four sizes, these systems increase growth rate, yield, nutritional value and flavor of your crops.
- Utilizing the ebb and flow hydroponic method, these easy-to-use systems are perfect for propagating plants or nourishing and watering seedlings.
- Each system includes submersible pump, nutrient reservoir, grow tray, ebb and flo kit and 16 gauge, galvanized, square steel tubing frame with height adjustable feet for leveling.
- Custom, poly-injection-formed replacement fittings are available, sold separately.
- Trays and reservoirs are manufactured from durable ABS plastic with built-in UV inhibitors that minimize fading and yellowing from grow lights. Trays include drainage channels. Reservoirs feature porthole covers that make monitoring and refilling your nutrient solution easy.

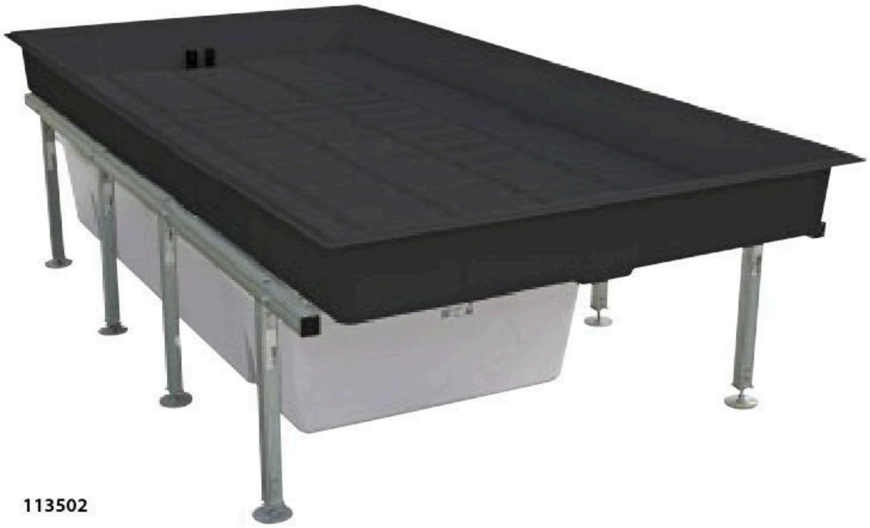
HYDROCYCLE

115555



113502

Allow your plants to reach their full potential by encouraging a healthy root mass with Hydroguard™.

- Hydroguard™ supplies plants with an isolated form of Bacillus Amyloliquefaciens, which canincrease root mass and health. Bacillus Amyloliquefaciens is particularly beneficial to hydroponic growing and can help to maximize plant yield.
- It works by breaking down organic materials and increasing nutrient availability.
- Hydroguard™ contains a minimum of 1.00 x 10^4 cfu/ml. It is 0.038% Bacillus Amyloliquefaciens and 99.962% inert ingredients.
- Contents are guaranteed for 2 years after the date on the package, but they should be used within 6 months of opening.
- Available in 1-quart and 2.5-gallons.

WARNING: Cancer and Reproductive Toxicity - P65Warnings.ca.gov

Reservoirs are an easy and effective way to store water for hydroponic growing.

- Available in 25-gallon, 40-gallon and 100-gallon capacities.
- Manufactured from durable, white ABS plastic. BPA free.
- Provides extra room for aeration and has a water level indicator on the side.
- Virgin UV-resistant capping wraps a 70% recycled plastic core.
- 1 year manufacturer's warranty.
- Built-in bulkhead ports on the front and side to accommodate pump lines and to allow multiple reservoirs to be joined in a line or side by side.
- Porthole cover is recommended.

Aeration System Components are vital for proper oxygenation and nutrient circulation of your hydroponic setup. Promote faster growth and healthier plants.

- Provide a constant supply of oxygen, as well as a steady current in your nutrient reservoir to ensure that nutrients do not settle.
- Ideal for all hydroponic systems, including NFT, float, ebb and flow, drip and aeroponics.

ActiveAqua Air Pumps (110725)

- 7.8 liters per minute. 3 W.
- Features silent operation with multi-level muffler.
- Special artificial rubber provides a steady air flow output and pressure that can be adjusted on multiple outlet models.
- Low power consumption.
- 4' power cord.
- 120 V. 60 Hz.
- Please note: Always keep your air pump above water level.

ActiveAqua Commercial Air Pumps (109258, 109259)

- Available in 70 liters per minute (60 W) and 110 liters per minute (112 W) models.
- High pressure and high output. Comes with multi-outlet divider (8 and 12) that can be opened or shut.
- Electrical magnetic air compressor in a high-quality aluminum alloy case, with wear and tear-resistant material for cylinder and piston.
- Provides quiet operation, long service life and very low energy use.
- Perfect to run multiple Air Stones at once.

ActiveAqua 6"L Pumice Air Stone/Air Diffuser (109260)

- Keeps root systems healthy while extending life of nutrient solutions.
- Provides uniform bubbles for air diffusion.
- 1/4" OD (air supply connection).

Sweetwater 3"L Air Stone/Air Diffuser (110077)

- High-quality ceramic is machined from a solid block of glass-bonded silica.
- Air Diffuser produces a uniform medium/fine bubble and is extremely resistant to clogging.
- Low maintenance—in most soft water applications, this Air Stone will not have to be cleaned for more than a year.
- Air Stone measures 1.5"W x 3"L.
- 3/8" OD (air supply connection).
- 2 year guarantee.

1/8" (110091) and 9/16" (WF1176) Clear PVC Tubing

- Use in combination as header tubing and air-supply tubing to provide aeration and nutrient circulation.

UNF Adapter Thread (109242)

- Use to prevent air and water leaks at tubing connections.
- 0.16 Barb x 10/32 UNF thread.

The Bluelab IntelliDose Fertigation And Irrigation Controller Kit automates nutrient dosing and plant irrigation for ultimate convenience and precision, so growers can achieve superior yields on a consistent basis.

- Intelligent control doses up to nine nutrients, additives and pH.
- Four (24 VDC) outputs available for irrigation if not used for nutrients.
- Proportional dosing rapidly adjusts between irrigation cycles, and with the ability to set alarms, growers can prevent overdosing or running dry.
- Sequential pump control allows time for additives to thoroughly mix.
- A versatile display enables readings in Celsius, Fahrenheit, pH, EC, CF and TDS.
- Features adjustable conductivity (EC) for day/night settings, as well as controlled water levels.
- Ideal for use with any growing method, like NFT, DFT/DWC, soil, media, drip and aeroponics.
- Remote monitoring feature allows data history cataloging, remote control and instant alerts via the Bluelab Edenic app (requires Bluelab IntelliLink and internet access).
- Controller kit comes complete with one IntelliDose controller, one IntelliLink device, three 120 ml peristaltic pumps, one set of 13'L acid tubing and two sets of 13'L nutrient tubing.

Portable, easy-to-use Bluelab Meters And Testing Supplies allow for comprehensive temperature, acidity/conductivity and nutrition data collection to help growers optimize plant health.

- Bluelab Meters and Testing Supplies are user-friendly, from simple calibration processes and easy-open sachets to convenient storage features and straightforward measuring.
- Operations can create the ultimate growing environment for plants with accurate information from Bluelab Meters and Testing Supplies.
- Useful features, like a replaceable pH probe, and a durable, shock-absorbent carrying case allow growers to use these tools for years to come.
- Combo Meter (119049), Meter Carry Case (119050) and Calibration Solution Mixed Sachet Box (119051) are easily portable and operable from anywhere.

Bluelab Combo Meter (119049)

- Three-in-one tool that measures pH, conductivity/nutrient levels (EC, CF, ppm 500 and ppm 700) and temperature in either Celsius or Fahrenheit.
- Completely portable and requires only two AAA batteries for power. The optional carrying case makes for easy transport, and the meter can also be used while stored in its case.
- A large, backlit display is easy to read in any light conditions.
- Replaceable pH probe is simple to swap out when the time comes, extending the life of the meter itself.
- Simple push button calibrators and successful calibration indicators, as well as Automatic Temperature Compensation (ATC), streamline the measuring process and help ensure complete accuracy.
- Includes a 6-1/2'L cable for hard-to-reach areas.

Closed

119050

119049

Bluelab Meter Carry Case (119050)

- A durable, firm outer case with zip closure provides protection and impact-resistance, while interior features secure the Combo Meter, probes and cables.
- Interior organization includes two pockets for probes, an internal strap to neatly store cables and a net pocket for the meter and strap.
- An adjustable webbed nylon carrying strap securely attaches to external 'D' hooks, allowing for worry-free transport and readings.
- This carrying case can also be used as a hands-free holder for readings.

Bluelab Calibration Solution Mixed Sachet Box (119051)

- This box contains individual sachets for care and calibration of pH and EC probes.
- Convenient quick-tear box is the ideal size for countertop storage and is an aesthetically-pleasing display for these easy-open, single use sachets.
- Mixed box includes:10x single use pH 4.0 calibration solution, 10x single-use pH 7.0 calibration solution, 5x single use 2.77 EC Conductivity solution and 5x KCl storage solution.

Easy-to-use testers are well built, reliable and will assist you in growing superior crops.

pH/EC/TDS/Temperature Monitor (117481)

- Designed for continuous monitoring of hydroponic nutrient solutions.
- A single amplified probe measures pH, temperature and conductivity (EC or TDS).
- Accurate measurements are displayed on a large LCD with plant-friendly green backlighting.
- An LED indicator warns when nutrient solution is out of the desired range.
- IP65 rated enclosure is designed to withstand harsh growing environments.
- Ambient light sensor features automatic LCD dimming.
- Calibration is simplified with a single-point pH and conductivity calibration solution.
- Provides automatic 30 day data logging with logs every 15 minutes.
- Data transfer via USB-C.

Combination pH/ORP Waterproof Tester (108254)

- Measures ORP for water ionization and chlorine sanitization.
- Automatic temperature compensation. Automatic calibration.
- Rugged housing is completely sealed against humidity and is designed to float.
- Comes complete with protective cap, probe removal tool, four 1.5 V batteries with BEPS (Battery Error Prevention System) and instructions.

HydroMaster Digital testers make monitoring water easier than ever by reading the levels that matter most and providing accurate readings that you can depend on.

Waterproof pH Temperature Tester (112507)

- Features as dual-level LCD, battery level indicator, replaceable pH electrode cartridge, stability indicator, automatic shut-off and automatic calibration.
- Floating, waterproof casing.
- pH Range: 0 to 14. Temperature range: 32°F to 176°F (0°C to 80°C).
- Comes complete with protective cap, electrode removal tool, three 1.5 V batteries with BEPS (Battery Error Prevention System) and instructions.
- Use solutions and cleaners (112506, 107673 and 112503).

Waterproof EC/TDS/Temperature Tester (112504)

- Detachable platinum electrode, adjustable TDS ratio, in °F or °C, automatic temperature compensation with adjustable b beta ratio, battery level indicator, stability indicator, automatic shut-off and automatic calibration.
- These 3-in-1 testers are unmatched in EC/TDS/temperature measurement and have a floatable, waterproof casing.
- EC range: 0 µS to 9,990 µS. TDS range: 0 ppm to 8,560 ppm.
- Temperature range: 32°F to 176°F (0°C to 80°C).

HydroMaster HM-500-pH/EC/TDS/°F Tester (113831)

- Tests pH at a range of 0 pH-14 pH, temperatures from 30°F-176°F, TDS from 0-9999 ppm and EC from 0-9999 µS.
- Stores up to 20 measurement readings, so you can monitor changes over time.
- LCD touch-type screen with auto back lighting.
- Powered by a rechargeable lithium ion battery.
- Features an alarm that has an adjustable set point.
- Automatically turns off after 5 minutes.
- Comes with mountable bracket, USB cable and wall adapter, 1 EC/TDS conductivity sensor and 1 pH sensor with storage solution bottle.
- 110 - 220 V.

⚠ **WARNING:** Cancer and Reproductive Toxicity - P65Warnings.ca.gov

Dolphin Pumps are designed and manufactured for maximum efficiency and minimum power consumption, allowing for cost-effective and worry-free operation of your hydroponic system.

- High-performance wet end designs.
- Continuous-duty, weather-proof motors and dual-sealed bearings.
- For fresh water applications only.
- For indoor or unprotected outdoor use.
- Anti-vibration pump pad and new super seal unions included.
- Corrosion resistant.

Premium Efficiency Diamond Aqua Sea 9250 (111146)

- High head, low current draw.
- 115 V, 50/60 Hz, 1 HP, 9,250 GPH.
- 1-1/2" supply and discharge.
- Comes with supply cord.
- 2 year manufacturer's warranty with 10 year free extended service guarantee.

Super Amp Master 7200 (111148)

- Designed to consume the lowest amount of energy per gallon pumped.
- Flow rates may be dialed back by a ball valve with no harm to pump. Electric current draw drops as flow is reduced.
- Super flow turbine-style impeller. Stainless steel crane seal for superior seal life.
- 115 V, 1/3 HP, 50/60 Hz, 7,200 GPH.
- 2" supply and discharge.
- Comes with supply cord.
- 1 year manufacturer's warranty with free 10 year factory service guarantee.

Aqua Sea Diamond 105000 (119017)

- Super-efficient high head, high-pressure/flow system pump.
- Built to consume the lowest amount of current for each gallon pumped.
- 115 V, 1-1/2 HP, 50/60 Hz, 10,500 GPH.
- Comes with supply cord.
- 1.5" supply and discharge.
- 1 year manufacturer's warranty and free 10 year factory service guarantee.

Dolphin Pump Accessories

True Union Swing Check Valves (111150 & 111153)

- Can be used with all water types.
- No metal, pressure or flow restrictions as found with spring check valves.
- Can be removed for cleaning and service.

1-1/2" Enclosed Intake Strainer (111154)

- Flexible poly base.
- Insert into 1-1/2" PVC fitting or 1-1/2" thin wall PVC pipe.
- Top diameter: 3.8". Bottom diameter: 4.71".
- Strainer height: 4.87". Overall height: 8.12".

2" Machine Slotted Intake Strainer (111155)

- Can be used for direct 2" intake.
- Comes with solid cap and 2" x 1-1/2" reducer bushing.
- Height: 11", including fitting.

EZ Primer/Strainers (111151 & 111152)

- Must be used in conjunction with Swing Check Valve when drawing water up an incline.
- Protects pump from debris that can clog or damage the impeller.
- Prevents noise from water cavitations in wet end, improving pump performance.
- Easy lid removal.

ActiveAqua indoor/outdoor Magnetic-Drive Recirculation Pumps are ideal for hydroponic systems, ponds and more.

- Available in 250 GPH, 550 GPH, 800 GPH and 1,000 GPH flow rates.
- Multi-use submersible pumps with powerful mag-drive construction.
- Removable foam filters and impeller included.
- Outlet fitting sizes:
  - 250 GPH unit—1/2", 5/8", 3/4".
  - 550 GPH and 800 GPH units—1/2", 3/4", 1".
  - 1,000 GPH unit—1/2", 3/4", 1".
- For indoor/outdoor use. Oil free and environmentally safe.
- 1 year manufacturer's warranty.

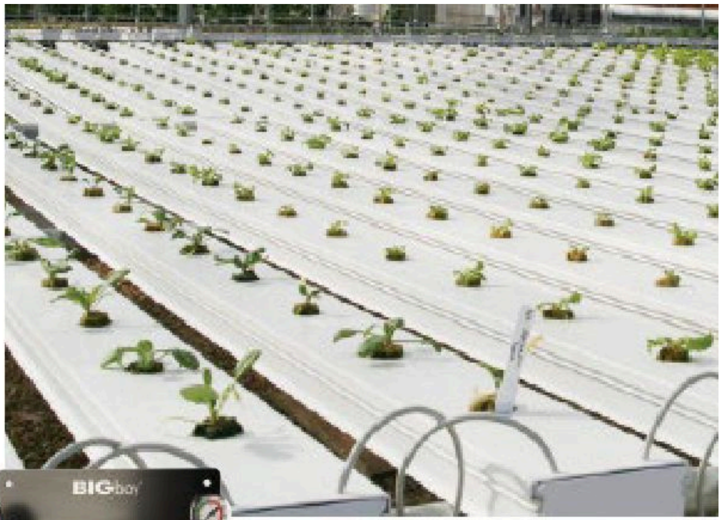
WARNING: Cancer and Reproductive Toxicity - P65Warnings.ca.gov



Maintain clean, nourishing water with products from HydroLogic Purification Systems.

HydroLogic Purification Systems provide a wide range of products to ensure the finest water for your hydroponic, aquaponic or aeroponic systems. HydroLogic Systems are environmentally friendly and energy efficient, helping growers save time, as well as money. These systems are completely manufactured in the United States using green technologies

Big Boy De-Chlorinator & Sediment Filter (115702):

Is an extra high-flow filter that has a rate of 7 gallons per minute or 420 gallons per hour. It filters 99% of chlorine and at least 95% of sediment, providing only the purest water.

Evolution-RO1000 (115703):

Is a high flow reverse osmosis system capable of producing 1,000 GPD or 42 gallons per hour of pure water. Removes at least 94% of all parts per million and includes a KDF/Catalytic Carbon Filter and two membranes to reduce chlorine, chloramines, iron, sulfur and heavy metals. Highly efficient model runs 1:1 or 2:1 waste to product ratio.

Pre-Evolution (115704):

Is a high capacity pre-filter for the Evolution-RO1000. It promotes the efficiency of the Evolution and requires little maintenance. Highly recommended for systems that use more than 150 gallons of water per week. It features a cleanable sediment filter that can be reused. Has a combination of KDF85 and KDF55 with an environmentally friendly catalytic carbon filter that reduces chlorine, chloramines, iron, sulfur and heavy metals.

Big Boy Green Coconut Carbon Filter (115686)

Big Boy Pleated Sediment Filter (115687)

Evolution-RO1000 Membrane (115689):

Systems require two membranes.

Pre-Evolution Cleanable Sediment Filter (115692)

1/2" Float Valve (115697):

Features a 1/2" barb and an adjustable water level. Made with stainless steel and PVC components.

3/8" Float Valve (115698):

Has a quick connect fitting and can be used on the Evolution-RO1000 or any other filter system with 3/8" tubing. It features an adjustable water level and can be mounted vertically or horizontally. Made with stainless steel and PVC components.

3/4" Float Valve (115699):

Is a heavy-duty and high-flow unit. It is non-corrosive and has a .48" orifice valve. It features an adjustable water level and is made with NSF approved PVC, stainless steel and rubber seals.

Netafim™ Hanging Fogger and Sprinkler Systems help growers automate their watering and humidity with increased uniformity.

- Uniform application increases crop consistency.
- Reduce labor costs, improve efficiency and plant quality.
- Affordable compared to other fog and watering systems.
- Simple installation and disassembly.
- Durable with fewer maintenance issues.
- Reliable check valves, ensuring systems turn on and off at the exact same time.

Netafim™ VibroNet Sprinkler

- Drip-less sprinkler prevents plant damage from water dripping.

Netafim™ SpinNet Sprinkler

- Wider spray pattern (up to 24') allows single line usage where two were once necessary.
- Mist Control design optimizes flow rate and sprinkler pattern.

Netafim™ CoolNet Pro Foggers

- Affordable fogging system produces finer droplets for quicker evaporation, resulting in higher humidity.
- Flow rate of 8.1 GPH at 60 PSI and has four removable nozzles for easy disassembly and cleaning.

Netafim™ Hanging Assembly with Stabilizer Weight

- Super Flex UV WhiteTM 4/7mm Polyethylene tubing is made from the highest quality plastics.
- Solid white for long-term durability while withstanding heat and harsh chemicals. Excellent UV resistance.
- Barbed end for insertion into Polyethylene Tubing Supply Line and a female connecter on the other end to attach the check valve and sprinkler/fogger unit.
- Stabilizer weight keeps sprinkler/fogger vertical.

General Hydroponics Nutrient Systems allows growers to invest in their crops and achieve superior production and quality.

- This comprehensive nutrient system helps growers boost growth in almost any environment.
- Provide precision feeding and consistency through every growth phase.
- Following the building-block method, the system combines nutrients in different ratios to create specialized mixes that increase control over plant development.
- Ideal ratio of minerals and balanced plant nutrition.
- Achieve premium results all year long.

Specially designed to compensate for deficiencies in some nutrient fertilizer programs.

- Prevents blossom end rot in tomatoes and peppers and tip burn in lettuce and cabbage.
- Protects against dry and withered flower and fruit sets, interveinal chlorosis, stunted growth rates and upward leaf curl.
- Increases cell division, plant tissue development and water, nutrient and carbon dioxide uptake.
- Produces more flower and fruit sets. Increases growth rates and crop maturity.
- Guaranteed analysis: 2-0-0. Standard-strength solution, 5 ml per 4 liters water, will achieve approximately N: 53, Ca: 84, Mg: 31 and Fe: 2.6.
- Ideal for hydroponics, soil growing and container gardens. We recommend using with our Jiffy-7C Coir Pellets, sold separately.
- Recommended for use with reverse osmosis water.
- Available in one-quart and one-gallon containers.

111171

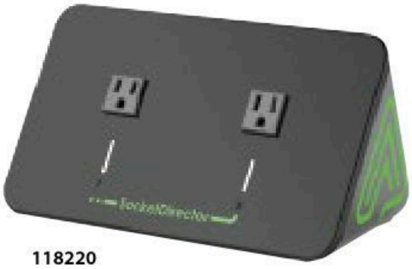
GrowDirector 3 PRO is an intelligent environmental control system powered by automation and advanced AI that is fully scalable and operated through a convenient app, simplifying growing and making it easy for operations to improve yields.

- Managed through free user-friendly app that can be accessed anywhere, anytime from phone, tablet or PC.
- This system helps prevent grower errors and enhances operations, leading to reduced labor costs, time and resource consumption.
- System comes as fully customizable package of wireless modules, sensors and software, so growers can choose what equipment they control.
- Growers can easily configure all automated routines, set highly customized working rules and use detailed data logging and analytics to track performance over time.
- Each module and sensor can function independently, in network or be integrated with other greenhouse software.

HydroDirector
118217

HydroDirector Module (118217)

- Ideal solution for hydroponic automation, allowing growers to regulate and maintain perfect water quality by precisely controlling levels of pH, EC, water temperature, DO and ORP.
- When used in series, growers can control up to 48,000 dosing pumps.
- Each module can handle 3 dosing pumps and 3 hydroponic sensors.
- Device includes 24 V power adapter, 3 built-in dosing pumps, 3 ports for sensors and mounting brackets.



118220

SocketDirector Module (118220)

- This appliance controller allows growers to automate and control multiple appliances that operate using alternating current (AC), without any need for manual input.
- Ideal for use with chillers, heaters, fans, air conditioners, compressors, irrigation pumps and more.
- When used in series, growers can control up to 32,000 electrical devices for seamless operation.
- Each module can handle 2 AC sockets.
- Comes complete with power cord, mounting brackets and 2 AC sockets for plugging in electrical devices.

DryContactDirector
118221

DryContactDirector Module (118221)

- This controller lets growers automate and manage multiple dry contacts with ease. Can accommodate either high-power or low-voltage devices and equipment.
- When used in series, growers can gain precision control over 64,000 electrical devices.
- Single module can handle 4 dry contacts.
- Each device comes equipped with 24 V power adapter, 4 dry contact channels and mounting brackets.

SensorDirector
118222

SensorDirector Module (118222)

- Greenhouse data management solution can be connected with IoT sensors to receive and analyze limitless plant data, allowing growers to obtain valuable insights on temperature, humidity, soil moisture and much more.
- Gain unprecedented visibility into health and performance of plants and make informed decisions to optimize growing conditions.
- Create separate finely tuned climate zones by using sensor data to configure climate control devices.
- When used in series, device can connect up to 64,000 IoT sensors.
- Each module can handle up to 4 sensors.
- Comes equipped with 24 V power adapter, mounting brackets and 4 ports for connecting IoT sensors.

118218

pH Sensor (118218)

- High-quality pH sensor measures acidity or alkalinity of nutrient solution used in crop production, helping growers maintain proper pH levels required for optimal plant growth and health.
- Sensor offers pH range of 0 to 14 and temperature range of 32°F to 212°F.
- Includes 10' industrial grade electrode cable.

118219

EC & Water Temperature Sensor (118219)

- Reliable sensor measures both electrical conductivity of nutrient solution and temperature of water, helping maintain ideal growing conditions at all times.
- Ensures growers' nutrient solution contains correct amount of dissolved salts and minerals required for optimal plant growth and health.
- Sensor offers EC range of 0 to 10 mS/cm and temperature range of 32°F to 212°F.
- 10' industrial grade electrode cable included.

118223

Air Temperature, Humidity & VPD Sensor (118223)

- Provides accurate and up-to-date information on conditions inside greenhouse or grow room, helping growers maintain optimal temperature and humidity levels.
- Growers can use data from sensor to adjust temperature and humidity, identify potential issues and take corrective actions as needed.
- Sensor offers temperature range of -40°F to 180°F and humidity range of 0% to 100% RH.
- Includes 6-1/2' cable.

Improve plant quality, while increasing production with Johnson Gas CO2 Generators. These generators automatically provide the carbon dioxide needed to meet maximum growing potential for only pennies per day.

- Easy to install in any greenhouse, without expensive duct work.
- CO_2 is diffused evenly throughout greenhouse. No supplemental fans required.
- Small size for easy movement.
- Constructed from high-quality steel for corrosion resistance and long life.
- Controls subject to rigorous testing during production to ensure safe and proper operation.
- Automatic gas shut-off in case of pilot failure.
- Based on one air exchange per hour, 1,500 ppm can be obtained per unit in a 4,800 sq. ft. greenhouse or an equivalent 50,000 cu. ft. volume.
- Transformer is required for operation and converts 115 V line voltage to 24 V low voltage current. Can operate up to three units with one transformer.
- 1 year manufacturer's warranty.

GROW ACCESSORIES

Link4 iGrow Controllers are the latest in greenhouse environmental automation. Control and integrate a variety of equipment in your greenhouse with one easy-to-use system.

- Precision controls allow you to improve crop quality and lower energy costs.
- Exclusive 2 year manufacturer's warranty and 24/7, 365 days per year support.

iGrow 800 Integrated Panels with Link 4 Standard (116417)

- The iGrow 800 Controller and a UL-approved contactor panel in one. Pre-wired units eliminate wiring errors in the field.
- Features an extra output, so instead of eight, growers can run nine different pieces of greenhouse equipment from this controller.
- Get all the benefits of the iGrow 800 Controllers, plus easier installation with reduced costs.
- Panel features a VC option for controlling vents and curtains, as well as the S module, which allows you to monitor your equipment from a computer, smartphone or iPhone.
- Comes in a Nema 4 enclosure, which is made from powder coated white steel.

iDrive 300 Motor Controller (112824)

- The iDrive 300 Motor Controller is compact, powerful and versatile motor controller designed to operate vents, curtains, 2 speed fans and other multi-function motor applications.
- Designed to work with nearly any industrial motor you'll find out there, the iDrive 300 gives you the ability to interface your motor to any common electronic controller, thermostat or manual control.

iDrive 150 DCP™ Dual DC Motor Controller (116252)

- Based off of the iDrive 300™, this controller features similar components and design, ensuring users get a controller of the highest quality.
- Several features make this controller ideal for DC motors, including voltage adjustments for line losses, IR compensation, torque controls and more.
- Single phase, 120 VAC and a 15A fuse to provide internal electronic protection.
- 24 VDC, which is variable from 0 - 36 VDC.
- Three wire limit switch design.
- Power relays.

iGrow 1800 Controller (117301)

- Ideal for large greenhouses and operations.
- The unit has 12 indoor outputs with expansion capability.
- iGrow 1800 special features include PC configuration, sensor back up, anticipatory heating and cooling and more.
- Multi button keypad allows the unit to be easily programmed and operated.
- Control capabilities include alarm via Linkconn software, heating systems, pumps, CO2 injectors, fans, fertigation injectors, lights, irrigation, louvers, vents, shade, cooling systems, fog systems and much more.
- The iGrow 1800 also has advanced settings that allow growers to set eight daily set points, flexible conditional controls, intelligent irrigation, start delays, advanced pump control, positive pressure control, user differentiated access control and daily light integral lighting mode.
- Linkconn software sold separately.

Link4 Controller Accessories

- Indoor Digital Temperature and Humidity Sensor (111142): Upgrade for iGrow 800 Controllers. Offers high precision for relative humidity and temperature readings. Housed within a protective shield that safeguards against radiation and reflected heat. Measures -30°F to 150°F and 0% to 95% relative humidity.
- Weather Station (112231): Get the most accurate reading of weather conditions right on your iGrow Controller. Includes high-precision sensors for light (0 to 2,000 W/m2), wind speed (3 to 175 mph) and direction (+/-2%), temperature (-30°F to 150°F) and rain (0.01"). Housed in specially designed enclosures and radiation shields, it is able to detect the most minute changes in weather conditions to full-blown storms.
- 112231 is compatible with 800 series controllers.
- iPonic D.I.S.M. Digital Integrated Sensor Modules effortlessly monitor temperature, humidity, CO^2 and light. This module comes with a 16 ft. cord to connect to our Link4 hydroponic controllers. 117762 connects with wiring through a junction box.

Allow your tomato plants to climb with the Easy Grow Cable Trellis Kit.

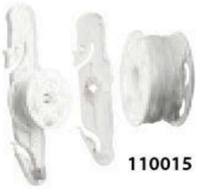
- Simplifies the management of your trellised tomato plants.
- This 132'L trellis kit can be paired with our longest HydroCycle Dutch Bucket System or cut down to fit smaller systems and shorter rows.
- Supports 350 lbs. of mature plants on a 12' run.

CABLE TRELLIS KIT FOR TOMATOES

STK#	EACH
113822	$36.95

Save trellising labor time.

- Designed to avoid slipping or jumping from the wire, this unique assembly enables smooth lowering with full control.
- Quick-release feature for the first 3 to 4 meters of twine.
- Includes assembly body and a 15 meter (49-1/4') spool of RollerPlast White Twine.
- Additional assembly bodies and twine sold separately below, in case quantities of 800 each.



TOMATO ROLLERPLAST ASSEMBLY

Hooks, Holders and Supports keep your vines healthy and prevent plant damage.

Two-Piece Radial Hook (110008):

Easy-to-use hook fits over wire with up to a 3.75 mm diameter. Intended for multiple season usage, this unique hook helps prevent plant breakage. Sold in bulk-packaged quantities of 100.

Flexible Arch Cluster Support (110005):

Intended for use during the cluster's flowering stage. Offers a support arch for the cluster stem. Aired support promotes better ventilation and helps prevent Botrytis fungus. Quick and easy to install. 6 mm wide. Sold in bulk-packaged quantities of 1,000.

Stem Holder (110016):

Ideal for difficult-to-manage stems and plants. Prevents drooping, bending and flopping, allowing plants to grow strong. UV protected. Long lasting. Sold in bulk-packaged quantities of 100.

Super J Double Cluster Support Hook (110017):

Unique design offers support and prevents damage to the cluster stem. Easy to use. Sold in bulk-packaged quantities of 100, boxed quantities of 5,000 or economical case quantities of 17,000.

Connect plants to trellis twine quickly and easily.

- Saves time and labor over other trellising methods.
- Aired clip promotes better ventilation and helps prevent Botrytis fungus.
- We recommend our RollerPlast White Twine (15 meter/49-1/4' spool) or our RollerHook® White Twine (32 meter/105-1/4' spool) to effectively hold clips in place.
- Ideal for tomatoes, cucumbers and other vine crops.
- Sold in bulk-packaged quantities of 1,000 clips.

WARNING: Cancer and Reproductive Toxicity - P65Warnings.ca.gov

Make your own greenhouse benches with our durable and economical galvanized wire mesh.

- High-tensile steel wire mesh with pure zinc galvanizing.
- Mesh pattern allows for greater light, better air circulation and improves heating efficiency.
- 1" x 1" mesh is 14 gauge and will hold 10" to 12" pots with 2 ft. supports.
- 1" x 2" mesh is 14 gauge and will hold 4" pots, 6" pots or 8" pots with 2 ft. supports.
- 2" x 2" mesh is 14 gauge and is great for flats and trays and is most economical.
- Easy drainage means bench stays dry and disease free, and there is no rust or rot.
- Roll length: 100 ft.

Bench on Wheels, in your choice of either white PolyMax® or expanded metal top, is ideal for greenhouses, manufacturing facilities, workshops, garages and more.

- Lightweight, extruded aluminum frame.
- 6" heavy-duty swivel casters allow for easy moving from one work area to the next, saving you time and money.
- Height: 35-3/4", includes casters.
- Assembly required.

Two great bench tops to choose from, depending on your application:

- 13 gauge expanded metal bench top has 1-1/2" x 1" diamond openings that allow for air circulation and water drainage. Hot-dipped, galvanized finish protects from corrosive environments.
- The indestructible white PolyMax® bench top is maintenance-free and weatherproof. Easy to clean, it makes a great addition to your workshop area.

Easily connected for quick expansion, Ebb & Flo trays provide various length options for greenhouse growers.

- End and middle trays are easily interlocked to expand and meet the needs of any greenhouse or grow room.
- Manufactured with durable ABS plastic with built in UV-inhibitors, which minimizes fading and yellowing from grow lights.
- Available in 4', 5' and 6' widths for both end and middle tray options.
- Quick valve feature allows for easy drainage.
- Sump options 117365, 116069 and 116072 feature a lower channel for natural drainage.
- Quickly seal with Ebb & Flo Tray Sealing Compound (116074).
- All of the 5' W trays (116068, 116069, and 116070) are 79" long.
- All of the 6' W trays (116071, 116072, and 116073) are 60" long.

These Three-Tier Greenhouse Benches were designed to facilitate propagation, allowing your crops to get a strong start.

- The Three-Tier Greenhouse Benches come with flood and drain trays.
- Ultra-durable construction allows these benches to withstand any growing environment. The frames are constructed from 1.5", 14 gauge galvanized steel and the 4" side rails are made from extruded aluminum.
- Corners are made from plastic, which eliminates hard, sharp corners and provides a finished appearance.
- Each tier features a continuous tray with a sump end for flood and drain operation.
- There is 25" between tiers, so growers have plenty of room to hang grow lights.
- The benches are 8'-3" tall and come with adjustable leveling feet.

Jump Start Heat Mats are able to provide uniform heating for hundreds of seedlings or cuttings at a time, so you can significantly improve germination and rooting.

- These heavy-duty, modular commercial heat mats allow seedlings and cuttings to thrive by warming root area 10-20°F over ambient temperature.
- Seedling Heat Mats (118820) can be daisy-chained with up to four modular add-on units (118821) to maximize growing area.
- Propagation Heat Mats (118822) can be daisy-chained up to nine times from primary mat, allowing growers to use just a single power outlet for ten propagation mats.
- All mats employ rugged, durable construction and include waterproof connectors to promote long lifespan.
- For added convenience, instructions are printed directly on mats.
- Plug into Jump Start Digital Temperature Controller (103648) to maintain optimal temperatures for specific crops.

Jump Start Digital Temperature Controller (103648)

- This digital thermostat allows for superior temperature control during germination and is compatible with all Jump Start Heat Mats.
- Digital display and LED mode indicator lights provide precision accuracy and greater ease-of-use.
- Employs water-resistant steel temperature probe.
- Controllable range from 68°F to 108°F.
- Features both Celsius and Fahrenheit read-outs. Press Up or Down button on controller to change.
- Comes with 3-prong grounded plug.
- 120 V. 1,000 W max.

High-domed, self-heating Hot House grows taller starts.

- Complete mini-greenhouse systemis designed for high-growing plants.
- Dual-vented dome is 6-1/2" high to provide plenty of headroom.
- 9"W x 19.5"L seedling heat mat, provides gentle, even warmth and controls humidity.
- Includes 11" x 22" watertight base tray, 72-cell seedling insert and instructions.
- 17 W, 120 V.

HOT HOUSE GROWING SYSTEM

STK#	EACH	3 & UP
112681	$56.95	$54.95

Built-in thermostat automatically activates cables when soil temperature is below 74˚F.

- Speeds germination and seedling growth, producing large healthy plants, ready for transplanting.
- Use indoors or out to get a jump start to your growing season.
- Dependable cables are covered with a tough, moisture-proof PVC jacket.
- All connections are sealed and waterproof.
- Available in three lengths. To determine which is best for you, match cable length to square footage of your planter.
- Team up with our Heavy-Duty Commercial Cold Frame to create your own hotbed.

The POPagation Station™ Plug Popper simplifies the transplanting process by dislodging fully rooted plugs from plug trays, helping you minimize damage and save on time and labor requirements.

- This convenient, portable system allows for greater transplanting efficiency, requires less force than other plug poppers and is easy to store when not in use.
- Two-piece system comprised of spring-actuated stabilizer frame (118246) and customer's choice of base board (118247 & 118248).
- When transplanting, use both handles on system to press top plate down, letting base board pins penetrate drainage holes of plug tray and dislodge plugs.
- Base boards are ideal for use with 128 Cell Plug Tray (113617) and 288 Cell Plug Tray (109045).
- Each base board also functions as dibble board for seeding.
- Materials can be easily sterilized, allowing system to be reused in quick succession.

Horticultural Perlite helps plants thrive and improves soil structure, keeping it workable for years. This inorganic mineral will produce healthier plants that require less labor and watering.

- Perlite provides aeration and drainage, yet retains and holds substantial amounts of water that it releases when needed.
- The water-holding ability of Perlite also increases the nutrient holding capacity when water-soluble fertilizers are used.
- Can be used by itself, mixed with topsoil or potting soil, or any other sterile media for drip or passive hydroponic systems.
- Lightweight Perlite does not crush fine stems or root systems, making it ideal for growing delicate plants such as lettuce.
- Chemically inert, does not deteriorate and has an essentially neutral pH.
- As Perlite is sterile, it is free of disease, weed seeds and insects.
- Nontoxic, safe and economical to use. One 4 cu. ft. bag will fill approximately 64 one-gallon nursery pots or eight of our 11-liter HydroCycle Dutch Buckets (115683).

Vermiculite allows growers to create a grow media that promotes healthy, profitable crops.

- Super coarse vermiculite improves soil's ability to nourish plants by improving its water retention and aeration.
- Vermiculite is a natural mica mineral that expands under extreme heat.
- Loosens soil, allowing roots to spread and grow.
- A great option for seed germination and cutting propagation.

Other Brand
Wonder Soil®

Wonder Soil® is an eco-conscious soilless biodegradable potting medium made from renewable coconut coir fiber, worm castings, mycorrhizae, kelp and water-saving polymer crystals. This medium maximizes growing success for both the professional and hobby grower. One truckload of Wonder Soil® is equivalent to 10 truckloads of loose soil!

- Available in a variety of forms and sizes for all gardening applications.
- This dehydrated, compressed medium will expand up to 7 times its volume when water is added.
- Reduces watering and fertilizing costs by up to 50%.
- Produces a soilless medium with a perfect balance of water-to-air ratio.
- Completely safe for use around children and pets.
- Produces stronger seedlings with larger root systems, as well as healthier transplanted and potted crops.
- Reduces soil erosion and compaction.
- Lightweight, easy to use and contains no fillers.

Earth Friendly Wonder Soil® Expanding Wafers:

Designed for smaller pots and seed starter cells, these wafers are formulated to promote faster germination and yield up to 40% more sprouts. Also ideal for boosting the soil of existing plants.

Wonder Soil® Reground:

Made from Wonder Soil® compressed sheets that have been reground into thousands of tiny expanding granules. Compact, lightweight and easy to use. The 5 lb. bag expands to 1-1/3 cu. ft., when water is added. The 25 lb. bag grows to 7 times its size. Reground is ideal for all planting applications and is amazing for rapid lawn repair when mixed with grass seed. Scoop is included. 112654 has shale and azolite added and is ideal for rooftop gardening. Be sure to stir and aerate the soil so it doesn't become oversaturated when adding water.

Wonder Bricks®:

Earth-friendly Wonder Soil® potting mix is compressed into brick forms for larger planting projects. Each brick weighs just over 1 lb., yet expands up to nine times the volume when water is added. Lightweight, compact and easy to use, each brick will expand to fill 2-1/2 one-gallon pots.

The SUSTEE Moisture Meter helps prevent over or underwatering by letting you easily monitor moisture levels.

- Sleek and minimal meter uses simple color scale to let growers know when plants need to be watered.
- Stick meter into soil at base of potted plant. Color in meter will change from white to blue within 20 to 30 minutes after watering.
- Blue color specifies that soil has enough water. White color indicates soil is in need of watering.
- Meter is compatible with potting mix, barkdust, peat moss and semi-hydroponic setups.
- Available in small, medium or large to accommodate pots of various sizes.
- For best results, replace core of meter every 6 to 9 months.
- Moisture Meter Core Refills (118227, 118228 and 118229) are easy to replace, made with 100% natural fibers and are fully biodegradable.
- Core refills come in packs of 2 and are available in small, medium or large sizes.

Monitor and test conditions of your soil with simplicity of use and accuracy.

Easy to read digital output measures soil pH instantly (117602).

- Instantly measures acidity or alkalinity level.
- Includes printed plant list.
- Product specifically designed to be used only in soil.
- Digital results from 3.5 to 9.0.
- Instructions and plant pH preference list included.

Instantly measure moisture in soil (117604).

- Monitors soil moisture at root level to prevent over and under watering.
- Easy to read digital output.
- Includes printed plant list.
- Designed and engineered in the USA.
- Product specifically designed to be used only in soil.

Monitor and maintain optimum conditions for your plants, flowers and vegetables.

Determines soil pH and fertility levels (103397).
- Fast results. Each test takes just one minute.
- Requires one AA battery, not included.

Take the guesswork out of gardening (103398).
- Easy-to-read dial, great for indoors and outdoors.
- Includes recommended pH ranges for over 350 plants.
- Allows you to alter your soil conditions immediately.

Grow healthy and thriving plants by maintaining correct soil moisture (103399).
- Instantly tells you moisture levels where it matters the most, at the roots.
- Helps prevent over/under watering.

RAPID TEST KIT FOR SOIL

STK#	EACH
117603	$15.95

Easy-to-use design with rugged construction to create the perfect portable light meter, especially in the field.

- The meter, which features an LCD screen, is attached to a light sensor via a 1.5 meter cable that ensures you never interfere with measurements.
- Housed in a durable, water-resistant body, making it ideal for use outdoors.
- Three different kilolux range options allow you to choose the best resolution (0.0001 to 199.9) for the environment being tested.
- Runs on a 9V battery that provides 200 hours of operation.
- Accuracy: +/- 6 percent of reading +/- 2 digits.

HI 97500 PORTABLE LUX METER

STK#	EACH
113900	$199.95

Ideal for the home gardener, professionals, in the classroom or in the field.

- Contains liquids and equipment to conduct 40 tests. Ten tests each for pH, Nitrogen, Phosphorus and Potash content.
- Includes complete instructions and recommendations to amend soil, based upon test findings.
- Packaged in durable, plastic carrying case.

Jiffy-7C Coir Pellets provide superior aeration and water retention.

Jiffy-7C Coir Pellets are made from 100% coco substrate that is purified and stabilized, are peat free and provide a superior, aerated rooting media. Wrapped within a biodegradable containment material, Jiffy-7C is based on the proven theory of "container and media in one." Stringent quality control guarantees that the physical and chemical properties of the coco substrate provide an optimum rooting environment. Jiffy-7C Pellets proudly carry the RHP certification, "Certified for Horticulture." Sold in bulk packaged quantities of 100. Priced per pellet.

BioStrate™ Rolls create an optimal growing environment for hydroponic microgreen production, absorbing and retaining water to allow for dense, healthy root development.

- These lightweight, biobased textiles are easy to use and ideal for producing microgreens, salad greens and wheatgrass.
- The felt's unique blend of biopolymers and natural fibers helps it manage water more efficiently for superior growth in a variety of hydroponic systems.
- Material comes ready to plant with no pretreatment required and maintains its structural integrity for the entire crop cycle.
- To use, simply moisten felt with mist or quick water bath, then let excess water drain and sprinkle seeds to desired density.
- Although rolls are compostable, they won't clog filters.
- USDA Certified Biobased Product.

Grodan Rockwool Plug Sheets help simplify the germination process and provide a high success rate, so you can achieve fast, uniform plant development.

- Suitable for a wide range of plants, these plugs are effective when growing everything from tomatoes to lettuce, flowers, aquatic plants and more.
- Grodan plugs have a highly uniform fibre structure and firmness, guaranteeing excellent distribution of water and nutrients and an optimum air to water ratio.
- Pre-drilled holes ensure that each seed remains in center of plug for balanced, uniform distribution of roots.
- Sheets are available in either AO (111386 & 116426) or AX Plugs (118775).
- AO Plugs are connected at top and tapered towards bottom. Recommended for use in a raft system, as the tapered base makes it easier to fit into the raft faster.
- AX Plugs are connected at bottom and tapered towards top. Recommended for use in an NFT system, as the wider base gives plugs more stability in gutter.

Achieve an optimum balance of oxygen to nutrients with Grodan Delta Gro-Blocks™ for rapid plant growth.

grodan
Delta

- Manufactured from rockwool substrate, these Gro-Blocks™ are completely sterile, lightweight and easy to use. Unique hydrophilic fiber makes crop production easy to control by allowing efficient use of water and nutrients.
- Ideal for direct sowing of our Grodan A-OK Starter Plugs, sold separately. When seedling roots coming out of plugs are 1" long, simply place plug in Gro-Block™ hole.
- Delta 4 Blocks are ideal for use with small plants, such as strawberries and peppers. Sold in strips of 8 blocks.
- Delta 6 Blocks are great for growing large fruiting crops, such as tomatoes and cucumbers. Sold in strips of 6 blocks.
- Perfect for use in ebb and flow, Dutch bucket and drip hydroponic systems.
- Priced per strip.

Jiffy® Easy Fill Growbags offer an effective, easy-to-use solution for growers in need of a container system with increased height.

- These convenient grow bags feature foldable top, which opens to create deeper container that supports enhanced root development.
- After adding water and nutrient solution, bags expand and are ready to be planted with any young crop.
- Ideal water-to-air ratio promotes higher yields and up to 90% water savings, while also helping to prevent diseases.
- Grow bags employ coco substrate made from 30/70 mixture of coir pith and husk chips.
- Substrate offers pH value between 5.5 and 6.5.

Soil Moist™ Fines mix with water to form a gel that adheres to plant roots and keeps them moist prior to planting.

- Highly absorbent polymer reduces irrigation frequency and transplanting shock.
- For best results, mix one pound of Soil Moist™ Fines with 20 to 40 gallons of water and let stand for 15 minutes.
- The longer the gel is allowed to stand, the better it will adhere to roots. Dip the plant or tree immediately before planting.
- One pound treats approximately 12,000 to 19,200 seedlings.

Suppress weed growth while allowing air, water and nutrients to pass through to plants. Excellent for short and long-term landscapes, annual or container gardens.

- Safely eliminate weeds while enhancing plant growth.
- Conserve soil moisture and promote healthy plant growth by eliminating competing weeds.
- Allows for the proper balance of air, water and nutrient exchange.
- Ground cover performs four significant functions: weed restriction, soil separation, reinforcement and filtration.
- Ideal for all residential and commercial applications.
- Easy installation. Conforms to the ground or trench surface and does not unravel when cut.
- Sold by the full roll only.
- Secure with our Biodegradable Fabric Stakes or our Fabric Securing Staples, both sold separately.

Polyspun Weed Control Fabric (108319-108321):

Polyspun polypropylene geotextiles are fabricated by sandwiching layers of fabric, which is then spunbonded for extra strength and light blockage. This 2 oz. fabric is hydrophilically treated to increase water flow. UV-treated for a longer life span, this fabric is ideal for use under bark, rock and organic materials to separate materials and provide weed control.

Spunbond General-Purpose Fabric (108322-108324):

Our Spunbonded polyester geo-fabric is a favorite with landscapers due to its strength and versatility. Highly resistant to acids, alkalines, insecticides, fertilizers and damage from insects. With its inherent UV resistance, this fabric is ideal for use as a patio or paver liner and will increase the life of the patio or walkway. Separates sand/aggregate from the soil to reduce shifting. This versatile 2 oz. fabric works well in many applications. Wrap around drainage pipes to keep native soil and silt from clogging drainage lines.

Standard-Duty Ground Cover (103797-103799, 103729, 103041-103042):

3 oz. per sq. yd. fabric is manufactured from UV-resistant, black polyethylene that has a long life expectancy. Marked every 12" for easy plant alignment, measuring and cutting.

Heavy-Duty Ground Cover (108196-108201, 118433-118434):

Premium, landscape-quality, black 4.1 oz., 30 mil woven, needle-punched fabric is manufactured from UV-resistant polypropylene. This durable, commercial-grade cover is the choice of most landscapers. Marked every 12" for easy plant alignment, measuring and cutting.

The Svensson White Lined Ground Cover is a perfect choice for indoor use. Its white color reflects light and provides support to plants of all kinds, making it the most-effective option.

- Made from 100% polypropylene, this cover is highly reflective and increases the amount of light that plants get, which can help to improve overall quality.
- This cover is strong, durable and can be walked on, all while weighing just 100 g per square meter.
- Maintains healthy soil by eliminating the growth of weeds, and with a water permeability of 10 l/m²/s, it still enables proper moisture levels.
- Cover has a clean, neat and appealing appearance that looks good in any greenhouse.

The Ecoturf Degradable Net Straw Blanket offers quality, eco-friendly erosion control for small to medium-sized seeding applications.

- Premium biodegradable netting is easy to install and disappears over time once grass grows.
- This contractor-quality solution comes in a more manageable, affordable size than other commercial blankets.
- Helps avoid having to cut commercial size blankets for smaller jobs and potentially wasting excess netting.

ECOTURF DEGRADABLE NET STRAW BLANKET

PolyMax® Polyester Grow Tubes increase growing yield and improve plant health while reducing crop maintenance, labor and food safety concerns.

- Grow larger, better quality produce quickly and effortlessly.
- Easy to plant and maintain hundreds of crops, including berries, tomatoes, lettuce, herbs, peppers and flowers.
- Ability to grow in areas with poor soil conditions. Perfect for urban gardening. PolyMax® Grow Tubes produce high yields in a small space.
- Modular design will fit any space. Completely scalable, just cut tubes to desired length and install on any surface.
- Polyester Grow Tubes offer smaller, tighter mesh that is ideal for weed suppression and sustaining irrigation systems.
- Grow Tubes are available in 5", 8" and 12" diameters, are priced per ft. and sold in 100' increments.
- Significantly reduce your labor and cost. Reduce weeding, tilling and soil preparation when using quality media.
- Polyester Grow Tubes do not let in airborne weeds, are cleaner and easier to handle, and retain more moisture, resulting in less watering.
- Allow an easy transition to certified organic production.
- Prevent direct contact with soil, maintaining a healthy and clean food source.
- Grow Tubes are reusable with original media. Pull out old plants or make new holes and reuse the tubes.
- Lay Grow Tubes on ground cover to further suppress weed growth while allowing air and nutrients to circulate throughout tubes.
- Grow Tubes are perfect for use with our Drip Irrigation Components, sold separately.

Shown with our Polypropylene Sand Bags (107339), sold separately.

Provide up to 8 degrees of frost protection and increase yields with low-maintenance FrostGuard Row Covers.

- Also ideal for overwintering container stock, and protecting plants from insects and other pests.
- Manufactured from 100% polypropylene, spunbonded with UV stabilizers for long-lasting use.
- Seams are sealed with UV-stabilized, hot-melt glue for strength and durability.
- Choose the degree of light filtration and frost protection for your crops and climate.
- Actual fabric life will depend on amount of exposure and intensity of sunlight.
- This product is intended for frost protection and is not designed to hold heavy snow or sleet.

FrostGuard Lightweight Row Covers (116027, 116010, 116011 & 116028):

0.55 oz. per sq. yd. Offers 85% light transmission and 2 to 4 degree frost protection. Ideal for frost-sensitive perennials and vegetables.

Frame It All™ Kits And Accessories are the perfect way to transform your landscape and start growing high-quality vegetables, herbs and flowers at home.

- Choose between Raised Garden Beds (118877-118896), Landscape Edging Kits (118914-118919) or Jumbo U-Shaped Walk-In Garden Kits (118902-118907) to design the ideal outdoor space.
- Composite boards feature textured finish that blends into any environment. Boards are made from 38% post-consumer food-grade safe recycled plastic and 62% sustainable hardwood fibers.
- Unlike cedar, these durable and low-maintenance composite boards will not rot, splinter or disintegrate over time.
- 5-year warranty on Raised Garden Beds, Landscape Edging Kits and Jumbo U-Shaped Walk-In Garden Kits.
- Optional Animal Barrier (118901), Cold Frame Greenhouse (118926) and Veggie Wall Trellis (118927) accessories help improve garden performance and offer increased plant protection.
- Composite boards are in the Classic Sienna color as pictured. An additional color, Weathered Wood, is available online.

Frame It All™ Raised Garden Beds (118877-118896)

- These modular kits offer an easy introduction to raised bed gardening, allowing users to extend their garden when they're ready by attaching additional kits at any time.
- With convenient snap-lock stacking brackets, these kits can also be added onto vertically to help insulate soil and create optimal growing conditions.
- Open-channel boards provide insulation by trapping air, keeping soil warmer in Spring and Fall and cooler in the Summer.
- Available in 4'W x 4'L, 4'W x 8'L and 4'W x 16'L to accommodate properties of any size.

Frame It All™ Landscape Edging Kits (118914-118919)

- Landscape edging kits can be arranged in countless ways to freshen up a landscape and improve curb appeal.
- Ideal for landscape edging, playground borders, creating pathways and more.
- Kits include anchor stakes, composite board and snap-lock anchor brackets, which simply slide and snap to lock securely to the board.
- Anchor stakes provide a tight grip to the ground, so edging stays put in any weather. Serrated stakes also keep borders from being disturbed by mowers or human activity.
- With additional boards and snap-lock stacking brackets, landscape edging can be stacked to create deeper borders or levels and cascading features.

Frame It All™ Jumbo U-Shaped Walk-In Garden Kits (118902-118907)

- These attractive, functional garden kits provide 112 sq. ft. of total planting area.
- Garden kit assembles in 12'W x 12'L sq. ft. location, with open area left for users to walk in between planters. Garden is also easily accessible from every side.
- Open-channel boards provide insulation by trapping air, keeping soil warmer in Spring and Fall and cooler in the Summer.
- Kits include composite boards, snap-lock stacking brackets and snap-lock 4-way bracing brackets for 2, 3 and 4 level walk-in beds.

Frame It All™ Stack & Extend Animal Barrier (118901)

- This animal barrier creates a customizable, animal-proof protection zone when growing plants and flowers.
- Each barrier kit will protect a 4'W x 4'L garden to a height of 2', which deters small animals, including rabbits, cats and dogs. With additional kits, users can expand protection zone or stack barriers to any height.
- Gated stainless-steel frame and heavy-duty rigid plastic mesh are built to last and won't flop, rust or rot, providing a longer-lasting solution than traditional deer fencing or garden netting.
- Easy-access gate makes it easy to tend to garden, without leaning or reaching.
- Connects to anchor or stacking joints in Frame It All™ Raised Garden Beds. For other applications, stake barrier directly into ground.
- Kits are easy to install and can also be integrated with the Frame It All™ Veggie Wall Trellis.
- 1-year warranty.

⚠ **WARNING:** Cancer and Reproductive Toxicity - P65Warnings.ca.gov

Frame It All™ Extendable Cold Frame Greenhouse (118926)

- When used in conjunction with Frame It All™ Raised Beds, these covers allow users to grow cold-tolerant crops well into the Winter months, as well as optimize growing conditions in Spring and Fall.
- Multiple units can be zippered together end-to-end, creating a continuous row of coverage to desired length.
- Zippered windows allow for easy access while tending to plants, as well as quick ventilation for temperature and humidity control.
- Powder-coated steel frame will not rust or corrode, and the heavy-duty PVC cover will stand up to heavy wind or inclement weather.
- Each greenhouse measures 4'W x 4'L and stands 36"H at its peak.
- Limited tools required for assembly. If needed, cold frame greenhouses are simple to remove and replace.

118926

118926

Frame It All™ Stack & Extend Veggie Wall Trellis (118927)

- This veggie wall trellis creates ideal growing conditions for vining plants and increases available growing space by up to 200%.
- Trellis increases airflow to vine crops, reducing chance of disease, while improving access to sunlight for faster growth.
- Eliminates the need for crouching or bending when tending to plants, making harvesting and plant maintenance an easier task.
- Constructed from durable stainless steel with nylon mesh that's strong enough to support heavy fruits and vegetables.
- Each veggie wall trellis contains two 4'W x 6'L panels, which provide 48 sq. ft. of trellis area.
- Connects to anchor or stacking joints in Frame It All™ Raised Garden Beds. For other applications, stake barrier directly into ground.
- Kits are easy to disassemble and store if users choose to remove during fall and winter months.
- 1-year warranty.

- Provide shelter for tender plants or harden off seedlings.
- Framework is constructed from 19 gauge, 1.05" OD, triple-galvanized structural steel tubing.
- Cover is made from our 6 mil 4 year greenhouse film that has UV-blockers, an anti-dust additive and comes with a 4 year warranty. Fabric clips included.
- Rafter spacing: 2'.
- During the warmer summer months, replace the greenhouse film with our SunBlocker™ Black Knitted 60% Shade or our Insect Screening. Ask your National Account Manager for more details.
- Ground posts are included.

Premium GigaVent Solar Vent Opener lifts up to 65 lbs.

- Constructed from long-lasting stainless steel, plastic and aluminum.
- Adjustable for different opening heights and mountable two different ways, taking up as little space as possible within your greenhouse.
- The volume-expanding wax within the hydraulic cylinder will endure any temperature (hot or freezing), working independently of the power grid for continuous temperature monitoring.
- Recommended for use in temperatures up to 140°F.
- 2 year manufacturer's warranty.
- It is recommended that the vent cylinder be removed during the winter months.

Modine® MEW Electric Washdown Heaters provide an innovative heating solution that's able to thrive in washdown and corrosive environments.

- These electric unit heaters are ideal for a variety of industrial and commercial applications in corrosive, dirty or wet environments. Users can select ideal model size, ranging from 3kW to 39kW.
- Heaters offer NEMA 4X protection against water penetration, ensuring a longer life in corrosive or washdown environments.
- 16 gauge stainless steel cabinet delivers industrial-grade durability, while other stainless steel elements provide added corrosion protection and improved heat distribution.
- Designed with thermally protected 1/2 HP motor that features permanently lubricated ball bearings. Epoxy-coated fan blade contributes to longer operational life.
- Includes stainless steel temperature high-limit controls for increased safety and dependability.
- 120 V controls allow for better contractor pull-in reliability.
- Suitable for non-hazardous locations only and in washdown applications using water pressure less than 70 psi.
- Each heater comes complete with stainless steel wall/ceiling mounting kit for highly flexible mounting options.

109306P

109308

109307

Safe, clean-burning heat for your home, greenhouse, shop or garage.

- Economical, 99.9% efficient heaters operate without electricity during power outages.
- Built-in low oxygen shut-off sensor for maximum safety.
- Easy-to-install heaters require no venting or chimney, and can be wall mounted or left freestanding. Feet kit is included.
- 10,000 BTU model includes low and high heat settings and piezo ignition.
- 20,000 BTU and 30,000 BTU models include factory-installed 110 V blower fan, thermostat and battery operated electronic ignition (one AA battery, included).
- The 10,000 BTU heater (109306P) is approved for bedrooms, but the 20,000 BTU (109307) and 30,000 (109308) heaters are not approved.
- Not for altitudes above 4,500'. Cannot be sold in California. In Massachusetts, must be installed in compliance with CMR 248.
- Available in natural gas or propane, except the 10,000 BTU model (109306P) which is available in propane only.
- CSA certified for use in USA. Cannot be sold in Canada.
- 5 year limited warranty.

Operate with steam or hot water and counter heat loss along exterior walls, especially where windows are present.

- Compact and lightweight, these units provide horizontal and downward air delivery.
- Steel top and bottom supply and return connections allow the unit to be rotated 360º without piping changes.
- Baked-on gray/green paint finish over rust and corrosion resistant steel ensures long life.
- Unique coil design offers uniform heat, ensures maximum control over air delivery and temperature.
- Balanced fan blades move air quickly and quietly with minimum power requirement.
- Totally enclosed motor is single phase with built-inthermal overload protection.
- Safety fan guard completely surrounds the fan, offering constant protection.

*Performance data for standard units at conditions of 2 lb. steam and 60°F entering air.

†Performance data for standard units at standard conditions of 200°F entering water and 60°F entering air.

Optimum performance, comfort and heating efficiency.

- Direct-driven propeller fan units, equipped with a two-stage fuel pump, are designed for horizontal delivery of heated air. Quiet, safe and automatic operation.
- Units require fuel oil grade No. 1 or 2, as specified by (ASTM) D396-73.
- Offers a reliable means of heating, particularly in areas where supplies of other fuels may be limited or not available.
- Recommended as replacements for obsolete heaters or as total heating applications in new buildings.
- Long life is ensured due to the roll-formed design of the heat exchanger, which is made from corrosion-resistant aluminized steel and contains a preformed ceramic fiber fire pot.
- The thermally efficient fire pot is lightweight, resilient and reaches operation temperature quickly.
- Designed for overhead suspension, all units are factory assembled, prewired, fire tested and UL listed.
- Ready to connect to single phase, 60 Hz, 115 V power and 25 V thermostat, fuel lines and vents.

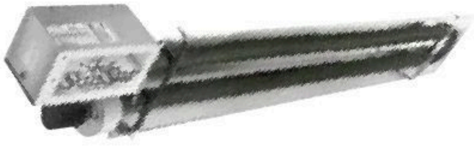
SunStar® Eclipse™ Compact Infrared Tube Heater provides an efficient source of radiant heat for a wide variety of hard-to-heat spaces.

- Reduce your fuel bills up to 50%.
- Heavy-duty combustion chamber with aluminum reflectors.
- Available in BTU/hour output ratings from 25,000 to 45,000 in either natural gas or propane.
- Compact size (overall length is just 9'2").
- U-Tube design provides uniform heat distribution.
- Installation as low as 8' above floor.
- Includes 36"L stainless steel, flexible gas connector.
- We recommend our DuroStat™ NEMA 4 Thermostat (CR2095), sold separately.



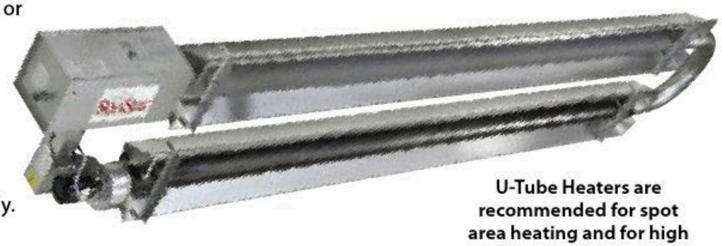
SUNSTAR® ECLIPSE™ COMPACT TUBE HEATERS

STK#	BTU/HR OUTPUT	EACH
106024	25,000	$795.95
106025	35,000	795.95
106026	45,000	$795.95

Add N (Natural Gas) or P (Propane) to the end of the STK# to indicate your desired heater type.

SunStar® Infrared Tube Heaters provide more uniform radiant energy distribution.

- 4" OD heat-treated aluminized steel combustion chamber makes these heaters ideal in corrosive environments.
- Choose from 6 BTU/hour output ratings, in natural gas or propane, Straight or U-Tube design.
- CSA design certified.
- Direct or indirect vented operation.
- 75 ft. sidewall venting and soft outside combustion air capacity.
- Direct spark ignition and 100% gas shut off safety control.
- Horizontal or angle mounting up to 45˚.
- Includes 36"L stainless steel, flexible gas connector.
- We recommend our DuroStat™ NEMA 4 Thermostat (CR2095), sold separately.



U-Tube Heaters are recommended for spot area heating and for high heat loss areas.

WARNING: Cancer and Reproductive Toxicity - P65Warnings.ca.gov

The Sensaphone® Sentinel Monitoring System is a reliable, cloud-based greenhouse monitoring solution that allows you to check on environmental and equipment status conditions from almost anywhere.

- Supervised internet connection ensures system is online and collecting data at all times, providing peace of mind.
- Can notify unlimited number of people by e-mail, text message or voice phone call in the event of an alarm.
- Simple, but powerful, web-based interface helps with managing multiple units, making programming changes and accessing status conditions.
- Accommodates up to twelve external sensors for reading temperature, humidity, power failure and more.
- Store sensor readings in "the cloud" to automatically protect against data loss and provide limitless information storage.
- Available with cellular modem (117890 – 117895) for use in locations where ethernet connection is unavailable.
- Offered with NEMA-4X weatherproof enclosures (117886 – 117895) for installation in wet or dirty environments.
- Temperature sensing range of -109°F to 168°F.
- Optional cloud-based subscription service sold separately through Sensaphone®. Available in monthly or yearly options.

La Crosse Technology Weather Stations allow you to stay on top of your work or business by providing detailed and essential weather information.

- Portable, compact stations fit just about anywhere.
- Clear, functional design with easy-to-read digital display.

Wireless Thermometer (116185)

- Displays indoor and outdoor temperature in Fahrenheit and Celsius and indoor humidity.
- Records HI/LO temperatures.
- Shows temperature trend indicators with time.
- Hang on a wall or leave freestanding.
- Features both a signal strength indicator and low battery notification.

116185

Digital Rain Gauge (118068)

- Dynamic, wireless rain station monitors temperature and humidity and can track over a year of rainfall records, allowing for more informed decision-making when watering lawn or garden.
- Designed with self-emptying rain bucket for labor-free tracking from the comfort of the indoors. After a certain amount of rainfall, bucket tips over and empties, then sends data to rain gauge to be displayed.
- Gauge offers customizable rain alerts and unique feature that visually represents elapsed time between rainfall.
- Rainfall readings include current, 1-hour, 24-hour, 7-day, month, year and total rainfall amounts.
- Rain bucket and included temperature sensor have transmission range of up to 330'.
- System has indoor temperature range of 32°F to 122°F (0°C to 50°C) and outdoor temperature range of -40°F to 140°F (-40°C to 60°C).
- Sleek, backlit digital display is easy to read and utilizes auto-dim feature that extends battery life.
- Signal strength and low battery indicators allow for easy maintenance of the entire system.

118068

Wireless Weather Station (113876)

- Indoor and outdoor temperature and humidity readings, as well as minimum and maximum records for both.
- Programmable temperature alerts.
- Displays six moon phases.
- Features a 12 and 24 hour time display and calendar.
- Alarm with snooze.
- Sensor signal strength indicator.
- Low-battery indicator.

113876

Professional Weather Center (117165)

- Displays hourly and daily forecast with six dynamic color icons.
- Temperature and humidity readings with customizable alerts and Hi/Lo records with time stamps. Indoor temperature range of 32°F - 99°F (0°C - 37°C), outdoor temperature range of -40°F - 140°F (-40°C - 60°C) and an indoor/outdoor humidity range of 10% - 99%.
- Features a wind sensor with a range of 0 mph to 111.8 mph (0-180 kph).
- Rain sensor reads accumulation from 0" – 393.6" (0-9,999.99 mm).
- Displays foliage changes seasonally.
- Features 12/24 hour time settings, a calendar that displays day, month, date and year, as well as a full day of the week display.
- Transmission can reach up to 400'.
- Station displays have 5 levels of adjustable backlight and programmable auto dim.
- Sensor and Wi-Fi connection indicator.
- Comes with full range adjustable kickstand, but can also be hung.
- Low battery indicator.

Multifan Horizontal Circulation Fans feature a compact design and offer a quiet, energy-efficient solution to indoor climate control.

- These effective HAF fans can deliver powerful air circulation on their own or be positioned one after the other to efficiently mix air over long distances.
- Ideal for greenhouses, barns, industrial facilities and more.
- Convenient design allows for easy poly air tube attachment and includes prepared suspension points for simplified installation.
- Fans are constructed from high-quality, corrosion-resistant materials to increase longevity and reliability in harsher environments.
- IP55 motor rating ensures water and dust resistance.
- UL rated for safety and quality assurance.
- 230 V fans (118771 & 118773) must be hardwired. 115 V fans (118772 & 118774) come with 9' power cord.
- Our hanging brackets are recommended for fan installation, sold separately.

Tri-Lite HVLS Fans are designed for industrial settings, and the high volume and low speed create a comfortable, enjoyable environment.

- HVLS Fans utilize Tubercle Technology™, which out performs traditional fans by providing stall angles as high as 22°, eliminating span-wise pumping, preventing tip stalling and cutting out unnecessary noise.
- Cost-effective unit limits power consumption.
- 3-blade design minimizes weight and maximizes efficiency.
- Features a reversible motor for updraft or downdraft.
- The 16' unit (116971) has a 1 HP motor that uses 368 W and has an area of influence of 60' diameter. The blades rotate at 68 RPM and provide 392 CFM/W.
- The 24' unit (116986) has a 1 HP motor that uses 621 W and has an area of influence of 140' diameter. The blades rotate at 57 RPM and provide 523 CFM/W.
- A Lenze Series Variable Frequency Multi-Function Micro Drive is required for the Tri-Lite HVLS Fans. They're available for 16' fans (118558) or 24' fans (118559) and have a simple user interface that provides performance and flexibility. With 16 programmable segments, auto tuning and impressive low-speed operation, these are the perfect VFDs.
- The Extension Rod (113884) allows fans to be dropped down an extra 4', and the Low-Voltage Controller (113885) provides easy and convenient control.

FANBOS HVLS Fans provide effective air circulation in workshop and warehouse applications, while also helping you save energy year-round.

- These high volume, low speed fans blanket large area by constantly moving air, creating expansive comfort zone.
- Six contoured aluminum airfoils produce maximum air movement.
- Choose between 5 speeds and forward or reverse with wall-mountable remote control. One remote can control multiple fans within 50'.
- 1/4" powder-coated steel and anodized aluminum chassis resists rusting and corrosion, even in cold and damp environments.
- DC motor ensures quiet performance and low operating cost.
- High speed CFM rating is 20,693.
- 120 V.
- Fans include 12" downrod mount. Longer 24" downrod (117897) available for use in buildings with higher clearances.
- Outfit fans with 1000 lumen, white LED light kit (117898) for additional lighting in warehouse or workshop.

Corrosion-resistant fans are ideal for wash down areas, livestock and poultry operations, horse barns and riding arenas, greenhouses, garages and warehouses.

- High velocity, indoor/outdoor fans circulate large volumes of air.
- Completely sealed motor is outdoor UL507 listed, the highest standard available today. Tested and rated for use with misting and fogging rings for both indoor and outdoor use.
- UL approved to the OSHA safety standard, except 111088, which has an open-style guard. 111088 must be mounted at least 7' above the ground.
- 3-speed, completely sealed and permanently lubricated ball bearings with thermal overload protection.
- Exposed screws and fasteners are stainless steel.
- 3-wing aluminum blades.
- Direct drive. Single phase. 120 V. 60 Hz.
- Comes complete with cord, plug and 2' pull chain.

Multifan Panel Fans are ideal for agricultural and industrial applications, providing exceptional air circulation and heat dissipation in even the harshest environments.

- These panel fans employ a durable design that allows for long-term operation in high-moisture, corrosive and wet environments.
- Motor is completely enclosed in aluminum and internal components are protected to Class-F, making fans suitable for use in ambient temperatures up to 140°F.
- IP55 enclosure offers dust, dirt and water resistance.
- Lightweight polypropylene impeller reduces wear on motor components to extend fan life cycle.
- Panel fans either have a back guard (117744) or both front and back guard (117745).
- Fan controller (117746) features a toggle switch to select between manual or automatic mode for easy and convenient control. Sold separately below.

The V-Flo Fan ensures excellent air distribution, but sets itself apart from other fans with some unique features.

- Special conical outlet is aerodynamically shaped to provide superior airflow and distribution.
- When compared to traditional fans, fewer V-Flos are required to evenly distribute air through the greenhouse or grow room.
- Creates a constant low airspeed and microclimate at the plant level.
- Helps control greenhouse humidity.
- The vertical airflow that V-Flow Fans provide helps operations reduce energy costs.
- Installation is easy with the V-Flo Hanging Set (116425).
- 120 V fan comes with a pre-wired cord, 240 V does not have a cord.

High-volume air flow and a wider air pattern make these fans ideal for poultry and dairy operations, warehouses and industrial applications.

- Fewer fans required means lowered energy costs.
- Maximum effectiveness in cooling both people and machinery in warehouses, keeping productivity levels high.
- One-piece, black polyethylene housing with UV inhibitors has long life.
- Easy to clean, and no corners mean no disease buildup.
- Heavy-duty, powder-coated, corrosion-resistant, multi-position support bracket, motor mount and OSHA guard.
- 3-winged, galvanized blades.
- UL-recognized, totally enclosed, maintenance-free, direct-drive, high-efficiency motors have completely sealed ball bearings, automatic thermal-overload protection and a 2 year warranty.
- Single speed, 1/2 HP, 14,300 CFM.
- Fan includes Multi-Position Hanging Bracket as shown.
- An optional Post Mount Bracket is available, ask your Account Manager for details.

NEW ValuTek™ Box Fans with Shutters pull stale air, heat, odors and some moisture out of indoor spaces, helping reduce airborne contaminants, improve air quality and enabling occupants to breathe comfortably.

- Heavy-duty fans are made from 18 gauge galvanized steel with 24 gauge side panels.
- Features removable, hot-dipped after welded, galvanized wire mesh guard.
- Employs industrial-grade aluminum shutters.
- Steel guard clips minimize noise.
- Designed with an energy-efficient single speed motor.
- Pre-lubricated, permanently sealed ball bearings provide thermal overload protection.
- Fans are hard wired and do not come with power supply cord.
- We recommend our Pig Tail Power Supply Cords, sold separately.
- Includes 2 year manufacturer's motor warranty.

WARNING: Cancer and Reproductive Toxicity - P65Warnings.ca.gov

Rugged polyethylene housing has UV inhibitors with durable shutters and poly vanes.

- 12" to 24" variable speed have noncorrosive plastic blades.
- Galvanized frame.
- 36" single speed has galvanized steel blades.
- Energy efficient.
- 115 - 230 V.
- Great for livestock and poultry housing.

Achieve maximum ventilation with a high-output Slant Wall Exhaust Fan.

- Helps control humidity, reduces disease and provides sufficient fresh air within your greenhouse, barn or warehouse facility.
- Heavy-duty, 18 gauge galvanized construction for durability and long life.
- 3-winged galvanized fan blade. 115724 features a 5-wing galvanized fan blade.
- Galvanized wire mesh guard with plastic guard clips that reduce noise.
- High-performance, industrial-strength aluminum shutters with tie bar to reduce shutter flapping.
- Energy-efficient, totally enclosed motor with automatic thermal protection.
- Single phase.
- Solid motor mounting for increased motor life and a quieter operation.
- Fans are hard wired and do not come with power supply cord. We recommend our Pig Tail Power Supply Cords, sold separately.
- 2 year manufacturer's motor warranty.
- Our DuroStat™ 2-stage, 2-speed corrosive environment thermostat (CR2031) is especially designed for use with 2-speed fans, giving precise, automatic control. Sold separately.

Multifan Galvanized Box Fans combine high air output with low energy consumption, making them an ideal solution for every ventilation demand.

- These aerodynamic exhaust fans ensure optimal performance and effective ventilation in a variety of spaces, including greenhouses, barns, industrial facilities and more.
- Compact design takes up minimal wall space and allows for easy installation and maintenance.
- IP55 motor is dust and water-resistant.
- Fans are resistant against UV-radiation.
- Can be combined with light traps to provide ultimate control in applications where daily light hours must be managed.
- High performance box fan (117798) comes equipped with cone, which reduces air resistance and offers increased efficiency in areas that require higher air volumes.
- 6-blade impeller fan (117799) is best suited to higher pressure applications.
- 3-year warranty on motor.

Remove and control condensation while improving air quality. These high-performance exhaust fans are designed for use in horticultural and agricultural applications, as well as factories, warehouses, garages, attics and restaurants.

- Highly efficient shutter style exhaust fans offer improved cooling and ventilation for superior air circulation.
- Rounded guard design prevents excessive vibration and adds rigidity for quiet operation.
- OSHA-spaced guards feature industrial gray polyester powder coating.
- Heavy-duty aluminum shutters have reinforced corners for increased reliability.
- Weather stripping on louvers provides maximum seal and prevents rattling.
- Sizes 12"-24" are pre-wired with 9' grounded cord. 115 V.
- 12"-20" fans are available in variable speed or 3-speed. 24" fans are available in variable speed or 2-speed.
- Motor type: TEAO, IP55 rating. Fans are UL 705 certified.

Breathable Wall Light Traps and our innovative Blackout Kits maintain controlled airflow in your greenhouse or grow room without sacrificing blackout environments.

The Breathable Wall Light Traps

- Ideal for any light deprivation needs.
- Allows for nearly 100% airflow, while blocking all light, creating a well-ventilated, blacked out environment.
- Enables you to build with blackout material. Section off rooms, create knee walls or use on exterior walls to prevent light from entering your grow space.
- Call one of our greenhouse specialists for custom sizes.
- This kit is available preassembled. To order an assembled kit, add A to the end of your STK#.

Blackout Fan Kit

- Includes Breathable Wall Light Traps.
- 113393, 113394, 115595 and 113419 comes with ValuTek™ Slant Wall Exhaust Fans. The heavy-duty fans are galvanized to fight corrosion and ensure a long life. The energy-efficient motor is completely enclosed and features solid motor mounting for quiet operation.
- 116114 utilizes the Canarm Exhaust Fan with Aluminum Louver. It features a totally enclosed motor and heavy-gauge aluminum blades within a rugged steel housing.
- This kit is available preassembled. To order an assembled kit, add A to the end of your STK#.

Blackout Shutter Kits

- Includes Breathable Wall Light Traps and adapter plenum.
- Comes with motorized Keenan and Meier 3100 Series shutters.
- Dependable and durable construction for a long life.
- Can be used for intake or exhaust, with either manual or thermostatic controls, which are sold separately.
- Includes a 120 V AC motor.
- 115424 & 115595 includes adapter plenum.
- This kit is available preassembled. To order an assembled kit, add A to the end of your STK#.

Effortlessly control airflow with durable 3100 Series Dampers.

- Aluminum back draft dampers are engineered for strength and durability.
- Flanged mount frame.
- Blades are sealed with full-length, vinyl weather stripping.
- Multiple sizes to suit your needs.
- A profile of 1-1/8" allows dampers to fit in just about any wall.
- 113906 & 113907 have a maximum airflow 2,400 FPM.
- Motors have a cable pulley, so no delay timer is needed for fan.
- 113906 & 113907 require two motors (115224).

WARNING: Cancer and Reproductive Toxicity - P65Warnings.ca.gov ⚠

Aquafog® Direct Feed Foggers are powerful, efficient and produce an ideal fog for humidification, evaporative cooling and chemical application in a variety of industries.

- These centrifugal atomizers employ a rear-feed blade system that produces billions of fog-like particles, which evaporate quickly in required space.
- Users can choose between Turbo XE-2000 Foggers, GT-500 Foggers and ideal flowmeter size, depending on coverage requirements.
- Ideal for humidification in almost fully contained areas, evaporative cooling in partially contained, ventilated areas and chemical applications in completely contained areas.
- Unlike other fog systems, these direct feed foggers can be hooked up to any water supply, including well or pond water, without risk of clogging. Units can also be fed using metering pump or gravity feed system.
- Simplified design means fans do not require nozzles, high-pressure pumps, compressed air or filtration, and also need little to no repair or maintenance. UV-stabilized components make fans suitable for outdoor use.
- Exclusive rear-feed blade design enhances reliability and performance, while the industrial grade, ABB Washdown-Duty Motor is designed for use around water.
- Included flowmeter panel has stainless steel composition and a clear, easy-to-read flow rate scale for streamlined monitoring.
- Able to be hung using two U-Bolts or universal hanging bracket.
- Select from applicable accessories for desired installation method, including ceiling mount (118858), wall mount (118859) or a 360° oscillator (118867).

Aquafog® Turbo XE-2000 Foggers (118853-118856)

- Turbo XE-2000 Foggers come standard with 20' of water line, a 12' power cord, user's choice of flowmeter panel, liquid-tight connector and 16' of drainage line.
- Atomizes up to 32 GPH and offers propulsion distance up to 35'.
- Greenhouse cooling coverage area: up to 2,500 sq. ft.
- Greenhouse humification coverage area: up to 3,500 sq. ft.
- Greenhouse propagation coverage area: up to 2,800 sq. ft.

Aquafog® GT-500 Foggers (118860, 118868 & 118869)

- GT-500 Foggers come pre-assembled with 30' of water line, 16' of drainage line, garden hose connector and user's choice of flowmeter panel.
- Hydrophilic, stainless steel front guard is designed to meet OSHA fan guard requirements and wick away water, helping to keep floors dry.
- Atomizes up to 15 GPH and offers propulsion distance up to 30'.
- Greenhouse cooling coverage area: up to 880 sq. ft.
- Greenhouse humification coverage area: up to 1,200' sq. ft.
- Greenhouse propagation coverage area: up to 1,000' sq. ft.

Aquafog® Fogger Accessories (118858, 118859, 118867 & 119209)

- Ceiling mount (118858) allows for simple and secure mounting to any ceiling surface. 36" horizontal length provides ample support and stability.
- Wall mount (118859) offers convenient mounting to wall surfaces and features adjustable height along its 30" vertical length. 21" cross support extends mount's reach and functionality by allowing fan to have 360° sweeping rotation.
- 360° oscillator (118867) provides steady, continuous movement for uniform coverage in interior applications. Sweeping action alleviates droplet collisions and fallout, while also enhancing air circulation.
- Turbo XE Water Solenoid Valve (119209) connects directly to the same power supply as fogger to automate water flow, enabling precise fluid control and operation. Compatible with Turbo XE-2000 Foggers (118853-118856).

AquaCool® Evaporative Cooling Systems are the most durable, dependable and easy-to-use systems on the market today.

- These systems offer a natural method of cooling and moisturizing the air.
- Available in twenty stock sizes to accommodate all needs. Custom sized systems are also available.
- Systems come complete with Evaporative Cooling Pad, aluminum distribution (top and bottom), aluminum end panels, 1/3 HP submersible sump pump and plumbing kit.
- Evaporative Cooling Pads are designed to achieve the most effective and efficient evaporative cooling possible. These corrugated, cellulose pads are crafted from 100% premium-grade, virgin kraft paper and offer maximum stability and long life. Consistent in performance, Evaporative Cooling Pads are highly absorbent and easily cleaned. Replacement Evaporative Cooling Pads are available below. Ask your National Account Manager about special truckload pricing.
- Proven to be one of the most cost-effective methods for maintaining proper growing conditions, healthy poultry, hog, dairy, livestock and warehouse buildings. These systems cost 50% less than traditional A/C systems, can be used anywhere and will cool the same sized area. You will see a 16° to 20° temperature drop.

Evaporative Cooling End Wall Framing simplifies installation.

- Holds evaporative cooling systems securely in place.
- Reduces installation time.
- Frames come sized to each specific system.

ORDERING: EVAPORATIVE COOLING SYSTEM

1. **Total CFM of Required Fans = Volume of Building x 1.3 (air exchange per minute).**
   To calculate building volume, use the following formula, remembering to add the gable area into the end wall area: Total Volume of Building = End Wall Area x Length of Building.
2. **Total Area of Cooler = Total CFM of Required Fans/400 (400' per minute).**
   To calculate the area of the cooler required, size the cooler by selecting a suitable height and length to equal the area. Round cooler size to even 1 ft. multiples in height and length.
   Reservoir size for coolers = 1 gallon per sq. ft.
3. Minimum water flow rate is 0.8 GPM per sq. ft. for 6" system.

Triple-C® Cool Cell Cleaner is a powerful, equipment friendly solution that's perfect for cleaning evaporative cooling systems and water walls.

- This fast-acting, environmentally friendly foaming cleaner helps avoid expensive pad replacement costs.
- Provides unique scrubbing action that loosens and removes scale, mineral and heavy metal deposits from cool cell pads.
- Cleaner won't harm cool cell pads, piping or delivery systems equipment and is chloride and chlorine free, greatly reducing potential for corrosion.
- Available in 1 quart bottle.

With PowerTwist Plus® you always have the right length V-belt.

- Combines extremely high strength with low stretch.
- Has the same HP ratings as conventional rubber V-belts.
- Unaffected by common agricultural chemicals, temperature extremes, abrasion and exposure to oils, grease, water, steam, solvents and fertilizers.
- Can be made up to the required length by hand, in seconds.
- Made from a high performance polyester/polyurethane composite material specially developed to handle tough drive conditions.
- With their special composite construction, PowerTwist® V-belts will outperform conventional rubber V-belts.
- Working temperature range of -40°F to 200°F.
- High resistance to abrasion and shock loading.
- Easy to install, without dismantling drives.
- Works in all standard V-belt sheaves.
- Can be twisted at a 90° angle.

These gas CO_2 generators improve plant quality, while increasing production by automatically providing the carbon dioxide needed to meet maximum growing potential for only pennies per day.

- Easy to install in any greenhouse, without expensive duct work.
- CO2 is diffused evenly throughout greenhouse. No supplemental fans required.
- Small size for easy movement.
- Constructed from high-quality steel for corrosion resistance and long life.
- Controls subject to rigorous testing during production to ensure safe and proper operation.
- Automatic gas shut-off in case of pilot failure.
- 1 year manufacturer's warranty.
- Based on one air exchange per hour, 1,500 ppm can be obtained per unit in a 4,800 sq. ft. greenhouse or an equivalent 50,000 cu. ft. volume.
- Transformer is required for operation and converts 115 V line voltage to 24 V low voltage current.

Create a healthier, more comfortable indoor climate.

- Properly humidified air increases comfort levels and maintains healthy levels of relative humidity, while decreasing levels of bacteria, fungus, viruses and mites.
- Ideal for greenhouses, propagation areas, egg rooms and hatcheries.
- Homeowners will enjoy energy cost savings, as well as added protection for fine wood furniture and floors.
- 120 V wall or duct-mount unit easily adjusts from 20% to 80% relative humidity, and is included.
- Capacity: 1 quart per hour/6 gallons per day.
- Made from durable, corrosion-resistant materials and comes with a 2 year manufacturer's warranty.
- Intended for residential home mounted to home heating ducts.

Efficiently cool your nutrient solution to keep algae growth at bay, maintain proper pH levels and grow cool-weather crops during hot weather with Teco® Water Chillers.

- Teco® chillers use high-performance technology to ensure maximum performance with low energy consumption.
- The Teco® air system provides improved performance by optimizing air exchange and utilizing a rotatable exhaust.
- A closed loop temperature control system provides premier accuracy and stays within 0.2°F.
- Chillers are housed in durable units made from high-quality materials. They are corrosion-resistant and a great option for use with or near salt water.
- The filter screen is magnetically affixed, so it is simple to clean, maintain, remove and install.
- Requires a recirculation pump, sold separately. Ask your knowledgeable National Account Manager which pump will work best for your setup.
- 113859 requires no heater. 113860, 113861, 113862 come with a built in heater, and 113863 and 113864 require a Heater Kit (110718), which is easy to install and includes a custom designed 400 W heater.

Air Distribution Systems are ideal for use with greenhouse tube ventilation systems. They offer an easy way to improve greenhouse air circulation and heat distribution.

- These units will temper the air in more sensitive environments, like those required for hydroponics.
- Circulating the air in a growing structure provides fresh air to plants, making roots healthier. It also decreases the occurrence of micro-climates in a greenhouse.
- Provides uniform air distribution throughout greenhouses, which helps to improve heating efficiency and uniformity, and can reduce disease and increase production.
- When combined with a separate exhaust fan, the system helps to dehumidify and provides a safe, gentle air exchange that won't harm plants in the cooler seasons.
- System can be automated with thermostats or iGrow controllers.
- Adjustable tube size, hole placement and hole size.
- Fans feature dual-voltage, totally enclosed, high-efficiency ball-bearing motors with thermal-overload protection. All fans are variable speed except for the 36" unit. Controllers are needed for variable speed operation and are sold separately.
- 12", 16" and 24" fans have polypropylene blades designed to deliver high volumes of air quietly and efficiently. 36" model has a high-performance, galvanized bade.
- Box intake chambers are made of galvanized steel for durability in greenhouse applications.
- Stainless steel jet fans will not rust and have 4" extensions to allow for the installation of vent tubing, sold separately.
- 115 - 230 V.
- Systems available for light deprivation greenhouses and applications.
- Kits include mounting hardware.

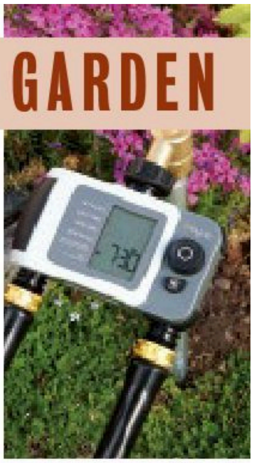
The Orbit B-hyve XD Smart Hose Timer turns your hose tap into a programmable sprinkler system in minutes, so you can optimize water flow to your plants, lawn, and more.

- With a two-port design, this convenient and effective smart timer lets users control water flow in two different areas at once.
- Hybrid device allows for manual programming directly on timer, locally via Bluetooth or through Wi-Fi using applicable Wi-Fi hub. Wi-Fi hub sold separately.
- When controlling timer via Bluetooth, users can manage watering schedules conveniently from an app on their smart device up to 150' away.
- By pairing timer with B-hyve Wi-Fi hub, users gain access to smart functions that further streamline irrigation, including automatic watering based on property attributes and local weather data.
- Rain delay feature makes it easy to skip watering of zones on rainy days, minimizing waste and the potential for overwatering.
- Waterproof design protects timer from exposure to the elements in outdoor locations.
- Runtime increments include hours, minutes and seconds. Operating temperature range is 35°F to 122°F.
- Smart timer is designed for a long life and can typically last a full season on just two AA batteries.



ORBIT B-HYVE XD SMART HOSE TIMER

STK#	EACH

The Gilmour 7 Pattern Watering Wand ensures ultimate control and comfort while watering hanging baskets and plants.

- This 34" wand offers seven different spray patterns for a wide range of watering options.
- All-in-one thumb control allows for easy adjustment of water flow, without hand fatigue.
- Zinc coupling provides added durability.

GILMOUR 7 PATTERN WATERING WAND

STK#	EACH
117773	$15.95

The MAXLite® Hot Water Rubber+® hose tackles both commercial and home, hot water jobs up to 165°F.

- Premium rubber hose is suitable for use in all weather conditions and maintains its strength, shape and flexibility at high water temperatures.
- Exclusive rubber formula makes hose 40% lighter and twice as strong as other standard rubber hoses.
- 400+ PSI burst strength delivers powerful watering.
- Patented Hose Armour® prevents kinking at the water source.
- Features extra-large, crush-proof aluminum couplings that can withstand being run over by heavy machinery.
- Meets lead-free standards under the Federal Safe Drinking Water Act.

Drain Stop Plus by Senninger® has innovative three-in-one design.

- Specially designed for overhead irrigation to prevent draining from applicators when system is shut down.
- Protects plants beneath applicators from damage due to overwatering.
- Allows lines to remain full to help expedite system start-up time.
- Unique 3-mode design. Twist dial to select: Check-Open-Closed.
- Easy-clean feature for debris removal.
- High-impact, engineering-grade thermoplastic construction for durability.
- Flow: 0.25 to 5 GPH.
- Minimum opening pressure: 13.5 PSI.
- Minimum closing pressure: 3.5 PSI.
- Maximum operating pressure: 50 PSI.
- 1/2" MNPT inlet x 1/2" FNPT outlet.

SENNINGER® DRAIN STOP PLUS

STK#	EACH	10 & UP
108010	$9.35	$8.95

Ensure that every plant in your irrigation system receives the same amount of water and fertilizer, regardless of location, for a uniform, high-quality crop. Netafim™ offers the highest level of technology available.

- Patented pressure differential system maintains uniform flow rate at different inlet working pressures, ensuring exact distribution of water and nutrients.
- Check valve feature in drippers ensures that irrigation lines stay full and do not drain into the lowest lying plants.
- We offer all of the pieces necessary to create your customized irrigation system. We recommend our 1/2" (110747A) or 3/4"(110741A and 111627A) Polyethylene Tubing, sold seperately, for use as your supply line.

Woodpecker PC & PC Jr. Drippers (110412, 110405, 110406, 110409, 110410, 110411)

- Turbonet™ Technology improves dripper performance by widening the tooth pattern and maximizing the flow path velocity, preventing contaminants from clogging the dripper.
- Available in three flow rates: 0.5 GPH, 1.0 GPH and 2.0 GPH.
- Manufactured from high-quality polyethylene. Color-coded bases for easy GPH recognition.
- Recommended operating pressure: 35 PSI. Recommended filtration: 155 mesh.
- Priced per Dripper. Each Dripper has a minimum order quantity of 10.

Dripper Shut-Off Cap (110404)

- Easy-to-install, snap-on cap lets you turn off irrigation at a specific dripper.
- Priced per cap, with a minimum order quantity of 10.

Manifolds (110402, 110400, 110401)

- Flat manifolds are ideal for field applications because the low-profile design and durable construction resists damage from field workers.
- Flat 2-Way Manifold (110402) allows for two dripper stakes. We recommend combining with our 1.0 GPH Woodpecker PC Drippers.
- Flat 4-Way Manifold (110400) allows for four dripper stakes. We recommend combining with our 2.0 GPH Woodpecker PC Drippers.
- Combine Stackable 4-Way Manifold (110401) with Flat 2-Way or 4-Way Manifolds to create additional configurations.
- Priced per Manifold. Each Manifold has a minimum order quantity of 10.

SuperFlex™ UV White Polyethylene Tubing

- Available in 1/8" (110408A) and 1/4" (111046A).
- Ideal for use with drippers, dripper weights, dripper stakes and spray stakes on trees, shrub beds, potted plants and hanging baskets.
- UV and acid-resistant polyethylene resin material withstands the extremes of hot and cold weather much better than vinyl.
- Compatible with all brands and models of drippers that accept either 1/8" or 1/4" micro tubing.
- Reflective, opaque white tubing prevents the growth of algae and produces cooler water temperatures, enhancing plant growth.
- Sold only in increments of 100' or full 1,000' rolls. 1,000' rolls are priced per ft.
- Barb Connector, Barb Tee and Micro Valve allow you to connect two lengths of micro tubing. All sold separately.

Slimline EZ Close™ White Dripper Weight (110413)

- Ideal for hanging basket growers who need to reduce or eliminate hand-watering labor costs.
- One-hand shut-off feature lets you turn off watering to individual baskets, preventing water and fertilizer waste.
- When irrigation lines are more than 36"L, use with Woodpecker PC Drippers (110409, 110410 or 110411).
- Priced per Weight, with a minimum order quantity of 10.

Angled Arrow Dripper Stakes (110403 and 110407)

- Available in two sizes: 3-3/4"L for 4" to 5" pots, as well as hydroponic grow bags and blocks, and 6-3/8"L for larger pots.
- Applying water directly to pots with Arrow Stakes helps prevent the spread of disease and reduces the need for spraying, as pesticides are not washed off by daily watering.
- Priced per stake. Each Stake has a minimum order quantity of 10.

1.0 GPH Angle Barbed Dripper Stake (110745)

- Unique flow channel down the length of the stake directs water into the container. Features pointed end for easy container insertion.
- We recommend pairing with our 1 GPH Woodpecker PC Jr. (110405) or PC Dripper (110410).
- Priced per stake.

3.2 GPH Spray Stake and Assembly (110415 and 110416)

- Easy to install. Simply pair 3.2 GPH Spray Stake with 36" Dripper Tube Assembly, each sold separately, and connect to supply tubing.
- Spray pattern angles slightly downward to spray the soil for uniform watering and maximum water retention.
- Simple, side-mounted, shut-off mechanism prevents water waste and accidental close-offs.
- Priced per item. Each item has a minimum order quantity of 10.

3 mm Flex Tube Adapter (110414)

- Converts Nipple Outlet Dripper to Barb Outlet Dripper.
- Priced per adapter, with a minimum order quantity of 10.

Our tubing is manufactured to the highest standards for greenhouse, nursery and agricultural applications.

- Ideal for tree, vine, permanent row crop, greenhouse and nursery applications. Use with riser lines or in subsurface, surface and vine-suspension applications.
- Manufactured from the finest low-density polyethylene resin available.
- UV and acid-resistant polyethylene resin material withstands the extremes of hot and cold weather much better than vinyl.
- Reflective, opaque white tubing prevents the growth of algae and produces cooler water temperatures, enhancing plant growth.
- Available in 1/8", 1/4", 1/2" and 3/4" sizes.

SuperFlex™ UV White Polyethylene Tubing

- Available in 1/8" (110408A) and 1/4" (111046A).
- Ideal for use with drippers, dripper weights, dripper stakes and spray stakes on trees, shrub beds, potted plants and hanging baskets.
- Compatible with all brands and models of drippers that accept either 1/8" or 1/4" micro tubing.
- Sold only in increments of 100' or full 1,000' rolls. 1,000' rolls are priced per ft.
- Barb Connector, Barb Tee and Micro Valve allow you to connect two lengths of micro tubing. All sold separately, below.

1/2" and 3/4" Polyethylene Tubing and Accessories

- 1/2" Black Polyethylene Tubing (110747A): 0.600" ID/0.700" OD. Maximum working pressure: 51 PSI. Sold only in 100' increments or full 1,000' rolls. 1,000' rolls are priced per ft.
- 3/4" Polyethylene Tubing (Black-110741A, White-111627A): 0.820" ID/0.940" OD. Maximum working pressure: 58 PSI. Sold only in 100' increments or full 1,000' rolls. 1,000' rolls are priced per ft.
- Joiners (110732/110728), Elbows (110733/110729) and Tees (110734/110730): Connect multiple lengths of polyethylene tubing. Double barb for increased retention and leak-proof seal.
- 3/4" Barb x MPT Adapter (111074): Connects 3/4" polyethylene tubing to FPT fittings.
- Take-Off Fittings and Grommets (111597/111596/111599/111598): An improved method of connecting low-pressure irrigation tubes and drip lines to polyethylene tubing and PVC mainlines. Use 16 mm fitting with 1/2" polyethylene tubing and 19 mm fitting with 3/4" polyethylene tubing.
- Ratchet Clamps (111697/111698): Ensure secure connection between barbed fittings and tubing.
- End Plugs (110735/110731): For closing ends of polyethylene supply tubing.
- 3 mm Punch (110743): For installation of Woodpecker PC and PC Jr. Drippers.
- 3 mm Goof Plug (110762): Plugs holes from 3 mm Punches. Sold in bags of 10.

Our Netafim™ Field Drip Irrigation Components feature Streamline™ 636 Drip Tape with Turbonet™ Technology for increased flow path velocity, improving dripper performance.

- Ideal for a wide variety of row crops, including tomatoes, melons, peppers and other vegetables.
- We offer all of the pieces necessary to create your customized field drip irrigation system. We recommend our 1/2" (110747A) or 3/4" Polyethylene Tubing (110741A and 111627A), sold separately for use as your supply line.

Streamline 636 Drip Tape (110742C)

- Turbonet™ flow paths have wider tooth patterns, maximizing velocity and eliminating clogging due to debris.
- 8 mil thickness for seasonal or multi-seasonal use, surface or shallow (up to 8") burial.
- 12" dripper spacing.
- 0.4 GPH/100' at 0% slope at 10 PSI.
- Manufactured from high-quality polyethylene, with injection-molded drippers.
- Priced per foot. Sold only in 1,000' increments.

Twist-Lock Drip Tape Connectors (110736A-110739)

- Unique design provides a secure, leak-proof connection. Larger threads for easy and fast hand installation.
- Chemical, UV and heat resistant.
- Twist-Lock 630 Series TWD x 0.4" Barb (110736A): Connects drip tape to polyethylene supply tubing.
- Twist-Lock 630 Series TWD x 3/4" MPT Adapter (110772): Connects drip tape to garden hose. Use with 3/4" x 3/4" FGH x FPT Brass Garden Hose Fitting (112062), sold separately.
- Twist-Lock 630 Series Tee (110737): Connects three lengths of drip tape to create perpendicular rows. For areas that are hard to reach from the supply line or for running dripper lines around obstacles.
- Twist-Lock 630 Series Coupling (110738): For repair and connecting two sections of drip tape.
- Twist-Lock 630 Series End Plug (110739): For closing end of drip tape row.
- Twist-Lock 630 Series 0.400" Barb with Valve (110740A): Connects drip tape to supply header tubing. Valve allows you to turn irrigation on and off at supply header for specific dripper line.
- 8 mm Punch (110746): For installation of Twist-Lock 630 Series Barbs.

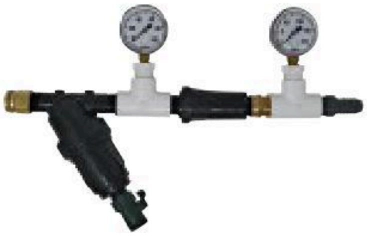
This Hose Bib Assembly allows growers to easily filter water and maintain proper PSI, leading to a better functioning system.

- A great way to connect water or nutrient solution tanks to the supply header. The assembly helps to filter debris and sediment.
- Ensures water pressure stays within the proper PSI.
- The assembly features one 3/4" brass adapter, one Y-filter, one shut-off valve, two PVC tee fittings, two 3/4" PVC bushings, two 100 PSI pressure gauges, one pressure regulator, one 3/4" brass fitting, one 3/4" adapter, one 3/4" washer, one screw clamp and thread sealing tape.
- Maximum flow rate of 5 GPM.
- For use with streamline 636 drip tape only.

HOSE BIB ASSEMBLY

STK#	EACH
116985	$66.95



The Drip Irrigation Kit provides growers with everything they need to set up their ideal drip irrigation system in a convenient, all-in-one package.

- This comprehensive drip irrigation watering kit comes complete with an Gilmour Electronic Watering Timer, 100' of 3/4" White Polyethylene Tubing, 1,000' of Drip Tape, Hose Bib Assembly, Twist-Lock 630 Series Couplings (x5), Tee (x2), Joiner (x5), 8mm Punch, Twist-Lock Series End Plug (x15), Elbow (x2), Plug (x2) and Twist-Lock 630 Series Barb w/ Valve (x15).
- Included items allow for modular setup, so growers can tailor each system to their exact watering requirements. Has enough tape and fittings to do 10 rows at 100' or 15 rows at 65'.
- Kit is comprised of high-quality components to ensure an efficient, long-lasting drip irrigation system.
- Designed for easy installation and to stay low-maintenance over time. Hooks right to garden hoses for streamlined water supply connection.
- Offers 5 GPM max flow rate.
- Included drip tape has 12" dripper spacing.

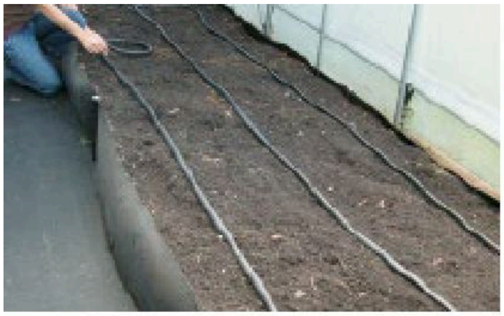
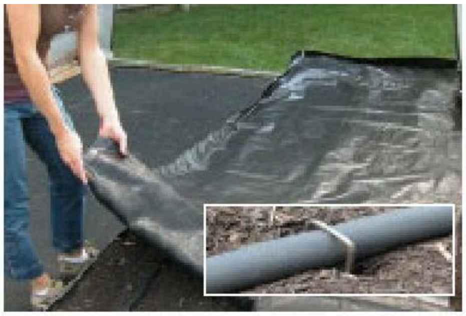
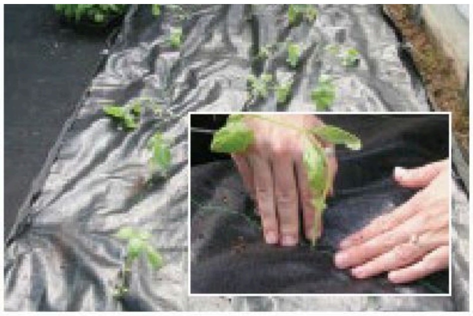
WARNING: Cancer and Reproductive Toxicity - P65Warnings.ca.gov ⚠



1. Lay our Swan® Soaker Hose in place and secure with our Fabric Securing Staples, sold below. Soaker Hose is available in either 50'L 3/8" ID coupled or 250'L 3/8" ID uncoupled. Both come with a 7 year warranty. Soaker Hose targets the specific area that needs watering, offering precise, gentle soaking and eliminating water waste.



2. Place Weed Guard Ground Cover over the hose and secure with our Fabric Securing Staples. Our 3 oz. per sq. yd. Ground Cover is manufactured from UV-resistant black polypropylene and has a long life expectancy. Fabric Securing Staples are made of 11 gauge steel wire, are 6"L with a 1"W crown.



3. Make slits in the Weed Guard, which is pre-marked every 12" for easy plant alignment, measuring and cutting.

113879

113869

Easy Water 1-2-3 System allows water, nutrients and air to pass through, but stops the weeds. Increase your vegetable yield up to 75%.

- Weeds compete with vegetables for water, light and nutrition. By taking control of these weeds, your production will reach full potential.
- Just sit back and enjoy your bountiful harvest, with no weeding or hand watering.

EASY WATER 1-2-3 SYSTEM

*Couplings necessary only when purchasing 250' Uncoupled Hose.

Simple, economical and efficient watering method saves time and labor costs.

- Mats use a capillary action to hydrate plants from the bottom up, enabling water to reach the root zones.
- Plants grow more uniformly in size and have no leaf spotting as when they are watered from above.
- Ideal for use on your benches, flooring or ground.
- 100% needle-punched polypropylene, non-woven filter fabric is resistant to shrinking, tears, soil chemicals, puncture, ultraviolet exposure, rot and mildew.
- Lightweight, easy-to-handle matting cuts easily and does not fray.
- Sold in 100 ft. lengths.

How to get started:

1. Ideal on your bench top or greenhouse flooring.
2. For best results, your bench, ground or flooring area should be as level as possible.
3. Cover area with our 5.2 oz., 12 mil mat underliner, black side up. This allows the water to spread, but prevents dripping and water loss due to evaporation. Underliner will also extend the life of your matting and makes the system easy to clean.
4. Lay the Capillary Matting over the underliner. Overlap or tightly join any adjacent pieces. Do not allow the matting fabric to hang over the edges.
5. We suggest soaking the fabric prior to setting out your plants. This ensures maximum capillary contact immediately. If possible, keep mats wet at all times. If not, wet at frequent intervals.
6. Works best with plastic pots.
7. Shown here using our Soaker Hose, available coupled in 50 ft. length and uncoupled in 250 ft. length.

Drip Mate® Micro Irrigation Kits And Accessories provide you with everything needed to set up an efficient drip irrigation system and optimize plant growth, while also conserving water.

- These convenient kits connect directly to a hose tap or can be connected to an existing sprinkler system using additional components.
- Ideal for use with home and landscaped gardens, container plants, nurseries, flower beds and more.
- Kits require minimal assembly and feature easy-to-read instructions to ensure a simple installation process.
- Constructed with UV-stabilized materials to promote a longer lifespan.
- System components include 50' of 5/8" mainline tubing, 50' of 1/4" distribution tubing, 25 Shrubbler® 360° Adjustable Flow spikes, snap-on tap adapter and snap-on filter.
- Kits also come complete with ratchet clamp, two figure eight end closures, rack of ten goof plugs, elbow, tee and Key Punch™.
- Users can complement each system with additional fittings (118931-118934) to promote uniform growth, regardless of plant location.

The Frame It All™ Elevated Garden Bed is the ideal solution to gardening with limited space.

- This garden planter features an elevated design that provides ease of maintenance and is perfect for smaller outdoor areas, including balconies or patios.
- Great for growing vegetables, herbs, flowers and more.
- Eco-friendly planter boards are made from recycled plastic composite.
- Durable aluminum construction promotes longer lifespan.
- Planter is easy to assemble and resistant to decay, rot, splinters and splits.

FRAME IT ALL™ ELEVATED GARDEN BED

117844

Frame It All™ Self-Watering Elevated Planters allow you to garden more comfortably and with less effort.

- Planters combine elevated design with self-watering reservoir that makes tending garden easier and keeps soil irrigated for several days.
- Perfect for patios, decks and small-space gardening or as easy-access supplement to traditional vegetable gardens.
- Trellis frames provide strong support for heavy plants, eliminating need for constant staking and tying.
- Planters are made from durable fade-proof, food-grade safe polyethylene.
- Box-shaped planter (117844) includes greenhouse cover for protection when starting plants earlier or growing later into year.
- Plant Tower Planter (117846) offers adjustable trellis height that helps support plants as they grow.

This unique Poly Geogrid, with superior tensile strength and UV resistance, is ideal for both fencing and stabilization applications.

- Manufactured from a unique, black, biaxially orientated polymer material that is lightweight, flexible and easy to handle, yet extremely durable.
- Mesh size: 1.5" x 1.5".
- Superior UV resistance.
- Offers an attractive, long-lasting and easy-to-install fencing solution. Ask your knowledgeable National Account Manager for installation recommendations.
- Excellent long-term strength of this environmentally safe and friendly polymer material makes it ideal for stabilization, separation, reinforcement and filtration.

Highly visible Orange Safety Fence provides excellent traffic control for work zones and hazardous areas. Black Snow and Sand Fence controls blowing and drifting.

- Compact, 4' x 100' rolls for easy handling and installation.
- UV-stabilized polyethylene ensures durability and long life.
- Lightweight and economical as compared to metal fencing systems.
- Create your own Safety Fence System with our accessories sold separately for an effective, economical solution.

Orange Safety Fence (111532)

- Standard weight, 13 lbs. Mesh size: 2-1/2" x 1".
- Meets building code requirements.

Black Snow/Sand Fence (111533)

- Heavy-duty, 18 lbs. Mesh size: 2" x 1".
- Well-suited for small animal and bird control.

Fence Accessories

- 6' Fiberglass Fence Posts are designed for long life. Manufactured from E-glass fibers that allow for flexing without breaking. Each fiber is UV protected on both interior and exterior. Flexible as bamboo, but will not rot or fray. Strong as steel, but will not rust. Sold in bulk-packaged quantities of 10. Ground Posts are not needed when using Fiberglass Fence Posts.
- When using our 6'H, 19 gauge 1.05" OD galvanized steel posts, we recommend our 2' ground posts and post driver for easy installation. Insert ground post about 2' into ground. Place fence post inside it. Finished fence post height will be about 4'. Complete each post with our 3/4" Schedule 40 PVC End Cap.
- 1/4"W x 1/16" thick black nylon cable ties come 100 per package, are 8"L, UV resistant and have a tensile strength of 120 lbs.
- 12" Heavy-Duty Ground Staples or 6"L, steel wire Securing Staples securely hold fencing to the ground.

Fence Post

6' Fiberglass Fence Post in 11/16" and 3/4" diameters.

Keep deer and other wildlife out of your garden and orchard areas with this “do-it-yourself” Fencing System.

Poly Mesh Netting

- Our 3/4" x 3/4" Poly Mesh Netting is lightweight, easy to install and ideal for our Deer Fencing System and as anti-bird screen.
- Manufactured from black UV plastic for long life and durability.
- Couple with our Deer Fence System Accessories on, sold separately for an effective, low-cost solution to your deer problems.

A. When using our 19 gauge, 1.05" OD galvanized 6', 8' or 10' fence posts (105368, 104573 & 105S123), we recommend installing at a maximum of 6' to 10' apart. Use our 2' Ground Post (104543) and Driver (104545) for easy installation. Insert ground post 2' into ground. Place fence post inside it. Finish off each post with our 3/4" Schedule 40 PVC End Cap (WF2990). We recommend our Corner Post Assembly when using our galvanized fence posts. Ask your National Account Manager for details. Our Fiberglass Fence Posts are available in 6' and 8' lengths, designed for long life and are an excellent alternative. Manufactured from E-glass fibers that allow for flexing without breaking. Each fiber is UV protected on both interior and exterior. Flexible as bamboo, but will not rot or fray. Strong as steel, but will not rust. Priced per post, sold in bulk-packaged quantities of 10. Priced per post. We recommend installing Fiberglass Fence Posts at a maximum of 6' to 10' apart. Ground Posts are not needed when using Fiberglass Posts.

B. Use either galvanized steel (AR1030) or stainless steel (AR3030) 1/8" 7 x 7 cable as a guide wire at top to support your deer fence. 1/8" cable clamps, either galvanized (AS1002) or stainless steel (AS1026) are required.

C. 4" UV-resistant black nylon cable ties (112047) hold the cable to the fence along the top. 8" UV-resistant black nylon cable ties (112057) hold the fencing to the posts. Both are strong and durable and will last for many years.

D. Brightly colored Yellow Flagging Ribbon (LJ7802) tied to your fence will warn deer of new barrier.

E. 1-1/4" stainless steel fence staples (FA3390) hold the fencing to the trees surrounding the area to be protected. No rusting.

F. Use our 12" Heavy-Duty Ground Staples (104544), spaced closely, to hold netting firmly to the ground. This will prevent wildlife pests from forcing their way under and will keep your birds from making their way out.

For human traffic

For livestock

For cars, trucks and tractors

Bio-Security Mats, your low-cost solution to avoiding low milk yields, disease, quarantines and loss of income.

- No spill, no waste, no contamination.
- It's easy to safeguard your investment in healthy livestock with Bio-Security Mats.
- Disinfectant-filled foam and polypropylene mats help stop the spread of hoof and foot problems, including hairy wart.
- Install in the morning, rinse and dry at night, then refill with disinfectant.
- Cows prefer mats over messy trays, which can splash and spill.
- Disinfectant is forced through by hydraulic pressure from weight of animal, human or vehicle.
- Heavy-duty mats are 1-1/2" thick and hold up under extreme use.
- Manure washes off and urine runs off full mat.
- The toughest mat on the market can be used either indoors or out.
- Ideal for human, car and truck traffic, garages, dairy stalls, utility rooms or anywhere that bio-security is an issue.

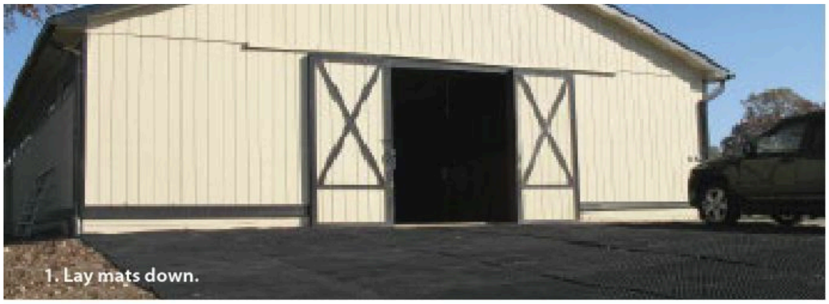
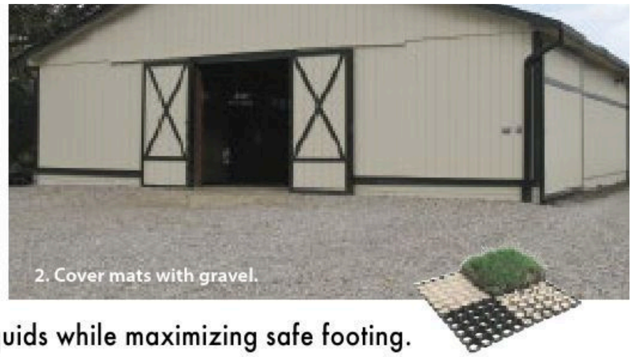
WARNING: Cancer and Reproductive Toxicity - P65Warnings.ca.gov



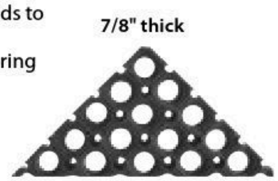
1. Lay mats down.

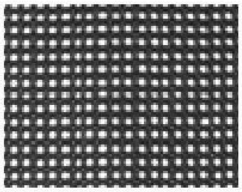


2. Cover mats with gravel.

Heavy-Duty Rubber Ring Mat is designed to permit fast drainage of liquids while maximizing safe footing.

- Manufactured from a blend of recycled and virgin rubber, these mats are ideal for any areas requiring good drainage and for grass retention areas.
- Resilient flooring has received high ratings for comfort for both animals and humans.
- Perfect for use under workbench areas as anti-fatigue mat.
- Use as a pathway covering over dirt or grass. During rainy weather, this mat will keep you out of the mud and will protect the roots of grass so that bald spots will not develop.
- A perfect stabilization solution that is environmentally safe and friendly. Ideal for dirt or grassy roadways and driveways, walkways, parking areas, pasture shelters and barns. Reduces, and actually eliminates, storm water run-off and erosion due to rainfall, flooding or heavy traffic. Reinforce ramps, embankment and even boat launch areas.
- Dimensions: 39" x 59" x 7/8". Weight: 30 lbs.
- Bottom side of mat is held off the subsurface by hundreds of small rubber nubs, allowing the liquids to drain and travel quickly to the subfloor drain.
- Easy to use and easy to install. This heavy-duty mat is the answer for safe, healthy footing and flooring indoors or out.



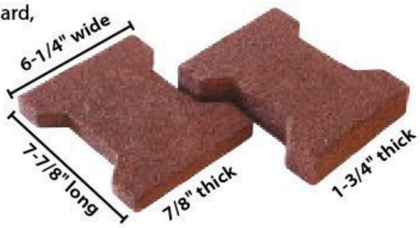


HEAVY-DUTY RUBBER RING MAT

STK#	EACH	50 & UP
108620	$56.95	$54.95

Tough, flexible, long-lasting Champion PaverBlocks™ offer a safe, nonslip surface on walkways, entrance areas, in greenhouses, wash stalls, playgrounds, patios and more.

- Economically priced and environmentally friendly, Champion PaverBlocks™ are manufactured from 100% recycled tire rubber.
- Available in red in 7/8" thickness and 1-3/4" thickness.
- Superior shock absorption and protection, particularly in wash stall or other wet areas due to excellent self drainage—no puddles.
- Ideal for replacing dirty, dusty, slick or hard surfacing.
- Extremely durable and resilient, offering great comfort.
- Sound absorbing for a quieter environment.
- Controls dust and bacteria growth.
- Easy to install and maintain, these interlocking Pavers can be used indoors or outdoors, as either temporary or permanent flooring.
- Chemical, abrasion and weather resistant, these Pavers will not shrink, warp or crack.
- Coverage: 3.4 PaverBlocks™ per sq. ft.
- 7/8" PaverBlocks™ are best installed on hard, resilient surfaceslike concrete, wood or blacktop. To avoid shifting or lifting, it is recommended that a urethane adhesive be applied to the base. 1-3/4" PaverBlocks™ are ideal on all surfaces.



CHAMPION PAVERBLOCKS™

		PRICE PER PAVERBLOCK™

DYNO HEAVY-DUTY INTERLOCKING EVA MAT

STK#	EACH
117053	$36.95

⚠ **WARNING:** Cancer and Reproductive Toxicity - P65Warnings.ca.gov

Dyno Extreme-Duty Interlocking Mat is ideal for dairy free stalls, horse stalls, trailers, wash racks, cross-tie, grooming and quarantine areas and more.

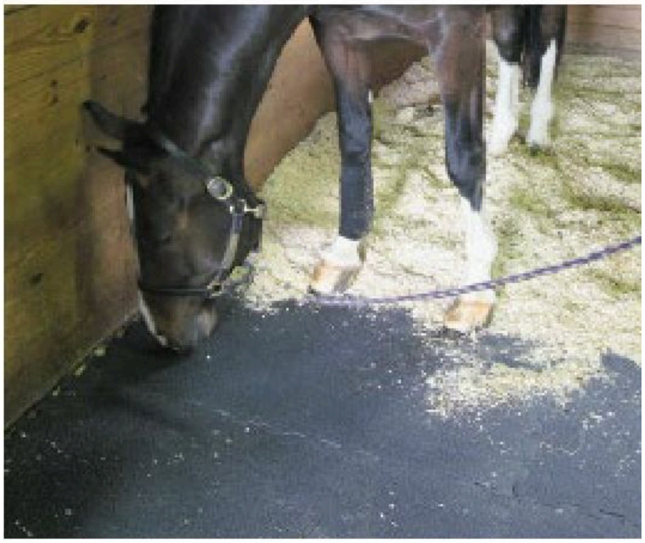
- Manufactured from 100% EVA (ethylene vinyl acetate).
- 48" x 72" mats are 1.18" thick and reversible for extended wear.
- The slip-resistant surface, combined with superior resiliency, provides unmatched safety and comfort for your horse.
- Easy to clean, these mats are a perfect choice in quarantine areas.
- Impermeable, so urine cannot soak into the mat and create odors.
- Intended for indoor use.
- Interlocking floor mats, include trim.

DYNO EXTREME-DUTY EVA MATS

STK#	PER ROLL
117052	$119.95

1.18 inches thick

Mat with trim



Convenient, interlocking mat clearly improves the health of your horses, livestock or pets.

- Resilient, cost-effective mat is manufactured from 100% re-vulcanized and recycled rubber that has been cleaned of all debris.
- Safe, comfortable and durable, this mat offers stress relief to bones and muscles, better dust control and level, safe floor surfaces.
- 4' x 6' mat is 17 mm thick.
- Tight-fitting interlocks provide a virtual "one-piece" floor and minimize the amount of water or urine that can seep through seams.
- Routine savings up to 50% on stall bedding and you can cut cleaning time in half.
- Good traction under wet conditions is a function of this mat's resilience, texture and raised surface pattern.
- Mats will hold themselves in place, do not need surrounding walls to contain them and are difficult, if not impossible, for horses to pull up or move.
- Interlocking floor mats, include trim.

WARNING: Cancer and Reproductive Toxicity - P65Warnings.ca.gov

Get rid of birds, expensive recurring cleanup, health risks and repair costs with the Electronic BirdXPeller Pro™. This humane solution is ideal for both indoor and outdoor use and effective on a wide variety of birds.

- Expels birds by blasting them with sound waves. This unit automatically broadcasts a variety of naturally recorded bird distress signals and natural predator sounds that frighten, confuse and disorient birds within its effective range.
- Installs easily, mounts almost anywhere.
- Repels different birds with different settings, 24/7. Can also be used in day-only or night-only modes.
- Sleek, weatherproof casing.
- Coverage: up to one acre.
- Power requirements: 110 V AC, 220 V AC or 12 V DC.
- Comes complete with 110 AC adapter with 6' cord.
- UL and CE listed.

ELECTRONIC BIRDXPELLER PRO™

STK#	EACH
DE7060	$305.00

State-of-the-art, solar-powered unit is guaranteed to keep out nighttime predators.

- Maintenance-free, solar-powered units require neither batteries nor electricity.
- Units are completely sealed, protecting against moisture and are high/low temperature resistant.
- Red flashing light automatically turns on at dusk and off at full daylight.
- Concept is simple, but it works. Predators believe the flash to be the eye of another creature and feel threatened, so they stay away.
- Multiple unit locations are most effective. Your knowledgeable National Account Manager will be happy to recommend what is best for your setup.

NITE GUARD SOLAR® PREDATOR PROTECTOR

STK#	EACH
106126	$24.95

Safely and humanely repel pests with a YardGard Pest Repeller. This maintenance-free electronic solution to pest control will save you time and money.

- Ideal for yards, gardens, porches, greenhouses, buildings, or anywhere plagued by annoying pests.
- Repels raccoons, skunks, deer, dogs, cats, bats, rabbits, squirrels and more by emitting harmless sonic or ultrasonic sounds.
- Avoid messy and dangerous chemical repellents with this simple electronic unit. System can be mounted anywhere.
- Provides continuous or motion-sensor operation, and will cover up to 4,000 sq. ft.
- Offers dual operation; uses four C batteries or included AC adapter.
- Weatherproof snap-on rain cover protects controls.

YARDGARD PEST REPELLER

STK#	EACH
109826	$65.95

Rid your home, warehouse and barn of creeping insects and flying pests and enjoy up to 1,500 sq. ft. of pest-free property.

- Three different frequencies will repel mice and bats, flying insects like mosquitoes and gnats, and crawling insects like fleas, ticks, ants, spiders and roaches.
- Safe for humans and non-rodent pets like dogs, cats and reptiles.
- Power consumption is less than 5 W. Includes AC adapter cord.

TRANSONIC BUGCHASER

STK#	EACH
109823	$48.95

Humane and Environmentally Friendly Solar Powered Mole and Gopher Repellent works day and night to protect property.

- Protects from destructive rodents, including moles, gophers, and ground dwelling squirrels and chipmunks.
- Uses chatter sound technology to repel rodents by simulating the natural distress call those burrowing rodents use to warn others of nearby predators.
- Wide range of coverage. One unit protects up to 7,500 square feet of your yard or garden.
- For best results, overlapping two units is suggested.
- This environmentally friendly spike doesn't contain or use any harmful chemicals in order to repel rodents.
- Safe to use around children and pets.
- Package contains 1 stake.

MOLEMAX
Sonic Spike
SOLAR

MOLEMAX® SOLAR STAKE

STK#	EACH
117560	$32.95

End indoor bird infestations.

- This ultrasonic bird control system gets rid of stubborn bird infestations with a "silent to humans" audio attack.
- Surround the infested area with 360° ultrasonic sound coverage that keeps birds and rodents away for up to 6,500 sq. ft.
- Four internal speakers emit high frequency sound waves and audio signals that provide both immediate and long-term bird control.
- Continuous operation, 24/7.
- Ideal for all enclosed or semi-enclosed areas. Not recommended for outdoor use.
- Power input: 12 V DC from 115 V AC/60 Hz or 220 V AC/50 Hz.
- Power consumption: Less than 10 watts.
- UL and CE listed.

QUADBLASTER QB-4®

STK#	EACH
DE7050	$629.00

This low-profile electronic pest repeller uses quiet ultrasonic sounds to evict mice, bats, spiders, cockroaches and other crawling insects.

- This highly effective unit disrupts the pests' habitat through ultrasonic and sonic sound waves, affecting their feeding and communication habits, forcing them to leave the area.
- Intended for indoor use only. Ideal for kitchens, garages, basements, workshops, barns, boats, warehouses, restaurants, stores, sheds and attics.
- Safe for use around humans, including children, and around household pets such as dogs, cats, birds and reptiles.
- Two-speaker system doubles the effectiveness.
- Easy to use. Just plug the system in.
- Coverage: Up to 3,500 sq. ft.

TRANSONIC PRO®

STK#	EACH
DE7065	$65.95

Most effective and still the best traps for dry areas.

- Designed to be used in dry areas only like food plants, hospitals, schools, kitchens, and residences, wherever poisons should not, or cannot be used.
- Larger size means increased chances for catching rodents or snakes.
- Ready-to-use and disposable.
- 12-1/2" x 10-1/4".
- Contains two traps.
- USDA permits their use in meat and poultry plants.

115461	Peanut Butter	41.95

Nectus is the go-to rodenticide for pests that are hesitant to take other baits.

- Nectus is a highly attractive bait for rodents, and it is successful in spaces where other food is available to rodents, like food storage warehouses.
- This bait is soft and palatable, making it ideal for use indoors where water is not accessible to rodents.
- Designed with oil compounds to help the bait remain attractive to rodents over longer periods of time.
- The active ingredient in Nectus is bromadialone.
- The bait is packaged in 16 lb. pails that are tamper-evident and resealable. Each piece is individually wrapped in 0.38 lb. pouches.

JT EATON NECTUS

STK#	EACH
115462	$95.95

Quickly reduces and eliminates mole activity. Easy-to-use granular formula lasts up to three full months.

- 100% natural and organic mole repellent is safe for use near pets and humans.
- Protects more area, up to 50% more coverage than other repellents.
- Environmentally safe granular formula is ready to use. No mixing, no spraying.
- Effective in all seasons. Spring and fall applications of Mole Scram™ will prevent mole activity in your yard.
- Convenient 4.5 lb. shaker is ideal for medium-sized lawns, plots or gardens (approximately 3,375 sq. ft.).

Blend stops moles three ways.

- Makes moles' food hard to digest.
- Less food reduces insect activity.
- Makes mole tunnels and surrounding soil smell bad. Mild odor to humans.

All-natural deer repellent offers year-round protection.

- Ideal for landscapers, professional gardeners and home use.
- Highly effective, completely organic, biodegradable granular formula that contains no harmful chemicals or toxins. Safe for you, the animals, your family and pets.
- No mixing or spraying needed. Granular—just sprinkle.
- Repels by an odor that stimulates a strong fear-based response with deer, yet there is no unpleasant odor to humans.
- Rain resistant and can be used throughout all seasons, even in snow.
- Organic nutrients provide and promote enhanced plant growth.
- Costs less per sq. ft. of protection than any other deer repellent on the market today.

REPEATER™ MULTI-CATCH MOUSE TRAP

STK#	EACH	4 & UP
102462	$8.95	$8.49

Gain control over any rat or mouse problem– no matter the size – with reusable Jawz Rat and Chipmunk Traps or Jawz Mouse Traps.

- These traps are made from heavy-duty plastic, and the strong spring allows for quick kills and the strength needed for larger rodents.
- Incredibly easy to clean. The plastic teeth of these traps break the rodent's neck, but do not break the skin. This allows for rodents to be easily disposed of, and the trap can then be rinsed, cleaned and reused.
- Designed to maximize catches and eliminate accidental tripping.
- Red display notifies you that the trap is set.
- Built in reservoir provides a space for bait and also reduces accidental tripping that occurs during the baiting process of conventional traps.
- These traps are easy to set and can be set with your hand or foot.

WARNING: Cancer and Reproductive Toxicity - P65Warnings.ca.gov ⚠

Hova-Bator Incubators and Automatic Egg Turner are ideal for small-scale poultry raisers.

Hova-Bator Incubator (111987)

- Most economical small incubator.
- Two 5" x 4" observation windows allow full view of mirror.
- Comes complete with thermometer and wafer, snap-action thermostat.
- Thermal air flow through exhaust vents.
- Capacity: 42 large chicken eggs. Can hold a greater quantity of smaller eggs.
- Dimensions: 18-1/2" x 18-1/2" x 9-1/2".
- 110 V.
- 1 year manufacturer's warranty.

Automatic Egg Turner (111988)

- Makes daily egg turning easy during incubation.
- Less time consuming and labor intensive than turning eggs by hand.
- Egg turner includes six Universal Egg Racks. Racks hold eggs of any size, from partridge eggs up to duck eggs.
- Capacity: 42 eggs.
- Dimensions: 15" x 15" x 3".
- 110 V AC.
- Can be used with both of our Hova-Bator Incubators.
- 1 year manufacturer's warranty.

Genesis Hova-Bator Incubator (111986)

- Perfect for novices, experts, classrooms and laboratory settings.
- Thermostat is preset for bird eggs and regulates itself. Command setting is never affected by a change in temperature, humidity or dust.
- Thermostat can be set as low as 60°F.
- LCD displays set temperature, actual temperature and humidity percentage. Both Fahrenheit and Celsius temperatures are shown.
- Includes picture window and plastic bottom liner.
- Dimensions: 18-1/2" x 18-1/2" x 9-1/2".
- Capacity: 50 chicken or ducks eggs or 130 quail eggs.
- 110 V AC/12 V DC. TUV listed.
- 1 year manufacturer's warranty.

Chick-Inn Laying Nests promote poultry health, greater egg production.

- 4-Hole and 6-Hole Laying Nests, with plastic lids and front and back partitions, are ideal for smaller or specially configured pens.
- Popular 8-Hole and 10-Hole Laying Nests are made of galvanized steel and are easy to assemble with a pop rivet gun.
- High front and back panels prevent litter from being scratched out of nests.
- Removable plastic bottom inserts on 4, 6 and 8-hole nests are easy to clean, keeping birds healthier.
- Perches are hinged upward.
- Nest pads, sold separately, offer comfort, reduce chances of bacterial contamination and encourage hens to use proper nesting sites. We recommend one nest pad for each nest hole.

103921	22.5"W x 11"H x 38.5"L	$95.95

Designed to allow better air circulation and deter manure buildup.

- 12" x 13" nest pads, with unique ventilation slot design, allow for maximum air and debris flow, reducing the percentage of contaminated eggs.
- Clean-up time is quick and easy.
- Molded from a special UV-resistant plastic, these pads have a useable life expectancy of up to seven years.
- Offers comfort to your hens, while resisting lice, insects, rot, mildew and fungus growth.
- Encourages hens to use the proper nesting site.
- We recommend one nest pad for each nest hole.
- Height of pad is 1/2".

OverEZ Chicken Coops are constructed out of high-quality wood and allow you to comfortably house chickens year-round in any climate.

- These heavy-duty red chicken coops are built to last years and can be used in hot or cold conditions.
- Flooring and siding are designed with treated resin, ensuring superior moisture resistance and helping with moisture levels that chickens naturally produce.
- Convenient roof profile helps ensure rainwater runs off back of chicken coops, keeping water runoff away from nesting boxes.
- Ceilings feature radiant barrier sheathing that helps keep coop cooler during summer heat.
- Each coop comes complete with screened window(s), nesting boxes, vents, roosts, man door and chicken door with treated wood ramp.
- Coops can be quickly and easily assembled with only a screw gun. Easy-to-read instructions included.
- Standard shipping free for orders in continental U.S. Excludes Hawaii and Alaska.
- Chicken coops can be returned in original packaging within 30 days of purchase and must be unused.

Poultry Waterers With Legs create the perfect water source for starting a small flock of chicks.

- Legs can be removed for younger chicks, then added to lift the waterer off the ground as birds grow larger.
- Legs help prevent the buildup of dirt and debris in the waterer base.
- Waterers are molded from durable plastic to provide years of use.
- Translucent plastic body simplifies checking the water level.

Feeders for chicks, full-grown poultry and game birds.

4 lb. Capacity Feeder With Legs (117443)

- Perfect for starting a small flock of chicks.
- Removable legs can be detached for chicks, and as the birds get larger, legs help raise the feeder off the ground for easier feeding.
- Feeder dimensions: 9.5"W x 11.75"L x 9.5"H
- Holds up to 4 lbs. of feed.

8.5 lb. Capacity Feeder With Legs (117444)

- Minimizes spillage and prevents wasted food with a built-In Feed Saver Ring.
- Made of impact-resistant plastic that won't rust or corrode.
- Feeder dimensions: 11.5"W x 14.75"L x 11.5"H
- Holds up to 8.5 lbs. of feed.

15 lb. Capacity Hanging Feeder (103684)

- Perfect for young quail, pheasant or chicks.
- Top of pan diameter is 14-1/4".
- High-density polyethylene plastic with galvanized steel center hanging rod.
- Feeds up to 100 growing chicks or 50 layers.

16 lb. Capacity Floor Feeder (103683)

- Adjustable body regulates feed dispensing, saving you money.
- Can be used for chicks, mature quail or poultry.
- Lid is hinged for easy filling.
- Pan is 1-1/2"H x 12" diameter.
- Feeds up to 100 chicks or 50 chickens.

17.5 lb. Capacity Feeder With Legs (117445)

- Molded from durable plastic for years of use and reliable feeding.
- Removable legs raise the feeder off the ground to keep feed free of dirt and debris.
- Feeder dimensions: 15"W x 17.75"L x 15"H
- Holds up to 17.5 lbs. of feed.

Strong, sanitary and portable, Chick-Inn Plastic Fountains.

1-Gallon Fountain (103678)

- Popular gallon-size, high-density polyethylene jar.
- High-impact styrene base screws on securely.

1-Gallon Fountain (105800)

- Twist lock, nestable fount is virtually unbreakable.
- Ribbed-design jar adds extra strength.
- Injection molded means smoother inside with no turned-in bottom lip to hold back water and cause bacteria buildup.
- Base is red or orange, depending on manufacturer availability.

3-Gallon Fountain (103679)

- Sure-grip nylon handle makes this easy to carry, even when full.
- Inverted reservoir is supported on four legs.
- Seamless, leakproof design.
- Secure, twist-lock base.
- Easy-to-clean plastic. Water never develops that "galvanized" odor or taste.

4-Gallon Fountain (103680)

- Similar to 3-gallon size, with heavier plastic to hold more water.
- Ideal for larger flocks and hot days.
- Screw-out plug on bottom lets you fill without removing base.

WARNING: Cancer and Reproductive Toxicity - P65Warnings.ca.gov

Maintain constant stock tank water levels.

- Reliable positive shut-off ends tank flooding.
- Maintains fluid level.
- The fluid level forces the float to rise and close the diaphragm chamber. The diaphragm then expands, stopping the incoming flow. When the fluid level drops, the diaphragm escape opens, empties and allows the fluid to fill the tank. This shut-off feature allows full flow until the valve closes, unlike the common ball float valves.
- The valve body is made of durable glass-filled nylon 6/6 and is vented to eliminate siphoning.
- Rustproof valve is virtually indestructible and installs in seconds.
- Internal parts are of ABS plastic and EPDM rubber.
- Resilient to freezing.
- Guaranteed for 2 years.
- No lever arm. No exterior moving parts.
- High volume. Anti-siphon.
- No float valve.

117919	$34.99

Gama Sonic® Solar Light My Shed IV Lights are convenient, maintenance-free and distribute light further than traditional solar lamps.

- These efficient lights require no electrical wiring and are powered by monocrystalline solar panel, helping save energy and money.
- Includes two lights that illuminate at 250 lumens each in bright white (6000 K) color temperature.
- Lights can be mounted on either ceiling or wall and easily attach onto any type of material, including metal, wood and plastic.
- For best results, install solar panel on side of building that receives most sun, then connect to LED lights inside using included 9' cord.
- Constructed with weather-resistant, heavy-duty resin frame for increased durability and longevity.
- Comes complete with Ni-MH rechargeable battery, mounting brackets and connecting cord.

GAMA SONIC® SOLAR LIGHT MY SHED IV

STK#	EACH
117901	$119.99

The Gama Sonic® Cottage Solar Barn Light combines an industrial modern design with exceptional functionality, producing a sleek, elegant solar fixture that enhances your outdoor space.

- Creates welcoming ambiance and can serve as both area and perimeter lighting. Ideal for use in a variety of locations, including front doors, porches, entrances, terraces, sheds, garages and more.
- Light fixture turns on automatically at dusk and shines at brightness of 250 lumens in warm white (2700 K) color temperature.
- By utilizing innovative Morph Technology, the light maximizes sunlight absorption for enhanced efficiency and aesthetics, while eliminating need for a separate solar panel.
- Powered by 8.4 W monocrystalline solar panel and 3.2 V battery, ensuring up to 3 nights of continuous illumination on full charge.
- Automatic dusk-to-dawn operation illuminates outdoor spaces as needed, requiring no manual intervention.
- Weather and rust-resistant cast aluminum construction provides greater durability and longevity.
- Designed for easy wall-mounted installation that requires no electrical wiring. For best results, mount light fixture in a spot where it will receive maximum amount of direct sunlight throughout day.
- 2-year limited warranty.

GAMA SONIC® COTTAGE SOLAR BARN LIGHT

STK#	EACH
118965	$229.99

The Gama Sonic® Solar Wall Light features a unique design that bends solar cells to fit its curved surface, helping maximize sunlight absorption and extend its battery duration.

- Gama Sonic® solar LED light bulb boasts 10-year life span and offers abundant lighting similar to 360° light spread of customary incandescent bulb.
- Integrated with powerful 4 W solar panel that ensures light works for up to 12 hours on full charge.
- Provides brightness of 150 lumens in warm white (2700 K) color temperature.
- Constructed from weather-resistant, rustproof rigid resin and features black finish.
- Includes all necessary hardware for quick and easy installation.

GAMA SONIC® SOLAR WALL LIGHT

STK#	EACH
117918	$79.99

The Gama Sonic® Solar Yard Light is a multi-purpose lighting solution that's both cost and energy-efficient.

- This versatile light can be mounted direct-to-wall or with extended arm mount and is ideal for use over garage, house entry way, patio, garden, driveway and more.
- Powered by efficient monocrystalline solar panel and provides up to 12 hours of light after being fully charged in sun.
- Motion-sensor activated lamp has brightness of 300 lumens and offers warm white (2700 K) or bright white (6000 K) color temperature.
- Heavy-duty, weather-resistant design endures severe weather conditions and is maintenance-free.
- Includes all necessary hardware for desired mounting method.

GAMA SONIC® SOLAR YARD LIGHT

STK#	EACH
117917	$49.99

The Gama Sonic® Solar Coach Light With Edison Bulb combines a vintage industrial design with modern accent wall décor, providing a stylish and energy-saving replacement for electric and gas-powered outdoor lighting.

- This lantern is integrated with a monocrystalline solar panel that makes it easy to harness greater amounts of sunlight.
- Solar panel is protected by durable, cleanable tempered glass to enhance lifespan and performance.
- Incorporates cutting-edge solar LED Edison light bulb technology and provides 360° illumination.
- High/low switch allows for two modes of operation. Low mode provides dimmer light for longer duration, while high mode produces brighter light for shorter durations.
- On high mode, LED Edison light bulb delivers brightness of 60 lumens in warm white (2400 K) color temperature for up to 12 hours when fully charged.
- Constructed from weather and rust-resistant cast aluminum with a powder-coated finish and polished pencil edge glass panes.
- Includes all necessary hardware for quick and easy wall-mounting where ample sunlight is available.
- Backed by 2-year limited warranty.

WARNING: Cancer and Reproductive Toxicity - P65Warnings.ca.gov ⚠

The Gama Sonic® Solar Security & Area Light features a motion sensor and timer, allowing you to illuminate the exterior of your warehouse, storage unit and more with precision control.

- Two modes of operation allows users to select between on mode and PIR mode.
- Dusk-to-Dawn operation: This solar area light is designed to work during the night, although no light will come from the device until motion has been detected. The outdoor area light is automatically activated at dusk and turned off at dawn.
- Motion Sensor Activated: Designed with an integrated infra-red motion sensor that regulates light output automatically, this solar outdoor area light has a 140-degree detection zone and can detect movement from up to 40-feet away. If no further movement is detected for 60 seconds, the light will turn off.
- Timer: using the timer dial, choose between an operation time of 4-hours, 5-hours, 6-hours, 7-hours or 8-hours or set to 0 for dusk to dawn operation.
- Unit comes with everything needed for easy installation, making this the perfect lighting solution for outdated AC powered security lights.

NEW The 20 W LED Grow Lamp Pack provides an ideal lighting solution for cloning, seed-starting, vertical farming and hydroponics in small-scale growing setups.

- This convenient and efficient lighting system is simple to mount and is a great option for use with low ceilings, vertical racks or over benches.
- Each pack contains four lights, and with the ability to be daisy chained together, lighting can be easily configured as setup demands.
- User-friendly daisy-chaining capability allows for effortless connection of up to twenty light bars in one loop.
- Scientifically engineered for use with a variety of crops, including tomatoes, lettuce, herbs, microgreens, flowers, cannabis and more.
- Light bars are 5"W and approximately 4-1/2'L.
- Along with four light bars, the pack includes an 8-1/2'L white power cord and cable ties. Optional surface mount bracket (119202) is sold separately.
- PPE: 2.3 µMol/j@240V.
- PPF: 46 µMol/s@240V.
- 120-240 V.

Digital ballast accepts both Metal Halide and High Pressure Sodium Lamps. Designed especially for greenhouses and hydroponic systems, these PARLucent fixtures offer outstanding uniformity and superior light levels.

- Available in both 400 W and 1,000 W, these energy-efficient fixtures feature high light output with low energy consumption.
- Designed to withstand damp, corrosive environments and to promote healthy plant growth.
- Extruded aluminum housing with aluminum reflector.
- Save over 30% on energy usage compared to magnetic ballasts.
- Constant output of power.
- Completely silent operation.
- Metal Halide/High Pressure Sodium convertible.
- Metal Halide: Best light source if little or no natural light is available. Promotes vigorous leafy growth. Functions as a primary light source.
- High Pressure Sodium: Best light source if used in conjunction with natural light. Promotes budding and flowering. Functions as a supplementary light source.
- Includes 8' power supply cord, lamp and hanging brackets.
- Replacement lamps sold separately.

Peak Series High Bay Light Fixtures feature a versatile and efficient design that gives you all the flexibility you need to light up your space in a safe, comfortable and productive way.

- With up to 189 lumens per watt efficacy, these light fixtures ensure high performance in a variety of applications, including warehouses, distribution centers, factories, gymnasiums and more.
- Fixtures provide 4000K color temperature and are designed with rotatable optics to make shaping the light in a space quick and easy. Rotatable optics can be adjusted in the field in 30 degree increments from 0 to 180.
- Convenient, snap in-place lenses come in flat, curved or narrow optic varieties to meet a variety of lighting requirements.
- Constructed with rigid, die-formed steel housing for long-lasting durability. After fabrication, metal parts are treated with phosphate rust inhibitor and coated with high-reflectance polyester powder.
- 0 - 10 V dimming (10%-100%) standard. Included power cord comes with two low voltage dimming leads. Additional components for wired dimming system should be selected and supplied by installing electrical contractor.
- For mounting, lights come with MCH10 (Hook Cable Mount) suspension kits.
- Manufactured in the USA and backed by 5 year limited warranty.
- Fixtures come in white color.

The L1000 Next-Gen Greenhouse Toplight optimizes lighting efficiency in greenhouses and grow rooms, increasing yields and decreasing time to harvest.

- This powerful LED top lighting allows growers to cover large areas with fewer fixtures, reducing capital investment and maximizing production.
- True 1:1 replacement for legacy 1000W HPS greenhouse light fixtures.
- Light spectrum for lamp is Pink Reproductive Spectrum. Seven additional spectrums available. Contact your knowledgable National Account Manager.
- Features an ultra-slim form factor to minimize crop shading.
- Unique XW Optic promotes superior uniformity and reduces fixture count by up to 15%.
- PPF of up to 2250 µmol/s for high performance.
- Customers can choose from 120 - 277 V and 277 - 480 V lighting.
- Dimmable cord must be purchased separately.

Increase safety, brighten up those outdoor areas.

- Please note: High Intensity Discharge lighting, commonly called HID lighting, requires a special fixture and ballast for each type and wattage. The bulb wattage must be matched to the ballast rating. Using the incorrect bulb in a ballast can result in problems such as overheating and bulb damage which may result in premature ballast failure.

This UV-resistant greenhouse material is 12 times lighter than glass. These easy-to-handle, lightweight sheets are a breakthrough in greenhouse technology, and they can be used to provide crops with lighting or as a blackout option.

- Also widely used for construction, rain shields and soundproofing applications.
- Will not film over after long exposure to sunlight.
- Tough, practically shatterproof, 8 mm polycarbonate material maintains light transmission over years of use.
- Hollow, twin-wall construction gives superior insulating capabilities for better heat retention and lower fuel costs.
- Weighs only 1.5 KG/m2—1/12 that of glass.
- Virtually no UV penetration.
- Highly flame resistant, with a flashpoint of 1,166˚F.
- 10 year warranty.

DH8004/DH8007

- Foil Tapes are flame retardant.

The number one choice for waste storage structures, large ponds, fish and decorative ponds, waterways, water gardens, golf courses, ice skating rinks, rooftop gardening and more.

- Constructed of multi-layer, black, high-density, reinforced polyethylene.
- 36 mil thickness.
- Minimum order: 200 sq. ft.
- Maximum panel size: 10,000 sq. ft.
- The enhanced UV resistance, abrasion resistance and seam strength, coupled with the puncture and tear properties, make this liner ideal for manure covers.
- Large panels can easily be joined in the field using our Premium TapeCoat* Seaming Tape.
- 15 year warranty is offered when used with our Non-Woven Pond Underliner, sold separately.

Non-Woven Underliner provides filtration, separation and tensile reinforcement, as well as embankment stabilization.

Lightweight, non-woven geo-textile underliner is ideal for farm and ranch applications for livestock and equine. Don't let mud hinder the performance of your beef and dairy herds, nor create an unhealthy environment for your horses. Create a stable, all-weather surface that will dramatically improve the footing and overall hoof health of your cattle and horses. Simply lay the underliner down, cover with gravel or rock and finish with surface footing/cover material of choice. Perfect for exercise rinks, stables and paddocks, around feed bunks, water troughs and more.

- 105246 is ideal for waste oil containment, roads, roofs, dams, pipe wrapping and trenches, landfills, drainage areas and construction use.
- Protects your pond liner from tears and punctures caused by stones, roots and soil chemicals. Pond liner warranties are valid only when underliner is used.
- Constructed from 8 oz., charcoal gray, non-woven fabric that is 100% staple polyester and polypropylene needle-punched design.
- Resistant to tears, puncture, soil chemicals, ultra-violet light exposure and virtually unaffected by hydrocarbons, mildew, rot and freeze-thaw.
- 112652 and 113787 are made of 95% polyester, are heavyweight and have superior life expectancy and UV resistance.
- Provides more even diffusion of built-up gases and fluids.
- Minimum order: 10'.
- Maximum continuous roll length: 300'. Roll width: 15'.

Duraclad® Interlocking Multiwall Panels are a strong, easy-install cladding solution that can be used on all types of structures to make them more functional, hygienic and sleek.

- These PVC liner panels are a high-performance alternative to fiberglass reinforced panels, painted drywall, plasterboard, plywood and a variety of other materials. Ideal for use in dairy, hog and poultry farms, controlled environment agriculture (CEA), factories and industrial buildings, salt storage, fertilizer storage, refrigerated warehouses and much more.
- Can be used on both interior walls and ceilings and feature a multiwall structure that results in high level of rigidity and strength, while also allowing for rapid installation.
- Interlocking tongue and groove edges permit fasteners to be completely hidden, resulting in clean, smooth finish.
- Smooth, bright white surface is easy to clean and maintain and is resistant to chemicals, mold, bacteria and water.
- Panels are also non-flammable, offer excellent light reflectance and feature an attractive high-gloss finish.
- All panel trim pieces (117970-117975) are 10'L.
- Includes 20 year warranty.

WARNING: Cancer and Reproductive Toxicity - P65Warnings.ca.gov ⚠

Puncture-resistant, high tear strength FeedShield™ and FeedShield™ Pro Reinforced Silage Tarps feature durable, multi-layer string polyethylene construction, defending your silage outdoors for up to 18 months.

- Industry-leading OTR (Oxygen Transmission Rates) protect silage from the elements. Perfect for preserving stored feed, forage, hay and more.
- Black side insulates silage interior and white side reflects light off the exterior, preventing transmission of light and moisture through silage barrier.
- A multi-layer string polyethylene cover is puncture-resistant and has high tear strength.
- Durability and straightforward installation save labor, money and time.
- Use indoors or outdoors. Up to 18 months of outdoor protection.
- FeedShield™ Reinforced Silage Tarp (118991-118997) 7 mil thick with a 4-layer string polyethylene design.
- FeedShield™ Pro Reinforced Silage Tarp (118998-119004) is 8 mil thick and features a 10-layer string reinforced polyethylene cover with an EVOH barrier.
- Available in widths from 24' to 60'.
- Must be purchased in lengths of 5' increments.

PolyMax® Premium Hay Tarps are engineered for strength, durability and superior nutrient retention.

- Available in either 7.5 oz., 16 mil Silver/White or 10 oz., 22 mil White UV-resistant polyethylene fabrics.
- 7.5 oz. tarps come with a 4 year warranty. Silver side banishes harmful sunlight, while the white side stops heat within the stack.
- 10 oz. tarps come with our exclusive 5 year warranty. The superior performance of these white tarps keeps your hay the coolest while preserving the chemical composition and nutrient value.
- Ideal protection from sun, rain and wind.
- Hay tarps come complete with strapping, ratchets and earth auger anchors for placement at each corner.
- Sleeves along lengths accept weight-adding pipe to ensure stability and allow you to adjust tarp to different sizes. We recommend using our 1.315" OD pipe (131S075), sold separately.
- For additional securing, we recommend our Hay Tarp Anchor Kit which includes four ratchet tie-downs and four corkscrew ground stakes, sold separately.
- For optimum results, place the ratchet tie-downs every 6' to 8' on center along each side.
- Custom sizes are available. Simply ask your knowledgeable National Account Manager.

WARNING: Cancer and Reproductive Toxicity - P65Warnings.ca.gov ⚠

Custom Tarps are ideal for grain, boats, construction, greenhouse covers, equipment and more.

- Available as tarp sheets, tarps that are bound and grommeted or tarps with pockets and straps.
- Choose your fabric weight and style.
- Our Tarp Anchor Kit, sold separately, is ideal for use with the pocket-style tarps.
- Where indicated, add appropriate letter to end of the STK# to indicate your desired color choice.
- Standard grommet spacing is 12" on center.
- Tarps with pockets will include straps in two sides (must note which side).
- Custom shapes, grommet spacing and added features, such as zippered door, can be added to any custom tarp. Zippered doors allow for easy access anytime, without removing the entire cover. Zippers are available in either #10 Standard-Duty or #15 Heavy-Duty. See details below.
- Panels under 300 sq. ft. incur a small-panel charge of $28.95 (STK# CC3046).
- Priced per sq. ft. All fabrics are available in factory bulk rolls.

BW COLORS

3.1 oz. Black/White PolyMax® All-Purpose Fabric

- White side is ideal as a vapor barrier, wall or ceiling cover.
- Woven polyethylene with a count of 8 x 3 tapes per in.
- Tensile strength: 90 lbs. Warp x 60 lbs. Weft (ASTM D-751, Grab).
- Tear strength: 31 lbs. Warp x 18 lbs. Weft (ASTM D-751, Tongue).
- Thickness: 5 mil.
- Minimum order: 50'. Available in Bulk Fabric Rolls only.

C BW COLORS

5.2 oz. Custom Tarps

- Medium weight poly material is ideal for use in poultry houses or as a roll-up curtain in greenhouses.
- Added UV inhibitors. Will not tear or rot.
- Thickness: 12 mil.
- Not available with pockets.

BS COLORS

6 oz. Custom Tarps

- Woven polyethylene with a count of 10 x 8 tapes per in.
- Thickness: 12 mil. Superior UV resistance.
- Withstands both prolonged heat and cold extremes.
- Silver exterior side provides excellent heat-reflective properties.

W C COLORS

6 oz. Flame-Retardant Fabric

- Available in Clear or White.
- Woven polytheylene, 10 x 8 tapes per in.
- 12 mil thick.
- Priced per linear ft. Available in Bulk Fabric Rolls only.

W C SW COLORS

7.5 oz. Custom Tarps

- Super-heavy 7.5 oz. per sq. yd. is available in Clear, Silver/White or White.
- Weave: 12 x 12 (ASTM D-3775). Thickness: 16 mil (ASTM D-1777).
- Tear strength: Warp 68 x Fill 65 (ASTM D-2261).
- Tensile strength: Warp 270 x Fill 199 (ASTM D-1682).
- Mullen Burst: 425 PSI (ASTM D-3786).
- Far superior to film when used as greenhouse cover.

W N C COLORS

10 oz. Custom Tarps

- 10 oz. rip-stop polyethylene covering is durable, strong and long lasting.
- Available in Clear, White or Green.
- Weave: 14 x 14 (ASTM D-3775). Thickness: 22 mil (ASTM D-1777).
- Tear strength: Warp 74 x Fill 83 (ASTM D-2261).
- Tensile strength: Warp 317 x Fill 249 (ASTM D-1682).
- Mullen Burst: 510 PSI (ASTM D-3786).

W G N T COLORS

12.5 oz. Custom Tarps

- 12.5 oz. 24 mil premium poly tarp is available in your choice of four colors.
- Weave: 16 x 16 (ASTM D-3775).
- Thickness: 24 mil (ASTM D-1777).
- Tear strength: Warp 120 x Fill 120 (ASTM D-2261).
- Tensile strength: Warp 350 x Fill 340 (ASTM D-5034).
- Mullen Burst: 670 PSI (ASTM D-3786).

W COLORS

12.5 oz. Flame-Retardant Custom Tarps

- 12.5 oz. flame-retardant fabric is available in White only and comes with a 10 year life expectancy.
- Thickness: 24 mil (ASTM D-1777).
- 16 x 16 tapes per inch.
- Tear strength: Warp 120 x Fill 120 (ASTM D-2261).
- Tensile strength: Warp 350 x Fill 340 (ASTM D-5034).
- Mullen burst: 670 PSI (ASTM D-3786).
- Meets NFPA 701 and ASTM E84 (Class 1).

W C SC COLORS

16 oz. Custom Tarps

- 16 oz. polyester laminated vinyl, 1,000 x 1,000 denier tarps are available in White, Clear or Super Clear.
- Super Clear, with "see-through" effect, allows maximum light for your livestock and can help minimize energy costs.
- Matte finish does not attract dirt.
- Tear strength: Warp: 75 lbs., Fill: 70 lbs.
- Tensile strength: Warp: 240 lbs., Fill: 235 lbs. Hydrostatic resistance: 370 PSI.
- Superior cold-crack and UV resistance.

W T COLORS

22 oz. Custom Tarps

- Our strongest tarp for your toughest applications.
- 22 oz. PVC-coated 22 x 20 1,000 denier woven vinyl.
- Available in White or Tan as tarp sheets, tarps that are bound and grommeted or tarps with pockets and straps.
- Flame resistant.
- Temperature range: -22° F to 158° F.
- Priced per sq. ft.

Add a zippered door to any custom cover or tarp.

- Available in #10 Standard-Duty and #15 Heavy-Duty, industrial.
- Zippered door allows for easy access anytime without removing the entire cover.
- Zippers are available as zipper only for self installation or installed by us in your custom cover or tarp.

#10 Zipper

#15 Zipper

Factory bulk rolls offer great savings.

- Factory bulk rolls now available in flame-retardant, 6 oz. fabric in your choice of Clear or White.
- Make your own custom tarps and covers with any of our bulk roll fabrics and our easy-to-use Premium Tarp-Making Tape. Available in either Black or White, tape is sold separately.

Sunmaster™ EVO AC® 8-Layer Greenhouse Film offers a superior alternative to other anti-drip films, supplying growers with exceptional condensation control, greater light transmission and a longer, more productive lifespan.

- This 6 mil greenhouse film is manufactured with specially designed 7-layer co-extrusion lines, along with additional 8th layer on film's surface that provides long-lasting anti-dripping effect.
- Non-migratory anti-dripping system is built for greater longevity, ensuring advantage in humidity management and making it possible to use film for more than 4 years.
- This material eliminates mist, helping to prevent humidity from settling on plants and creating favorable conditions for fungal diseases.
- Special composition allows more light to enter greenhouse, achieving greater than 91% light transmission.
- Works well in low temperatures, yielding crystal clear droplet-free appearance for the products lifetime.
- More effective at lower roof slopes than traditional anti-drip films, which require 30° inclination to perform well.
- Install the film on the greenhouse with external side of roll facing ground.

CUSTOM-CUT EVO AC® 8-LAYER GREENHOUSE FILM

		PRICE PER LINEAR FT.		
STK#	WIDTH	1'– 99'	200'–999'	1000' & UP
108656	20'W	$1.67	$1.65	$1.63

118108	56'W	6.99	6.95	6.89

Custom-cut lengths under 50'L incur a small panel charge of $12.00.

Excellent durability and light transmission.

- Ideal for both single and double-layer greenhouse applications.
- Copolymer tri-layer construction provides superior strength and high light transmission.
- 55% opacity keeps the light shining through.
- UV stabilized for up to four years of film life.
- Available in full rolls or custom-cut lengths.

NEW Sunmaster™ Infrared/Anti-Condensate Thermal Greenhouse Film allows for greater yields and significant savings on energy costs. It combines superior heat retention and condensation control, while maximizing light transmission and light diffusion.

- UV Open technology maximizes the amount of UV light that reaches plants, resulting in earlier and higher yields.
- Provides improved diffusion levels at 75% for more uniform plant growth, while still achieving >90% global light transmission.
- Thermic effect reduces heat loss during the night, enabling significant savings on heating costs and promoting a more stable growing environment.
- Film offers exceptional durability over time and remains effective in temperatures as low as 15°F.
- Anti-drip and anti-fog additive is incorporated throughout the film and ensures superior condensation control, contributing to greater plant health.
- Film should not come in direct contact with PVC.
- Writing should be facing the inside of the greenhouse so you can read from inside the greenhouse.
- Available in full rolls or custom–cut lengths.

Custom-cut lengths under 50'L incur a small-panel charge of $12.00.

Low-cost solution to your greenhouse fabric needs.

- This heavy-duty, woven polyethylene features an anti-condensate additive on one side that reduces moisture buildup and dripping.
- 85% light transmission.
- Designed to stand up to just about any climate.
- Resists rips and tears.
- UV additives allow the fabric to maintain its strength, ensuring a dependable greenhouse fabric with a long life.
- Available in 5.2 oz., 11 mil and 7.5 oz., 16 mil.
- 144" wide, priced by the linear foot.

Making gutter repairs has never been easier or more economical.

- Patch holes and line existing gutters with minimal labor and cost.
- Durable and lightweight, reinforced geomembrane black fabric is available in either 24 mil or 36 mil.
- Specially formulated polyester scrim, with polypropylene barrier layers will not rot and has a long life expectancy.
- UV-resistant material holds shape well and can handle extreme weather conditions.
- Also ideal for making your own water troughs, lining feed bunks and more.
- We recommend using our Premium Sealing and Repair tape, sold separately. Adheres to metal, plastic and rusted areas.
- Priced per linear ft. Minimum order 20 ft.

117781	8" x 0.072" x 0.272"	$2.19	$2.15
117782	12" x 0.110" x 0.310"	5.15	5.09

3rd measurement is thickness of rib.

LOW TEMPERATURE/OFFSET DOUBLE-RIBBED PVC

		PRICE PER LINEAR FT.	
STK#	SIZE	EACH	150' & UP
XR3780	8" x 0.072" x 0.272"	$3.45	$3.35
XR3782	12" x 0.110" x 0.310"	6.89	6.65

3rd measurement is thickness of rib.

Great for heavy-duty applications such as forklift traffic and pallet jacks. Made to last.

- Ribs are spaced approximately 2" apart and are offset by 1/2".
- Ribbed material prevents surface contact and decreases static buildup.
- Standard PVC strips are ideal for use in temperature ranges 0° to 130°F, while economy PVC strips are best for use in temperature ranges 5° to 122°F.
- UV stabilized.
- Priced per linear ft.

ECONOMY OFFSET DOUBLE-RIBBED PVC

3rd measurement is thickness of rib.

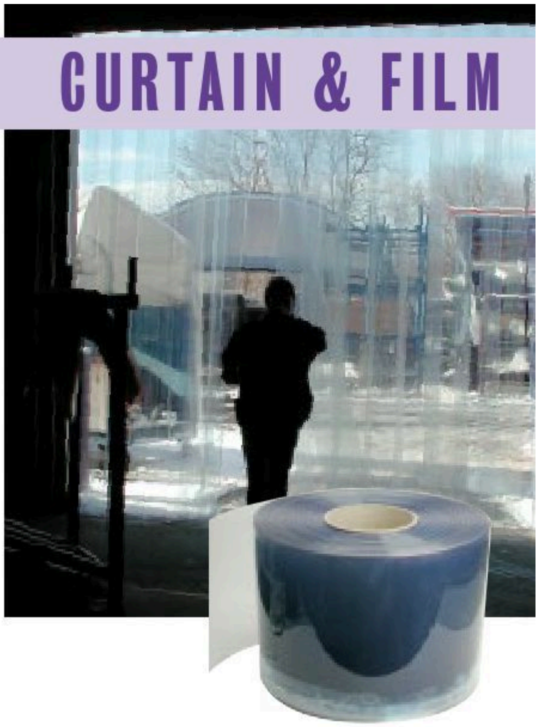
STANDARD OFFSET DOUBLE-RIBBED PVC

		PRICE PER LINEAR FT.	
STK#	SIZE	EACH	150' & UP
XR3790	8" x 0.072" x 0.272"	$3.15	$3.05
XR3792	12" x 0.110" x 0.310"	6.05	5.85

3rd measurement is thickness of rib.

Vinyl Strip Doors protect from noise, heat, cold, humidity, dust and drafts. They're easy to order and install.

- Outstanding transparency. "See-thru" quality.
- Manufactured of flame-resistant compounds.
- Extruded with rounded edges.



Fill in the blanks:

1. Linear Footage Factor: ________________.
   Determine your door's linear footage factor using the chart below.
   - First, select the material width.
   - Next, follow the row across to the column representing the overlap percentage you have decided on. The number in the box is your linear footage factor.
2. Height of opening: ________________ (round up measurement to next full foot, i.e., 15'6" rounds to 16').
3. Width of opening: ________________(round up measurement to next full foot, i.e., 19'4" rounds to 20').
4. Multiply the door width from step 3 by the linear footage factor from step 1. The result is the number of strips required.
   Door width: ________________ x Linear Footage Factor:
   ________________ = Number of strips required: ________________.
5. To determine the actual linear feet of strip, multiply the number of strips required from step 4 by the height of the door from step 2: ________________.
6. Finally, select your mounting hardware.

Example: Medium traffic exterior doorway in a northern Minnesota warehouse. The following steps correspond to the ordered checklist above. For this heavy-duty application, we selected 12"W, standard offset double-ribbed vinyl strips.

1. 1.5 linear footage factor, 12" strips with a 67% overlap.
2. 16' (i.e., the door is actually 15'6" rounded up to 16 ft.).
3. 20' (i.e., the door is actually 19'4" rounded up to 20 ft.).
4. 1.5 linear footage factor x 20' width of door = 30 strips needed.
5. 30 strips required x 16' height of door = 480 linear ft. The door requires 480 linear ft. of 12"W offset double-ribbed vinyl strips. Now just decide on mounting hardware.
6. Two 8' and one 4' Universal Strip Door Mounting Kits will mount strips along the 20' of door's width. Strips will mount directly under the header and will not interfere with automatic overhead doors.

Determining Linear Footage

DESIRED WIDTH	OVERLAP PERCENTAGE					
	25%	33%	50%	67%	75%	100%
6"	–	2.4	–	3	–	4
8"	1.75	–	2	–	2.5	3
12"	–	1.2	1.35	1.5	–	2

Create a professional appearance for your strip door with our Universal Strip Door Mounting Kits and Molding.

*Maximum roll length: 300'.

⚠ **WARNING:** Cancer and Reproductive Toxicity - P65Warnings.ca.gov

Ideal for extremely cold climates and the north side of buildings. Helps to reduce your heating costs.

- Estimated R-value of 3.
- All seven curtain layers will not absorb moisture, eliminating the problem of rot and mildew. Approximately 1/10" thick when compressed.
- Priced per linear ft.

7-Layer Curtain Construction:

2 outer layers

- One layer 16 oz. white vinyl outside.
- One layer 5.2 oz. polyethylene vapor barrier inside.

5 interior layers

- Four layers of high-tech, non-woven insulating materials.
- One layer 5.2 oz. polyethylene vapor barrier.

VINYLTEK™ 7-LAYER INSULATED CURTAIN

WARNING: Cancer and Reproductive Toxicity - P65Warnings.ca.gov ⚠

Create versatile and rigid tubular structures.

- Galvanized, corrosion resistant.
- A cost-effective alternative to welding.
- Strong and easy to assemble.

QUIK KLAMPS: Standard hex key and tube cutters are all the tools you need. Create tubular frames without welding, threading, bolting or drilling. All you need for a cost-effective, versatile and simple way to design and assemble load-bearing indoor and outdoor structures quickly and easily. Precut pipe is easily fitted and locked in.

REFERENCE GUIDE
1" for 1.315" OD Pipe / uses 7/32" Hex Key
1-1/4" for 1.66" OD Pipe / uses 1/4" Hex Key
1-1/2" for 1.90" OD Pipe / uses 5/16" Hex Key

⚠ **WARNING:** Cancer and Reproductive Toxicity - P65Warnings.ca.gov

Ideal for barn curtains, greenhouse purlins, shade frames, racks, shelving, dairy stalls and more.

Unswaged
Swaged

- Superior finish eliminates stains and chemical reactions on curtains.
- Swaged coupling design eliminates bulging exterior couplings that tear curtains.
- Resists corrosion.
- Smooth and straight for perfect roll ups and drop downs.
- Can be used for vertical anti-billow pipe, purlins for greenhouses and building shade frames.
- Available swaged at one end.

Dutton-Lainson® Pulling Winches offer an ideal winch for many agricultural and commercial applications, like moving heavy equipment, boats and other vehicles.

- These winches are ideal for horizontal pulling applications. Not recommended for lifting or vertical use.
- Gears are arc-welded and drive shaft gears are copper-brazed for durability.
- Ratchet-type pulling winches free wheel when the ratchet is disengaged.
- Heavy-duty steel handles have molded grips.
- All drive shafts have permanently lubricated bearings.
- Two-way ratchet (AS9320, AS9325 & AS9335) allows line to come from underneath or over the top of the reel.
- 5 year limited warranty.

AS9325

Self-locking brake winches provide additional safety and control for many lifting and pulling jobs.

- The load remains in position anytime the handle is released.
- DL® brake winches are suitable for many agricultural, commercial and industrial applications, such as raising and lowering augers, conveyors and boats.
- Meets ASAE safety standard S361.3.

The most user-friendly respirators on the market, featuring fewer parts, minimal maintenance and a wider field of vision.

- Available in 7000 Series Half-Mask and 9000 Series Full-Face versions, these respirators are lightweight and durable for maximum comfort with extended use.
- 7000 Series Half-Mask Respirators feature a curved neck buckle and adjustable head cradle to ensure a comfortable, custom fit.
- 9000 Series Full-Face Respirators are easily put on and taken off due to convenient ratchet fastening strap system and stand-away head harness. Features scratch and fog-resistant lenses.
- Cartridges and filters are Series 7000 and 9000 compatible and are sold by the pair. NIOSH certified.
- Cartridges and filters are sold separately below.

- Cotton knit with vinyl dots.
- Great ventilation to keep hands cool.
- Hand-to-hand reversible.
- Machine washable.
- Sold by the dozen pair.
- One size fits all.

DOT GRIP GLOVES

STK#	ITEM	DOZEN PAIR
DH4000	FarmTek® Red Glove	$21.95
DH4001	TekSupply® Blue Glove	21.95

Perfect for material handling and fabrication operations where moderate heat and abrasion are a concern.

- Excellent as an economical liner or light-duty glove.
- Also for use in food service.
- Ambidextrous.
- Sold by the dozen pair.
- One size fits all.

MEN'S COTTON-POLY KNIT GLOVES

STK#	DOZEN PAIR	25 & UP
DH4010	$8.19	$7.89

Medium-weight 100% cotton glove.

- Knit wrist style.
- Sold by the dozen pair.
- One size fits all.
- Color: brown.

MEN'S 8 OZ. JERSEY GLOVES

STK#	DOZEN PAIR	25 & UP
DH4014	$9.25	$8.89

Latex provides sensitivity and durability for better protection.

- Meets FFDCA requirements for food contact.
- Sizes: S, M, L, XL.
- 5 mil thick.
- Lightly powdered.
- Box of 100.

DISPOSABLE LATEX GLOVES

STK#	BOX
DH109	$12.55

Industrial-grade, Disposable Vinyl Gloves.

- Lightly powdered.
- 6.5 mil thick for resistance to tears and abrasions.
- Ambidextrous.
- Color: Green.
- 100 per box.

9" DISPOSABLE VINYL GLOVES

STK#	SIZE	BOX
118069	M	$4.95

WARNING: Cancer and Reproductive Toxicity - P65Warnings.ca.gov

EZ-FLO Hose Bib & Drip Systems feed flowers, trees and shrubs without the need to constantly refill the tank.

- Ideal when you don't have a dedicated irrigation system, or when you want to separately address certain types of plants that require specialty fertilizers and supplements.
- Hose Bib Systems can be used by homeowners, nurseries or professional growers by simply attaching them to standard water faucets.
- Tanks are manufactured from heavy-duty polyethylene plastic that is not designed to withstand constant water pressure. They need to be depressurized after each use to ensure long service life.
- There are many end devices that can distribute fertilizer and supplements, making this a very flexible system to use.
- Maximum pressure limit is 50 PSI in operating mode.
- Systems are available in two tank sizes: 3/4 gallon and 2.5 gallon.
- EZ-FLO ensures that the proportion of fertilizer or supplement to water remains constant from the beginning of the cycle until the tank is depleted.
- Units have an adjustable cap with four basic settings, relating to the amount of fertilizer/supplement mixed with water.
- Coupling connectors are available in 1" with socket x socket connections and 3/4" bushing adapter. These PVC Schedule 40 couplings are 1/4" nylon barbed tubing that are used to connect the EZ-FLO System to the irrigation flow line (1/4" flexible tubing is provided with each system).
- A must-have for your system is the Hose Vacuum Breaker, which prevents backflow into your drinking water using a brass anti-siphon bulb with stainless steel spring and screw.
- Capacity:
  107718 5 pounds water soluble.
  112246 10 pounds water soluble.
- Gallons to empty setting ratio:
  107718:
  (Slow) 1,000:1 - 750
  (1) 500:1 - 375
  (2) 250:1 - 188
  (Fast) 100:1 - 75
  112246:
  (Slow) 1,000:1 - 2,000
  (1) 500:1 - 1,000
  (2) 250:1 - 500

Fertilizing has never been easier. Heavy-duty Brass Siphon Mixer fertilizes as you water.

- This accurate proportioning device has been exclusively designed for small-scale growers to dispense fertilizers, insecticides, fungicides and other water-soluble chemicals through a hose.
- Heavy-duty brass construction, with backflow preventer.
- Average dilution ratio: 16:1.
- Quickly and easily dispense one gallon of concentrate in as little as 5 minutes or less.
- Requires 35 PSI, minimum.

BRASS SIPHON MIXER

STK#	EACH	4 & UP

MixRite Livestock Medicators are ideal for dispensing medications, vaccinations, vitamins, minerals, electrolytes, nutritional supplements, line cleaners and more.

- Accurately injects additives into water by means of water power. No electricity needed.
- Easy to install and maintain. Highly chemical and UV resistant.
- Easy to adjust the dosing percentage. Perfect blending.
- Works at a very low flow rate.
- Spare Seal Kit is included with every unit.
- 3/4" BSPT. Can be used with NPT if used with thread coated tape, sold separately.

MixRite Horticultural Injectors ensure precise dosing continually and economically.

- Ideal for fertigation, water treatment, supplementation, disinfection, line cleaning, installations and pH and EC control.
- Water-driven proportioning injector for pumping an additive into a water line at a consistent rate over varying water pressure and flow rate.
- Easy to install and maintain. No electricity needed. Highly chemical and UV resistant.
- Ensures that nutrients are applied where needed.
- On-demand dispensing eliminates waste.
- Spare Seal Kit included with every unit.

Fertilizer Injector Systems deliver a finely tuned fertilizer mix to keep vegetables, perennials, bedding plants and crops of all kinds thriving.

- The water-driven proportioning injectors automatically fertilize and maintain the proper pH every time you irrigate.
- These energy-efficient units do not require electricity.
- Injector boards allow you to purchase pre-mixed fertilizers and pH adjusters or mix your own custom solutions to address specific needs.
- Your choice of Single or Double Injector Systems. Single Injector Systems are ideal for all-in-one fertilizer mixes and feature one pump for fertilizer and one for pH adjustments. Double Injector Systems allow two-part fertilizer mixes to be utilized and feature two pumps for fertilizer and one for pH adjustments.
- Easy to set up and install. Simply attach the unit to where your water line enters the growing space.
- Spare seal kits are included.

Granular Activated Carbon Filter Cartridges provide exceptional filtration and are a good option for high flow applications.

- Reduces bad taste and odors, as well as chlorine.
- Filters are designed for optimal absorption, and they feature a post filter that limits carbon fines.
- Improves drinking water by removing volatile compounds. Constructed from NSF-certified materials.
- These are a good option for point of use RO systems, whole-house filtration, commercial RO pretreatment and much more.

Burcam Discharge Effluent pumps are built to last and feature a cast iron motor and thermoplastic base.

- This multi-application, 1/2 HP pump has a maximum GPH of 3,300.
- Features 1-1/2" discharge with 1-1/4" reducer and can handle solids up to 3/4".
- Zinc model dissipates heat to extend motor life and eliminates corrosion.
- Features a 10' tethered switch.

BURCAM DISCHARGE EFFLUENT PUMP

STK#	EACH
115720	$259.00

Quickly and easily moves large volumes of water.

- Medium head models feature heavy-duty motors.
- Four-position discharge.
- J Series with Noryl® impellers are abrasion-resistant for normal applications with working temperatures to 140˚F.
- Easily serviced; has replaceable wear ring and back pull-out design.
- Drain port provided for easy winterizing.
- Close-grained cast iron body.

HIGH VOLUME CENTRIFUGAL PUMPS

STK#	HP	VOLTS	PHASE	EACH
WF4750	1/2	115 - 230	Single	$1,199.00
WF4770	1	115 - 230	Single	1,099.00
WF4772	1	208 - 230/460	Three	1,815.00
WF4810	1-1/2	115 - 230	Single	965.00
WF4820	2	230	Single	1,329.00
WF4822	2	208 - 230/460	Three	1,999.00

This multi-purpose Effluent Pump provides durability and dependability.

- 1/2 HP motor enables a maximum flow of 4,400 GPH.
- Handles up to 1/2" solids.
- 1-1/2" discharge with 1-1/4" reducer.
- Durable construction includes stainless steel motor casing and a cast iron base.
- Features a clog-free impeller.
- Water cooled.

EFFLUENT PUMP

STK#	EACH
115208	$305.00

4" Multi-Stage Submersible 1/2 HP Pump

- 6-stage, 1/2 HP, 115 V, double-sealed motor with thermal overload protection.
- Maximum load amps of 11.0. Pump operates with reduced amp draw, resulting in less energy consumption and lower energy costs.
- Cooler and quieter operation. Water passing over the motor cools while dampening noise.
- Corrosion-resistant stainless steel shell. Polycarbonate diffusers.
- 10' power cord.
- Pump must be submerged at all times during operation.

4" MULTI-STAGE SUBMERSIBLE PUMP

STK#	EACH
109770	$785.95

Burcam's Submersible Sump Pump is the ideal solution for residential basements.

- The pump is 1/3 HP and has a maximum GPH of 3,000.
- Maximum lift of 18 ft.
- Zinc model dissipates heat to extend motor life and eliminates corrosion.
- Designed to reduce overheating, so it can handle just about any residential application without getting too hot.
- Can be used to replace upright or submersible pumps. It is designed for permanent use in a basin that is at least 14" in diameter.

BURCAM SUBMERSIBLE SUMP PUMP

STK#	EACH
115722	$199.00

The Burcam Sewage Pump provides a superior option for the harshest sewage environments.

- This sewage pump is 1/2 HP and has a maximum GPH of 4,900.
- The heavy-duty motor is water cooled, allowing it to run longer without overheating.
- The motor is housed in a stainless steel motor casing and features a cast iron vortex impeller.
- Features a tethered switch.

BURCAM SEWAGE PUMP

STK#	EACH
115721	$515.00

Great for high volume washdowns and spray systems.

- 80 PSI maximum inlet pressure, 315 PSI maximum working pressure.
- 3/4" pipe tapping size for suction and discharge. Uses 1" for WF4730.
- Stainless steel shell and shaft.
- Acetal impeller, polycarbonate diffuser.
- Maximum liquid temperature: 140˚F.

WF4720, WF4730:
Dual voltage, no cord.

REPLACEMENT PUMP STACKS

STK#	EACH
WF4714 for WF4710	$1,555.00

SIGNATURE 2000® BOOSTER PUMPS

STK#	HP	# OF STAGES	RATED FLOW	DISCHARGE PRESSURE @ RATED FLOW	EACH
WF4700	1/2	9	7 GPM	90 PSI	$1,779.00
WF4710	3/4	12	7 GPM	132 PSI	1,335.00
WF4720	1	16	7 GPM	173 PSI	1,389.00
WF4730	1-1/2	9	20 GPM	115 PSI	1,259.00

Portable and versatile, this Submersible Utility/Sump Pump can be used in a variety of areas such as window wells, basements and roof tops.

- Easy to use, yet rugged. Corrosion-resistant plastic body construction.
- Self-cleaning screen reduces maintenance.
- Cord wrap feature for organized storage and easy portability.
- Maximum pumping capacity: 1,320 GPH.
- Includes 8' power cord and a garden hose adapter.

SUBMERSIBLE UTILITY/SUMP PUMP

STK#	HP	EACH
110832	1/4	$145.00

As a thermoplastic, corrosion-resistant utility pump, the Flotec Utility Pump is ideal for portable water transfer and pressure boost.

- Transfers surface water from natural sources for landscape irrigation.
- Can also be used to boost water pressure or as a portable sprinkler pump.
- Great for washing vehicles, equipment, sprinkling and more.
- 1/2 HP, 10.3 GPM, 62 max. PSI.
- Powered by a 115 V air-cooled motor and includes a 6' power cord, garden hose adapters and 1" threaded suction and discharge.

FLOTEC UTILITY PUMP

STK#	EACH
113583	$459.00

Support efficient water pressure with the Tiny Might Circulationg Pump.

- High volume side discharge maintains optimum flow and efficiency.
- Large 6-1/2" diameter wet end helps with higher head pressure.
- 1/16 HP, 115 V.
- Wet end rotates for easy installation.
- 1" Thread x 1" Slip Pump Union sold separately.

113537

113536

TINY MIGHT CIRCULATING PUMP

STK#	ITEM	EACH
113536	Circulating Pump	$379.00
113537	Pump Union	11.29

Submersible Waterfall/Utility Pump is ideal for hydroponic and aquaponic systems. Because it has a quiet, oil-free motor, it is safe for fish and plants.

- Designed for continuous operation. Ideal for waterfalls and streams.
- Heavy-duty thermoplastic and stainless steel construction maximizes pump life.
- Easy to install. Comes complete with 15' power cord, 1-1/4" barbed fitting and garden hose adapter.
- 1/3 HP. Maximum pumping capacity: 2,400 GPH.
- 1 year manufacturer's warranty.

SUBMERSIBLE WATERFALL/UTILITY PUMP

STK#	EACH
112656	$379.00

This cast iron sump pump is ideal for basement sumps, dewatering and water transfer, and they feature durable construction, allowing them to be operated in even the most extreme conditions.

- Made from corrosion-resistant, rugged cast iron and stainless steel, and the ball-bearing construction enables a long life.
- Motor supports heat dissipation and has heat overload protection. It provides continuous bearing lubrication, and the shaft seal protects the unit from water damage.
- Allows for manual or automatic operation.
- 1-1/2" NPT discharge.
- Single phase.
- 1/3 HP.
- 115 V, 60 Hz.

SUMP PUMP

STK#	SWITCH TYPE	GPM (AT 10' LIFT)	EACH
113805	Vertical Automatic	49 (40)	$305.00
